*Mathematical Statistics and Probability Theory* Madan L. Puri, P. Révész, Wolfgang Wertz, P. Bauer, F. Konecny, 1987-09-30

The past several years have seen the creation and extension of a very conclusive theory of statistics and probability. Many of the research workers who have been concerned with both probability and statistics felt the need for meetings that provide an opportunity for personal contacts among scholars whose fields of specialization cover broad spectra in both statistics and probability to discuss major open problems and new solutions and to provide encouragement for further research through the lectures of carefully selected scholars moreover to introduce to younger colleagues the latest research techniques and thus to stimulate their interest in research. To meet these goals the series of Pannonian Symposia on Mathematical Statistics was organized beginning in the year 1979 the first second and fourth one in Bad Tatzmannsdorf Burgenland Austria the third and fifth in Visegrad Hungary. The Sixth Pannonian Symposium was held in Bad Tatzmannsdorf again in the time between 14 and 20 September 1986 under the auspices of Dr Heinz FISCHER Federal Minister of Science and Research Theodor KERY President of the State Government of Burgenland Dr Franz SAUERZOPF Vice President of the State Government of Burgenland and Dr Josef SCHMIDL President of the Austrian Statistical Central Office. The members of the Honorary Committee were Pal ERDOS, Władysław ORLICZ, Pal REVEŠZ, Leopold SCHMETTERER and Istvan VINCZE. Those of the Organizing Committee were Wilfried GROSSMANN University of Vienna, Franz KONECNY University of Agriculture of Vienna and as the chairman Wolfgang WERTZ Technical University of Vienna.
