Melton, Asher Ben-Arieh, Judith Cashmore, Gail S. Goodman, Natalie K. Worley, 2013-12-18 It is refreshing to see a book such as this which is both broad in its conceptualization of the field of child research and deep in its focus. The volume's editors are paragons of awareness when it comes to the need for interdisciplinary research and theory to illuminate the lives and experience of children. James Garbarino, Loyola University Chicago. Covers a satisfying and unprecedentedly wide range of research relating to childhood. The contributors include many eminent international scholars of childhood, making the book a valuable resource for child researchers. Child advocates will also find the book to be invaluable in their efforts to improve children's well-being and to change policies and practices for the better. Anne Smith, University of Otago. A really scintillating collection that will provide a lasting perspective on child studies, stimulating and comprehensive. Jonathan Bradshaw, University of York. In keeping with global changes in children's social and legal status, this Handbook includes examination of children as family members, friends, learners, consumers, people of faith, and participants in law and politics. The contributors also discuss the methodological and ethical requirements for research that occurs in natural settings and that enables children themselves to describe their perspective. The book is divided into three parts: Part I, Setting Specific Issues in Child Research; Part II, Population Specific Issues in Child Research; Part III, Methods in Research on Children and Childhood.

**Representing Youth** Amy L. Best, 2007 How should a six-year-old be approached for an interview? What questions and topics are appropriate for 12-year-olds? Do parents need to give their approval for all studies? This work features essays on the subject of youth that address these concerns, providing scholars with practical answers to their many methodological concerns. **Youth, Technology, Governance, Experience** Liam Grealy, Catherine Driscoll, Anna

Hickey-Moody, 2018-06-14 How do adults understand youth? How do their conceptions inform interventions into young lives or involve young people's experiences? This volume tackles these questions by exploring adults' ideas about youth. Specifically, Youth Technology Governance Experience examines the four titular concepts and their implications for a range of relationships between youth and adults. Utilising interdisciplinary methods, the contributing authors deliver a broad range of analyses of young people differentiated by gender, class, race, and geography across an array of contexts including within the home, in media representations, through government bureaucracies, and in everyday life. Youth Technology Governance Experience also interrogates the meaning of technology and governance for youth studies, considering a range of ways they interact, including through social media, technologies of regulation, and educational tools. It will appeal to students and academic researchers interested in fields such as youth studies, cultural studies, sociology, and education. Ethical Research with Children Sarah Richards, Jessica Clark, Allison Boggis, 2015-10-26 An increasing interest in children's lives has tested the ethical and practical limits of research. Rather than making tricky ethical decisions transparent, researchers tend to gloss over stories that do not fit with sanitized narratives. This book aims to fill this gap by making explicit the lived experiences of research with children. **Understanding Children as Consumers** David Marshall, 2010-04-19 What drives children as
