Empathy and the Practice of Medicine Howard Marget Spiro, Mary G. McCrea Curnen, Enid Peschel, Deborah St. James, 1993-01-01 The book which includes essays by physicians philosophers and a nurse is divided into three parts one deals with how empathy is weakened or lost during the course of medical education and suggests how to remedy this another describes the historical and philosophical origins of empathy and provides arguments for and against it and a third section offers compelling accounts of how physicians empathy for their patients has affected their own lives and the lives of those in their care We hear for example from a physician working in a hospice who relates the ways that the staff try to listen and respond to the needs of the dying a scientist who interviews candidates for medical school and tells how qualities of empathy are undervalued by selection committees a nurse who considers what nursing can teach physicians about empathy another physician who ponders whether the desire to be empathic can hinder the detachment necessary for objective care and several contributors who show how literature and art can help physicians to develop empathy
