New Psychology Of Language Cognitive And Functional Approaches To Language Structure:

The New Psychology of Language Michael Tomasello, 2014-06-05 From the point of view of psychology and cognitive science much of modern linguistics is too formal and mathematical to be of much use The New Psychology of Language volumes broke new ground by introducing functional and cognitive approaches to language structure in terms already familiar to psychologists thus defining the next era in the scientific study of language The Classic Edition volumes re introduce some of the most important cognitive and functional linguists working in the field They include a new introduction by Michael Tomasello in which he reviews what has changed since the volumes first published and highlights the fundamental insights of the original authors The New Psychology of Language volumes are a must read for anyone interested in understanding how cognitive and functional linguistics has become the thriving perspective on the scientific study of language that it is today

Functional Approaches to Spanish Syntax J. Clements, J. Yoon, 2005-11-30 The first usage based approach of its kind this volume contains twelve studies on key issues in Spanish syntax word order arguments grammatical relation marking inalienable possession ser and estar adjective placement small clauses and causatives The studies are approached within a broad functionalist perspective The studies strengthen the view that components of grammar intricately interact and that a usage based approach to analyzing them offers new and insightful perspectives on some stubborn problems

Educating for Advanced Foreign Language Capacities Heidi Byrnes, Heather D. Weger, Katherine A. Sprang, 2006-10-06 Advanced language learning has only recently begun to capture the interest and attention of applied linguists and professionals in language education in the United States In this breakthrough volume experts in the field lay the groundwork for approaching the increasingly important role of advanced language learning in the larger context of multilingual societies globalization and security This volume presents both general and theoretical insights and language specific considerations in college

classrooms spanning a range of languages from the commonly taught languages of English French and German to the less commonly taught Farsi Korean Norwegian and Russian Among theoretical frameworks likely to be conducive to imagining and fostering instructed advancedness in a second language this volume highlights a cognitive semantic approach The theoretical and data based findings make clear that advanced learners in particular are characterized by the capacity to make situated choices from across the entire language system from vocabulary and grammar to discourse features which suggests the need for a text oriented meaning driven approach to language teaching learning and research This volume also considers whether and how information structuring in second language composition reveals first language preferences of grammaticized concepts Other topics include curricular and instructional approaches to narrativity vocabulary expansion the demands on instructed programs for efficiency and effectiveness in order to assure advanced levels and learners ability to function in professional contexts with their diverse oral and written genre requirements Finally the volume probes the role and nature of assessment as a measurement tool for both researching and assessing advanced language learning and as an essential component of improving programs

Proceedings of the Twentieth Annual Conference of the Cognitive Science Society Morton Ann Gernsbacher, Sharon J. Derry, 2022-05-16 This volume features the complete text of the material presented at the Twentieth Annual Conference of the Cognitive Science Society As in previous years the symposium included an interesting mixture of papers on many topics from researchers with diverse backgrounds and different goals presenting a multifaceted view of cognitive science This volume contains papers posters and summaries of symposia presented at the leading conference that brings cognitive scientists together to discuss issues of theoretical and applied concern Submitted presentations are represented in these proceedings as long papers those presented as spoken presentations and full posters at the conference and short papers those presented as abstract posters by members of the Cognitive Science Society

The Handbook of Second Language Acquisition Catherine J. Doughty, Michael H. Long, 2008-04-15 The Handbook of Second Language Acquisition presents an integrated discussion of key and sometimes controversial issues in second language acquisition research Discusses the biological and cognitive underpinnings of SLA mechanisms processes and constraints on SLA the level of ultimate attainment research methods and the status of SLA as a cognitive science Includes contributions from twenty seven of the world s leading scholars Provides an invaluable resource for all students and scholars of human cognition including those in linguistics psychology applied linguistics ESL foreign languages and cognitive science

