Forging Connections in Early Mathematics Teaching and Learning Virginia Kinnear,Mun Yee Lai,Tracey Muir,2017-12-12 This edited book promotes thinking dialogue research and theorisation on multiple ways of making connections in mathematics teaching and learning in early childhood education The book addresses some key challenges in research policy and practice in early childhood mathematics education It examines diverse ways for learning

experiences to connect young children to mathematics and the importance of forging connections between mathematics and young children's lives as key elements in their engagement with mathematics. Each chapter provides research or theoretical provocations and pedagogical implications for connecting children's lived experiences and ways of learning in mathematics teaching. The chapters are drawn from a range of international authors who raise important ideas within the overall context of current research and consider the theoretical and practical implications of their research. As such, the book advances current thinking on mathematics teaching and learning for children in the early years from birth to eight years with an emphasis on children aged birth to 5 years. It considers the purpose and value in connecting mathematics teaching and learning to children's lives and provides provocations for both educators and researchers on the many under-researched and under-represented aspects of early years mathematics teaching and learning.

Big Math Activities for Young Children for Preschool, Kindergarten, and Primary Children James L. Overholt, Jackie White-Holtz, Sydney S. Dickson, 1998. PERFECT FOR EARLY CHILDHOOD EDUCATORS CARE GIVERS AND PARENTS ALIKE. This reality-based book provides a wide selection of activities and investigations for young children. Multi-level activities introduce increasingly advanced skills for preschool through third grade and have been designed to promote mathematical reasoning, communication, and problem-solving skills that excite young learners.

Learning and Teaching Early Math Douglas H. Clements, Julie Sarama, 2020-12-29. The third edition of this significant and groundbreaking book summarizes current research into how young children learn mathematics and how best to develop foundational knowledge to realize more effective teaching. Using straightforward practical language, early math experts Douglas Clements and Julie Sarama show how learning trajectories help teachers understand children's level of mathematical understanding and lead to better teaching. By focusing on the inherent delight and curiosity behind young children's mathematical reasoning, learning trajectories ultimately make teaching more joyous, helping teachers understand the varying levels of knowledge exhibited by individual students; it allows them to better meet the learning needs of all children. This thoroughly revised and contemporary third edition of *Learning and Teaching Early Math* remains the definitive research-based resource to help teachers understand the learning trajectories of early mathematics and become confident, credible professionals. The new edition draws on numerous new research studies, offers expanded international examples, and includes updated illustrations throughout. This new edition is closely linked with *Learning and Teaching with Learning Trajectories LT 2*, an open access web-based tool for early childhood educators to learn about how children think and learn about mathematics. Head to LearningTrajectories.org for ongoing updates, interactive games, and practical tools that support classroom learning.
