Rational Numbers Thomas P. Carpenter, Elizabeth Fennema, Thomas A. Romberg, 2012-10-12 Until recently there had been relatively little integration of programs of research on teaching learning curriculum and assessment However in the last few years it has become increasingly apparent that a more unified program of research is needed to acquire an understanding of teaching and learning in schools that will inform curriculum development and assessment The chapters in this volume represent a first step toward an integration of research paradigms in one clearly specified mathematical domain Integrating a number of different research perspectives is a complex task and ways must be found to reduce the complexity without sacrificing the integration The research discussed in this

volume is tied together because it deals with a common content strand During the last ten years specific content domains have served as focal points for research on the development of mathematical concepts in children The areas of addition and subtraction algebra rational numbers and geometry are notable examples Whether a similar organizational structure will prevail for programs of research that integrate the study of teaching learning curriculum and assessment is an open question The perspectives presented in this volume illustrate the potential for adopting this perspective

**The Science Teaching Efficacy Belief Instruments (STEBI A and B)** James Deehan, 2016-07-28 The purpose of this Springer Brief is to provide a comprehensive review of both the STEBI methods and findings through the use of a clearly defined analytic framework A systematic review of literature yielded 107 STEBI A research items and 140 STEBI B research items The STEBI instruments have been used in a wide range of qualitative cross sectional longitudinal and experimental designs Analysis of the findings of the papers reveals that in service and pre service programs that use innovative practices such as cooperative learning inquiry based investigation and nature of science instruction can produce positive growth in participants science teaching efficacy beliefs The personal science teaching efficacy beliefs of pre service and in service teachers showed greater mean scores and higher growth than their outcome expectancies Implications are discussed