Theory and Practice in Functional-Cognitive Space María de los Ángeles Gómez González, Francisco José Ruiz de Mendoza Ibáñez, Francisco González-García, Angela Downing, 2014-07-22 The differences among functionalist cognitivist and or constructionist models are generally taken to be not absolute but rather a matter of emphasis and degree with an increasing permeability between paradigms arising from cross fertilizing influences This book further explores this burgeoning area of research through the notion of functional cognitive space namely the topography of

the space occupied by functional cognitivist and or constructionist models against the background of formalist approaches in general and of Chomsky's Minimalism in particular. Specifically the twelve contributions in the present volume update the reader on recent developments in functionalism. Systemic Functional Grammar, Functional Discourse Grammar and Role and Reference Grammar and cognitivism. Word Grammar, Cognitive Construction Grammar and the Lexical Constructional Model. Plotting cognitive space proves particularly adequate for situating the six models represented in this volume not only in relation to each other but also potentially with respect to a wide spectrum of functionalist cognitivist and or constructionist models.

(Non)referentiality in Conversation Michael C. Ewing, Ritva Laury, 2024-08-01. Although there is a large literature on referentiality going back to at least the nineteenth and early twentieth century much of this early work is based on constructed data and most of it is on English. The chapters in this volume contribute to a growing body of work that examines referentiality through naturalistic data in context. Taking an interactional approach to non referentiality contributors to this volume ask how participants talk in real time about persons and things as individuals or as categories and what distinguishes referential from nonreferential, specific from nonspecific and generic from nongeneric. Crucially we ask whether these distinctions even matter to participants in conversation and if they do what the evidence for that would be. Contributors investigate these issues using data from conversational interaction in a variety of social contexts including between close friends and family to more casual acquaintances in service encounters and between adults and children and in a range of languages: English, Finnish, French, Indonesian, Japanese and Mandarin. Collectively the chapters develop insights showing that reference is often fluid, dynamic and indeterminate, that referential indeterminacy is typically unproblematic for participants that shifts in referentiality tend to be tied to specific social goals and that reference and referentiality emerge dialogically and interactionally.

Perspectives on Arabic Linguistics XXXIII Abdel-Khalig Ali, Atiqa Hachimi, 2022-12-15. This volume features eight peer reviewed chapters based on papers presented at the 33rd Annual Symposium on Arabic Linguistics held at the University of Toronto in 2019. The chapters are divided into four sections: sociolinguistics, phonetics and phonology, syntax and first language acquisition. They present research on relatively well studied Arabic varieties such as the Moroccan, Jordanian and Emirati varieties as well as understudied varieties such as the Palestinian dialects of Gaza and Jaffa and the Saudi dialects of Al Ahsa, Ha'il and Faifi. The chapters address linguistic phenomena that range from language variation and change, the phonemic status and feature composition of rhotics and the realization patterns of emphatic fricatives to the grammaticalization of aspectual markers, the syntactic and pragmatic aspects of post-wh questions and the acquisition trajectory of the definite article. The volume makes valuable descriptive and theoretical contributions to Arabic linguistics.

Decolonizing Foreign Language Education Donaldo Macedo, 2019-01-10. Decolonizing Foreign Language Education interrogates current foreign language and second language education approaches that prioritize white western thought. Edited by acclaimed critical theorist and linguist Donaldo Macedo, this volume includes cutting edge work by a select

group of critical language scholars working to rigorously challenge the marginalization of foreign language education and the displacement of indigenous and non standard language varieties through the reification of colonial languages Each chapter confronts the hold of colonialism and imperialism that inform and shape the relationship between foreign language education and literary studies by asserting that a critical approach to applied linguistics is just as important a tool for FL ESL EFL educators as literature or linguistic theory

