Student Displacement in Louisiana After the Hurricanes of 2005

John F. Pane,2006 Hurricane Katrina was the most costly and devastating natural disaster in U S history It and Hurricane Rita combined left the Gulf region with tremendous challenges for recovery and the need to rebuild infrastructure and reestablish services This report focuses on the displacement of approximately 200 000 public school students in Louisiana To help guide educators and policymakers in their ongoing responses to this disaster and in their preparations for future events this technical report documents many of the short term effects of the movements of students caused by the storms Focusing on the Louisiana public school system it explores the experiences of displaced students during the first academic year following the hurricanes their movements among schools the durations of enrollments at each site time out of school and the number and characteristics of students fitting each of four patterns of movement It also reports on the effects of the displacement on schools and their students and policies adopted in response to serving displaced students Using Louisiana s student data system we obtained information about all students in the state who entered or exited a public school at any time during the 2005 06 school year because of the hurricanes and we surveyed principals from a stratified sample of schools serving displaced students statewide The student displacement due to Hurricanes Katrina and Rita persisted throughout the entire 2005 06 school year 55 percent of the displaced students ended the school year outside their original schools The students who remained displaced were disproportionately minority students and students who had been achieving poorly prior to the storms But even among those students who have returned to their original schools a substantial amount of schooling was lost and the effects of the storms linger Principals reported that displaced students both those who have returned to their original schools and those who have enrolled elsewhere in the state exhibited several common symptoms of trauma In some schools the displaced students were more likely than others to engage in fighting arguing bullying eating or playing in isolation and violating school rules they were less likely to engage in school clubs activities social events or sports teams Principals also frequently reported that displaced students were more likely than preexisting students to need mental health counseling Schools throughout the state and the nation will continue to be called on to serve displaced students and it is imperative that they obtain the resources they need to serve them well Policies and resources to help teachers manage their own hurricane related problems and mental health needs might ultimately improve the services teachers provide to students Finally education officials at both the state and local levels would benefit from better access to complete and accurate student records and a national system to coordinate two way sharing of student information across state boundaries

New Orleans in the Atlantic World William Boelhower,2013-09-13 The thematic project New Orleans in the Atlantic World was planned immediately after hurricane Katrina and focuses on what meteorologists have always known the city s identity and destiny belong to the broader Caribbean and Atlantic worlds as perhaps no other American city does Balanced

precariously between land and sea the city's geohistory has always interwoven diverse cultures languages peoples and economies Only with the rise of the new Atlantic Studies matrix however have scholars been able to fully appreciate this complex history from a multi disciplinary multilingual and multi scaled perspectivism In this book historians geographers anthropologists and cultural studies scholars bring to light the atlanticist vocation of New Orleans and in doing so they also help to define the new field of Atlantic Studies This book was published as a special issue of Atlantic Studies *Handbook of public health in natural disasters* Ronald Ross Watson, Joseph A. Tabor, John E. Ehiri, Victor R. Preedy, 2023-08-07 The combination of growing populations moving into large cities in high risk zones increase the risk of natural disasters with a substantial public health consequence A high population density and rapid air travel increase the spread and effects of plagues and diseases People in countries with limited resources are more vulnerable to death and other consequences of disasters This requires global rather than national preparedness and response strategies Public health organisations government and non government organisations can take a leadership role and provide training organisation and research knowledge to improve responses to such disasters This book is the first holistic public health approach in relation to natural disasters It fills the gap to have a one stop shopping synopsis of key ideas associated with mediation of public health natural disasters It is unique in focusing on lessons learned rather than what to do Published research relating to general responses by public health agencies to disasters is scientifically evaluated Various types of disasters are reviewed flooding diseases earthquakes volcanoes and drought Long term needs prevention and individual preparation are taken into account The information can be used to prepare and mitigate effects of disasters The summary points at the start of each chapter will help the reader to use as this book as reference book and for educational purpose Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2008 United States. Day, G. Paul Kemp, Angelina M. Freeman, David P. Muth, 2014-05-16 Human impacts and emerging mega trends such as climate change and energy scarcity will impact natural resource management in this century This is especially true for deltas because of their ecological and economic importance and their sensitivity to climate change The Mississippi delta is one of the largest in the world and has been strongly impacted by human activities Currently there is an ambitious plan for restoration of the delta This book by a renown group of delta experts provides an overview of the challenges facing the delta and charts a way forward to sustainable management *The Sociology of Katrina* David L. Brunσμα, David Overfelt, J. Steven Picou, 2007 A second edition of this textbook is now available As a disaster Hurricane Katrina logs in as both the most destructive and instructive when considering the cataclysmic effects as well as the magnitude of knowledge that can be drawn from it This meteorological event became the stimulus for devastating technological failures and widespread toxic

contamination causing the largest internal diaspora of displaced people in recent U S history This book brings together the nation s top sociological researchers in an effort to catalogue the modern catastrophe that is Hurricane Katrina The chapters in this volume discuss sociological perspectives of disaster literature provide alternative views and analyses of early post storm data collection efforts and examine emerging social questions that have surfaced in the aftermath of Katrina

