Matrix And Philosophy Welcome To The Desert Of The Real:

The Matrix and Philosophy William Irwin, 2002 Presents essays exploring the philosophical themes of the motion picture The Matrix which portrays a false world created from nothing but perceptions **The Matrix and Philosophy** William Irwin, 2003 The Matrix in Theory , 2016-08-01 The Matrix trilogy continues to split opinions widely polarising the downright dismissive and the wildly enthusiastic Nevertheless it has been fully embraced as a rich source of theoretical and cultural references The contributions in this volume probe the effects the Matrix trilogy continues to provoke and evaluate how or to what extent they coincide with certain developments within critical and cultural theory Is the enthusiastic philosophising and theorising spurred by the Matrix a sign of the desperate state theory is in in the sense of see how low theory or post theory has sunk Or could the Matrix be one of the master texts for something like a renewal for theory as now being mainly concerned with new and changing relations between science technology posthumanist culture art politics ethics and the media The present volume is unashamedly but not dogmatically theoretical even though there is not much agreement about what kind of theory is best suited to confront post theoretical times But it is probably fair to say that there is agreement about one thing namely that if theory appears to be like the Matrix today it does so because the culture around it and which made it itself seems to be captured in some kind of Matrix The only way out of this is through more and renewed refreshed theorising not less **Handbook of Hyper-real Religions** Adam Possamai, 2012-03-28 Hyper real religions are innovative religions and spirituality that mix elements of religious tradition with popular culture Through various case studies this book studies the on and off line religious spiritual consumption of these narratives through a social scientific approach

The Matrix Joshua Clover, 2021-03-25 The Matrix 1999 directed by the Wachowski sisters and produced by Joel Silver was a true end of the millennium movie a statement of the American zeitgeist and as the original film in a blockbusting franchise a prognosis for the future of big budget Hollywood film making Starring Keanu Reeves as Neo a computer programmer transformed into a messianic freedom fighter The Matrix blends science fiction with conspiracy thriller conventions and outlandish martial arts created with groundbreaking digital techniques A box office triumph the film was no populist confection its blatant allusions to highbrow contemporary philosophy added to its appeal as a mystery to be decoded In this compelling study Joshua Clover undertakes the task of decoding the film Examining The Matrix's digital effects and how they were achieved he shows how the film represents a melding of cinema and video games the greatest commercial threat to have faced Hollywood since the advent of television and achieves a hybrid kind of immersive entertainment He also unpacks the movie's references to philosophy showing how The Matrix ultimately expresses the crisis American culture faced at the end of the 1990s **Reading the Fantastic Imagination** Dana Percec, 2014-06-26 The purpose of Reading the Fantastic Imagination The Avatars of a Literary Genre is the observation of the very hybridity of the fantastic genre as a typical postmodern form The volume continues an older project of the editor and a large number of the contributors that of

investigating the current status of several popular genres from historical fiction to romance The scrutiny continues in this third volume dedicated to the fantastic imagination and the plethora of themes moods media and formats deriving from it FanLit is surely trendy even if it is not highbrow despite its noble ancestry This apparent paradox characterizes many of the literary genres en vogue today from historical fiction to romance This very contradiction forms part of the basis for this book After the success of the previous book in the series dedicated to a borderline literary genre Romance The History of a Genre was declared by Cambridge Scholars Publishing as the Critics Choice Book of the Month in January 2013 this collection of studies about the fantastic imagination takes a further step into completing a larger research project which seeks to investigate the varieties of popular fiction Although all contributors in the series teach canonical literary texts they did not hesitate to plunge into the opposite area of fictional work and moreover continued doing so even though such a project caused the raise of a few high brows Percec 2012 232 as argued in the Endnote of Romance The History of a Genre