A Cognitive-Functional Approach to Nominalization in English Liesbet Heyvaert, 2015-06-03 The book presents a systematic theoretical account of the fundamental constructional mechanisms that underlie deverbal nominalization in general and it makes an original descriptive contribution by discussing a number of nominalization systems in detail The main theoretical motif is that nominalization strongly calls for a functional rather than purely structural approach The book goes more deeply into a number of functional constructs needed to model nominalization drawn from Cognitive Grammar and Systemic Functional Grammar and it elaborates on the internal functional organization of nominal and clausal structure e g the notions of type specification instantiation and grounding Langacker 1991 are discussed in detail and shown to be crucial for the analysis of deverbal nominalization It is argued that deverbal nominalizations are basically re classifications of verbal predicates into nominal constructions This re classification either applies at word rank or it involves the rank shift Halliday 1966 of a clause like unit with its internal structure preserved e g signing the contract quickly The re classified unit then adopts a specific nominal strategy with some form of nominal determination and quantification e g her signing the contract quickly The descriptive part of the book zooms in on nominalizations that are derived at word rank deverbal er nominals and on nominalizations applying to a temporal clausal heads e g John s playing the piano and finite clauses Of the gerundive and finite types of nominalization those that function in factive contexts are focused on In the analysis of deverbal er nominals a case is made for a subject analysis of the system and an elaborate discussion of the clausal middle construction e g this book reads easily which is argued to show systematic resemblances with non agentive er nominals is included Of the remaining nominalization types John s playing the piano playing the piano the fact that he plays the piano that he plays the piano especially the nominal behaviour e g proper name vs common noun strategy and in the case of gerundive nominals the various structural and semantic subtypes that can be distinguished among them are discussed

Investigations of the Syntax-semantics-pragmatics Interface Robert D. Van Valin, 2008 Investigations of the Syntax Semantics Pragmatics Interface presents on going research in Role and Reference Grammar in a number of critical areas of linguistic theory verb semantics and argument structure the nature of syntactic categories and syntactic representation prosody and syntax information structure and syntax and the syntax and semantics of complex sentences In each of these areas there are important results which not only advance the development of the theory but also contribute to the broader theoretical discussion In particular there are analyses of grammatical phenomena such as transitivity in Kabardian the verb less numeral quantifier construction in Japanese and an unusual kind of

complex sentence in Wari Chapakuran Brazil which not only illustrate the descriptive and explanatory power of the theory but also present interesting challenges to other approaches In addition there are papers looking at the implications and applications of Role and Reference Grammar for neurolinguistic research parsing and automated text analysis

Deconstructing Constructions Christopher S. Butler, Javier Martín Arista, 2009-01-14 This collection of papers brings together contributions from experts in functional linguistics and in Construction Grammar approaches with the aim of exploring the concept of construction from different angles and trying to arrive at a better understanding of what a construction is and what roles constructions play in the frameworks which can be located within a multidimensional functional cognitive space At the same time the volume has a historical dimension for instance in plotting the developments which led to recent models The book is organised in three sections the first deals with particular theoretical issues the second is devoted to the recent Lexical Constructional Model and the third presents a number of analyses of specific constructions The volume thus makes an important contribution to the ongoing debate about the relationship between functionalist and constructionist models

Discourse Studies Teun A Van Dijk, 2011-03-11 A landmark in the oeuvre of one of the founding fathers of discourse analysis Van Dijk has managed to edit a volume of lasting significance and some of the chapters in this book belong to the most widely read in the field In its totality Discourse Studies offers us a 360 degree tour of the field Nothing in this volume is dated everything remains mandatory reading for every student and advanced practitioner Jan Blommaert Tilburg University This very welcome updated second edition will allow Teun van Dijk's very popular Discourse Studies to consolidate its already strong and central position in the area Featuring chapters written by so many of the leading scholars it will continue to be a stimulating and wide ranging introduction to the discipline of discourse studies for new generations of students Malcolm Coulthard University of Birmingham This book is the largest most complete most diverse and only multidisciplinary introduction to the field A combined Second Edition of two seminal texts in the field the 1997 titles *Discourse as Social Interaction* and *Discourse as Structure and Process* this essential handbook Is fully updated from start to finish to cover contemporary debates and research literature Covers everything from grammar narrative argumentation cognition and pragmatics to social political and critical approaches Adds two new chapters on ideology and identity Puts the student at the centre offering brand new features such as worked examples sample analyses and recommended further reading Written and edited by world class scholars in their fields it is the essential one stop companion for any student of discourse analysis and discourse studies

