Computing Skills for Economists Guy Judge, 2000-06-08 Today's students are expected to use computers and familiarize themselves with wordprocessing and spreadsheet packages. They are also expected to be able to use the Internet. This volume adopts a practical approach in teaching the subject with emphasis on the software used by economists.

Mathematics for Economics and Business Ian Jacques, 2006 clear logical patient style which takes the student seriously. John Spencer formerly of Queen's University Belfast. This market leading text is highly regarded by lecturers and students alike and has been praised for its informal friendly style which helps students to understand and even enjoy their studies of mathematics. Assuming little prior knowledge of the subject, *Mathematics for Economics and Business* promotes self study encouraging students to read and understand topics that can at first seem daunting. This text is suitable for undergraduate economics, business and accountancy students taking introductory level maths courses.

Key Features Includes numerous applications and practice problems which help students appreciate maths as a tool used to analyse real economic and business problems. Solutions to all problems are included in the book. Topics are divided into one or two hour sessions which allow students to work at a realistic pace. Techniques needed to understand more advanced mathematics are carefully developed. Offers an excellent introduction to Excel and Maple. New to this edition: Brand new companion website containing additional material for both students and lecturers. New appendices on Implicit Differentiation and Hessian matrices for more advanced courses.

Ian Jacques was formerly a senior lecturer in the School of Mathematical and Information Sciences at Coventry University and has considerable experience of teaching mathematical methods to students studying economics, business and accountancy.