Lifespan Perspectives on Natural Disasters Katie E. Cherry,2009-07-09 Some of our most disturbing images of Hurricane Katrina involve the very old trapped in flooded nursing homes and the very young sick in toxic trailers Using the Katrina Rita nexus as its reference point Lifespan Perspectives on Natural Disasters takes the developmental long view on human strengths and vulnerabilities during large scale devastation and crisis An expert panel of behavioral scientists and first responders analyzes the psychological impact of natural disasters on and coping faculties associated with children adolescents and young middle aged older young old and late life oldest old adults This timely information is invaluable both to mental health service providers and to those tasked with developing age appropriate disaster preparedness intervention and recovery programs In addition the book references other deadly storms as well as other major catastrophic events e g the September 11 attacks the Indian Ocean Tsunami and includes such topics as Young children s understanding of hurricanes Positive adjustment in youth after Katrina How families make meaning out of disaster Disaster recovery in the workplace Recovery services for the frail elderly Coping and health in late life Preparation and training mental health personnel for disasters Unique in the disaster literature Lifespan Perspectives on Natural Disasters serves as a research reference and idea book for professionals and graduate level students in psychology social work and disaster preparedness and services

Louisiana Agriculture,2008 **On Risk and Disaster** Ronald J. Daniels,Donald F. Kettl,Howard Kunreuther,2011-06-07 Named one of Planetizen s Top 10 Books of 2006 Hurricane Katrina not only devastated a large area of the nation s Gulf coast it also raised fundamental questions about ways the nation can and should deal with the inevitable problems of economic risk and social responsibility This volume gathers leading experts to examine lessons that Hurricane Katrina teaches us about better assessing perceiving and managing risks from future disasters In the years ahead we will inevitably face more problems like those caused by Katrina from fire earthquake or even a flu pandemic America remains in the cross hairs of terrorists while policy makers continue to grapple with important environmental and health risks Each of these scenarios might in itself be relatively unlikely to occur But it is statistically certain that we will confront such catastrophes or perhaps one we have never imagined and the nation and its citizenry must be prepared to act That is the fundamental lesson of Katrina The 20

contributors to this volume address questions of public and private roles in assessing managing and dealing with risk in American society and suggest strategies for moving ahead in rebuilding the Gulf coast Contributors Matthew Adler Vicki Bier Baruch Fischhoff Kenneth R Foster Robert Giegengack Peter Gosselin Scott E Harrington Carolyn Kousky Robert Meyer Harvey G Ryland Brian L Strom Kathleen Tierney Michael J Trebilcock Detlof von Winterfeldt Jonathan Walters Richard J Zeckhauser Regional Perspectives on Agricultural Guestworker Programs United States. The Place with No Edge Adam Mandelman, 2020-04-08 In The Place with No Edge Adam Mandelman follows three centuries of human efforts to inhabit and control the lower Mississippi River delta the vast watery flatlands spreading across much of southern Louisiana He finds that people's use of technology to tame unruly nature in the region has produced interdependence with rather than independence from the environment Created over millennia by deposits of silt and sand the Mississippi River delta is one of the most dynamic landscapes in North America From the eighteenth century establishment of the first French fort below New Orleans to the creation of Louisiana's Coastal Master Plan in the 2000s people have attempted to harness and master this landscape through technology Mandelman examines six specific interventions employed in the delta over time levees rice flumes pullboats geophysical surveys dredgers and petroleum cracking He demonstrates that even as people seemed to gain control over the environment they grew more deeply intertwined with and vulnerable to it The greatest folly Mandelman argues is to believe that technology affords mastery Environmental catastrophes of coastal land loss and petrochemical pollution may appear to be disconnected but both emerged from the same fantasy of harnessing nature to technology Similarly the levee system's failures and the subsequent deluge after Hurricane Katrina owe as much to centuries of human entanglement with the delta as to global warming's rising seas and strengthening storms The Place with No Edge advocates for a deeper understanding of humans relationship with nature It provides compelling evidence that altering the environment whether to make it habitable profitable or navigable inevitably brings a response sometimes with unanticipated consequences Mandelman encourages a mindfulness of the ways that our inventions engage with nature and a willingness to intervene in responsible respectful ways

Critical Perspectives on Teaching in the Southern United States Tori K. Flint, Natalie Keefer, 2020-10-21 Critical Perspectives on Teaching in the Southern United States presents provocative insights into education in the Southern United States from the perspective of educators This book foregrounds the Southern United States unique sociopolitical sociohistorical and sociocultural contexts which directly influence knowledge and classroom pedagogies Contributors use critical frameworks that coalesce around methods including self reflection social justice and culturally responsive relevant sustaining and asset based pedagogies Chapters explore salient topics such as race language gender discrimination identity immigration poverty social justice and their influence's on pedagogy This book raises complex questions considering how history has shaped

present day education in the Southern U S context Wetland Habitats of North America Darold P. Batzer, Andrew H. Baldwin, 2012-05-22 Wetland Habitats of North America is essential reading for everyone who studies, manages or visits North American wetlands. It fills an important void in the wetland literature providing accessible and succinct descriptions of all of the continent's major wetland types. Arnold van der Valk, Iowa State University. Batzer and Baldwin have compiled the most comprehensive compendium of North American wetland habitats and their ecology that is presently available, a must for wetland scientists and managers. Irving A. Mendelsohn, Louisiana State University. If you want to gain a broad understanding of the ecology of North America's diverse wetlands, Wetland Habitats of North America is the book for you. Darold Batzer and Andrew Baldwin have assembled an impressive group of regional wetland scientists who have produced a virtual encyclopedia to the continent's wetlands. Reading the book is like a road trip across the Americas with guided tours of major wetland types by local experts. Your first stop will be to coastal wetlands with eight chapters covering tidal wetlands along the Atlantic Gulf and Pacific coasts. Then you'll travel inland where you can visit any or all of 18 types ranging from bottomland swamps of the Southeast to pothole marshes of the Northern Prairies to montane wetlands of the Rockies to tropical swamps of Central America and desert springs wetlands. All in one book. I'm impressed. Every wetlander should add this book to her or his swampland library. Ralph Tiner, University of Massachusetts, Amherst.
