What do paint cans have to do with math?

Paint cans come in many different sizes, but they are all shaped like cylinders. To find the volume V of a paint can, you can use the formula $V = \pi r^2 h$, where r is the radius of the lid and h is the height of the can. A different formula can be used to find the surface area of a paint can.

You will solve problems involving volumes and surface areas of cylinders in Lessons 12-3 and 12-5.
