ethos in a way that reflects the persuasive efforts of women who claimed the authority and expertise of the physician with great difficulty. Descriptions of ethos have traditionally been based on masculine communication and behavior leaving women's rhetorical situations largely unaccounted for. Skinner's feminist model considers the constraints imposed by material resources and social position, the reciprocity between speaker and audience, the effect of one rhetor's choices on the options available to others, the connections between ethos and genre, the potential for ethos to be developed and used collectively by similarly situated people, and the role ethos plays in promoting social change. Extending recent theorizations of ethos as a spatial, ecological, and potentially communal concept, Skinner identifies nineteenth-century women physicians' rhetorical strategies and outlines a feminist model of ethos that gives readers a more nuanced understanding of how this mode of persuasion operates for all speakers and writers.

The Invention of Heterosexuality Jonathan Ned Katz, 2024-05-31
Heterosexuality assumed to denote a universal sexual and cultural norm has been largely exempt from critical scrutiny. In this boldly original work, Jonathan Ned Katz challenges the common notion that the distinction between heterosexuality and homosexuality has been a timeless one. Building on the history of medical terminology, he reveals that as late as 1923 the term heterosexuality referred to a morbid sexual passion and that its current usage emerged to legitimate men and women having sex for pleasure. Drawing on the works of Sigmund Freud, James Baldwin, Betty Friedan, and Michel Foucault, *The Invention of Heterosexuality* considers the effects of heterosexuality's recently forged primacy on both scientific literature and popular culture. Lively and provocative. *Carol Tavis*, *New York Times Book Review*. A valuable primer misses no significant twists in sexual politics. *Gary Indiana Village Voice Literary Supplement*. One of the most important, if not outright subversive, works to emerge from gay and lesbian studies in years. *Mark Thompson*, *The Advocate*.

The Columbia Guide to American Women in the Nineteenth Century Catherine Clinton, Christine A. Lunardini, 2000
A convenient handbook of dates, names, terms, and resources as well as a highly readable overview of the pivotal role of women in a century of profound political and social change. The authors emphasize areas in which scholars have identified important changes, such as suffrage and reform; topics in which researchers are now making great strides, such as racial, ethnic, religious, and regional diversity; and innovative and relatively recent explorations, for example, work on female sexuality.

The Insanity File Mark E. Neely, Jr., Gerald McMurtry, 1993-03-31
In 1875 Robert Todd Lincoln caused his mother Mary Todd Lincoln to be committed to an insane asylum. Based on newly discovered manuscript materials, this book seeks to explain how and why. In these documents, marked by Robert Todd Lincoln as the MTL Insanity File, exists the only definitive record of the tragic story of Mary Todd Lincoln's insanity trial. The book that results from these letters and documents addresses several areas of controversy in the life of the widow of Abraham Lincoln: the extent of her illness, the fairness of her trial, and the motives of those who had her committed for treatment. Related issues include the status of women under the law as well as the legal and medical treatment of insanity. Speculating on the reasons for her mental condition, the authors note that Mrs. Lincoln suffered

an extraordinary amount of tragedy in a relatively few years Three of her four sons died very young and Abraham Lincoln was assassinated After the death of her son Willie she maintained a darkly rigorous mourning for nearly three years prompting the president to warn her that excessive woe might force him to send her to that large white house on the hill yonder the government hospital for the insane Mrs Lincoln also suffered anxiety about money charting an exceptionally erratic financial course She had spent lavishly during her husband s presidency and at his death found herself deeply in debt She had purchased trunkfuls of drapes to hang over phantom windows 84 pairs of kid gloves in less than a month and 3 200 worth of jewelry in the three months preceding Lincoln s assassination She followed the same erratic course for the rest of her life creating in herself a tremendous anxiety She occasionally feared that people were trying to kill her and in 1873 she told her doctor that an Indian spirit was removing wires from her eyes and bones from her cheeks Her son assembled an army of lawyers and medical experts who would swear in court that Mrs Lincoln was insane The jury found her insane and in need of treatment in an asylum Whether the verdict was correct or not the trial made Mary Lincoln desperate Within hours of the verdict she would attempt suicide In a few months she would contemplate murder Since then every aspect of the trial has been criticized from the defense attorney to the laws in force at the time Neely and McMurtry deal with the trial the commitment of Mary Todd Lincoln her release and her second trial An appendix features letters and fragments by Mrs Lincoln from the Insanity File The book is illustrated by 25 photographs

New Knowledge in the Biomedical Sciences W.B. Bondeson, H. Tristram Engelhardt Jr., S.F. Spicker, J.M. White, 2012-12-06 The spectacular development of medical knowledge over the last two centuries has brought intrusive advances in the capabilities of medical technology These advances have been remarkable over the last century but especially over the last few decades culminating in such high technology interventions as heart transplants and renal dialysis These increases in medical powers have attracted societal interest in acquiring more such knowledge They have also spawned concerns regarding the use of human subjects in research and regarding the byproducts of basic research as in the recent recombinant DNA debate As a consequence of the development of new biomedical knowledge physicians and biomedical scientists have been placed in positions of new power and responsibility The emergence of this group of powerful and knowledgeable experts has occasioned debates regarding the accountability of physicians and biomedical scientists But beyond that the very investment of resources in the acquisition of new knowledge

has been questioned Societies must decide whether finite resources would not be better invested at this juncture or in general in the alleviation of the problems of hunger or in raising general health standards through interventions which are less dependent on the intensive use of high technology To put issues in this fashion touches on philosophical notions concerning the claims of distributive justice and the ownership of biomedical knowledge