The Diachronic Typology of Non-Canonical Subjects Ilja A. Serzant, Leonid Kulikov, 2013-11-15 This volume is an important contribution to the diachrony of non canonical subjects in a typological perspective The questions addressed concern the internal mechanisms and triggers for various changes that non canonical subjects undergo ranging from semantic motivations to purely structural explanations The discussion encompasses the whole life cycle of non canonical subjects from their emergence out of non subject

arguments to their expansion demise or canonicization focusing primarily on syntactic changes and changes in case marking. The volume offers a number of different case studies comprising such languages as Italian Spanish Old Norse and Russian as well as languages less studied in this context such as Latin Classical Armenian Baltic languages and some East Caucasian languages. Typological generalizations in the form of recurrent developmental paths are offered on the basis of data presented in this volume and in the literature.

The ^AOxford Handbook of Cognitive Linguistics Dirk Geeraerts, Hubert Cuyckens, 2010-06-09 The Oxford Handbook of Cognitive Linguistics presents a comprehensive overview of the main theoretical concepts and descriptive theoretical models of Cognitive Linguistics and covers its various subfields theoretical as well as applied.

A Companion to Chomsky Nicholas Allott, Terje Lohndal, Georges Rey, 2021-04-27 A COMPANION TO CHOMSKY. Widely considered to be one of the most important public intellectuals of our time Noam Chomsky has revolutionized modern linguistics. His thought has had a profound impact upon the philosophy of language mind and science as well as the interdisciplinary field of cognitive science which his work helped to establish. Now in this new Companion dedicated to his substantial body of work and the range of its influence an international assembly of prominent linguists philosophers and cognitive scientists reflect upon the interdisciplinary reach of Chomsky's intellectual contributions. Balancing theoretical rigor with accessibility to the non specialist the Companion is organized into eight sections including the historical development of Chomsky's theories and the current state of the art comparison with rival usage based approaches and the relation of his generative approach to work on linguistic processing acquisition semantics pragmatics and philosophy of language. Later chapters address Chomsky's rationalist critique of behaviorism and related empiricist approaches to psychology as well as his insistence upon a Galilean methodology in cognitive science. Following a brief discussion of the relation of his work in linguistics to his work on political issues the book concludes with an essay written by Chomsky himself reflecting on the history and character of his work in his own words. A significant contribution to the study of Chomsky's thought. A Companion to Chomsky is an indispensable resource for philosophers linguists psychologists advanced undergraduate and graduate students and general readers with interest in Noam Chomsky's intellectual legacy as one of the great thinkers of the twentieth century.

Morphosyntactic Development in Child Emirati Arabic Dimitrios Ntelitheos, 2024-09-23 This book investigates selected aspects of the grammatical development of Emirati Arabic the variety of Gulf Arabic spoken in the United Arab Emirates and closely related to the varieties spoken in the rest of the Gulf States. While the acquisition of Arabic as a second language has been widely studied first language acquisition of different Arabic dialects has received much less attention. Ntelitheos addresses this disparity by presenting a number of systematic studies on the acquisition of Emirati Arabic grammar based on a two year longitudinal corpus of six children. He discusses the acquisition of the nominal domain including definiteness and possession the acquisition of verbal functional structure and agreement and the acquisition of word order and negation in the syntactic domain. In addition he defines several

developmental stages for Emirati Arabic based on established diagnostic tests The discussion is framed within a general survey of the relevant literature in Arabic acquisition studies and combines new empirical data with rigorous discussion of several long standing theoretical problems in the broader field of child language development *The Acquisition and Use of Yes-no Questions in English* Ursula Kania, 2016-08-15 This monograph offers a comprehensive account of the L1 acquisition and use of yes no questions in English from a usage based construction grammar perspective On the basis of the BNC and a high density longitudinal CHILDES corpus the book explores two issues which have largely been neglected in previous research 1 the prevalence of non canonical questions such as elliptical and declarative questions in adult to adult as well as child directed speech and the L1 acquisition of these structures 2 The discourse functional properties of both canonical and non canonical yes no questions especially with regard to their influence on the acquisition process
