Reshaping European Gas and Electricity Industries Dominique Finon,Atle Midttun,2004-12-02 A unique and thorough investigation of the shift towards Europe wide energy regulation markets and business strategies and the extent to which energy systems have become more liberalised over this period Reshaping of European Gas and Electricity Industries analyses the key issues facing the European energy industry from a regulatory market and business perspective Current challenges within the field are also reviewed including competitive and environmental issues Liberalization Delivers timely insights into the changes facing the European energy industry in the face of deregulation Competition A direct look at business and marketing strategies in response to the influx of competition from across the globe Environment Provides powerful insights into the way environmentally based legislation has now become a key driver of the energy industry in Europe *Toward a Common European Union Energy Policy* V. Birchfield,J. Duffield,2011-07-18 Since the mid 2000s the European Union has made unprecedented strides toward the creation of a common energy policy This book takes stock of these developments evaluating how much progress has actually been made and what remains to be done what factors explain these recent advances and their limitations *The New Politics of Energy Security in the European Union and Beyond* Andrea Prontera,2017-05-18 Combining theoretical reflections and empirical insights from paradigmatic case studies in the area of external energy governance pipeline politics Liquefied Natural Gas development and offshore petroleum policy and politics this ground breaking study demonstrates that a distinctive and new politics of energy security is definitively emerging in the European Union Innovative not only in regard to the case studies presented which include the Caspian region the Baltic Meditterrean countries Central Asia and EU Russia relations but also in regard to the analytical framework adopted an International Political Economy approach informed by an historical institutional perspective the book challenges the common view of the de politicisation of energy security supported by the mainstream market approach and the power politics and zero sum game view supported by the geopolitical perspective This book places the study of EU energy politics in the broader evolving context of global energy markets and explores the complex interactions between EU and national political dynamics and between energy security and environmental concerns at the local level **Handbook Of Energy Finance: Theories, Practices And Simulations** Stephane Goutte,Duc Khuong Nguyen,2020-01-30 Modeling the dynamics of energy markets has become a challenging task The intensification of their financialization since 2004 had made them more complex but also more integrated with other tradable asset classes More importantly their large and frequent fluctuations in terms of both prices and volatility particularly in the aftermath of the global financial crisis 2008 2009 posit difficulties for modeling and forecasting energy price behavior and are primary sources of concerns for macroeconomic stability and general economic performance This handbook aims to advance the debate on the theories and practices of quantitative energy finance while shedding light on innovative results and technical methods applied to energy markets Its primary focus

is on the recent development and applications of mathematical and quantitative approaches for a better understanding of the stochastic processes that drive energy market movements The handbook is designed for not only graduate students and researchers but also practitioners and policymakers

Investing in EU Energy Security Henrik Bjørnebye, 2010-01-01 La 4e de couverture indique Since the introduction a quarter century ago of market based investments in the production of electricity and other critical services our awareness of the underlying issues affecting the supply and consumption of energy has changed radically No longer can Europe or any region rely on over capacity of electricity generation and inexpensive primary energy fuels or disregard the signs of potentially catastrophic climate change The author of this timely and sharply focused book shows that in the light of our current knowledge ensuring new investments and the right investments in electricity generation constitutes an urgent energy policy challenge facing the EU over the coming decades He accordingly makes the case for a serious reconsideration of the market facilitation and market intervention rules under electricity market legislation in the EU In the first detailed legal analysis of the EU s internal electricity market framework for investments in electricity generation facilities from the perspective of security of supply this book cover such legal issues as the following in precise detail applicability of the Treaty on the Functioning of the European Union TFEU security of supply as a ground for exemption on the basis of public security justifications of public intervention the applicability of EU State aid provisions to investments in energy security requirements imposed by EU law on Member States for ensuring cost efficient investments in European supply security facilitation of renewable energy sources and cogeneration in the environmental interest the Court of Justice s approach to Member State interventions the Court s decisions on restrictions on free movement in the environmental interest Member States right to launch tendering procedures for new generation capacity Member States right to impose public service obligations in the general economic interest on certain undertakings and relationship between the provisions of the TFEU and those of the Euratom Treaty in relation to investments in nuclear power generation Throughout the study in addition to his analysis of the decisions of the Court of Justice and the Court of First Instance the author takes into account legal literature and Union reports preparatory works and working papers The book demonstrates convincingly that today s energy supply challenges must be based on a broader balancing of security competitiveness and sustainability interests It suggests that the internal electricity market provisions of the Electricity Directive and the Security of Electricity Supply Directive would benefit from focusing more intensely on requiring investments in technologies and primary energy sources that will help mitigate climate change and reduce European energy import dependency and less on the need for ensuring cost efficient investments through market based means Through its detailed analysis of EU law in an area of great significance to both market participants and the public sector Investing in EU Energy Security will be welcomed by legal advisors whether working for the EU electricity industry or public agencies responsible for implementation of internal electricity market measures as well as by academics in this hugely important field of current

research *Reshaping of European Electricity and Gas Industry* Dominique Finon,2004 **Handbook Utility**

Management Andreas Bausch,Burkhard Schwenker,2009-07-07 Along with the increasing deregulation of European utility markets the dynamics of and the competitive pressure in the utility industries have steadily increased over the last years These changes in the regulatory framework towards an integrated market environment have resulted in new challenges for the management of power and gas companies and in a substantial need for strategic reorientation In the context of these developments the Handbook Utility Management reflects current challenges in the utility industries and provides solutions from a managerial perspective The inclusion of latest insights from top managers renowned researchers professionals in utility related investment banking and consulting and professionals in public and supranational organizations on all value chain activities within the industry makes the Handbook an indispensable asset for both professionals and researchers

Im Hürdenlauf zur Energiewende Achim Brunnengräber,Dr.Maria Rosaria Di Nucci,2014-08-05 Der Begriff der Energiewende wird bei seinem Lauf um die Welt nicht bersetzt Er weist auf die Dringlichkeit der Umstellung der Energieversorgung bei Strom Wärme und Mobilität durch erneuerbare Energien hin Schneller als von vielen erwartet hat die Energiewende vor allem im Strombereich ein Ausbautempo erreicht mit dem viele nicht gerechnet hatten Sie ist allerdings keine freiwillige Maßnahme sondern wird durch die Krisenhaftigkeit von nicht nachhaltigen Produktions und Lebensweisen erzwungen Sie ist auch kein Selbstläufer Die vielfältigen neuen Initiativen Maßnahmen und Programme befinden sich im Wettbewerb mit einem alten fossilen und nuklearen Energiesystem Von den Hürden die in diesem Wettlauf bereits genommen wurden vom Tempo des Ausbaus von Innovationen sowie von den notwendigen Reformen und vielfältigen Herausforderungen der Energiewende handelt dieses Buch *Sustainable Systems and Energy Management at the Regional Level: Comparative Approaches* Tortora, Marco,2011-11-30 Conducting a systematic and comparative review of energy and environmental issues especially at the regional and national levels can improve communication among different disciplines and be helpful for managers politicians and stakeholders involved in energy and environmental systems Sustainable Systems and Energy Management at the Regional Level Comparative Approaches provides an interdisciplinary look at the possible relationships which exist between energy and the environment Relevant theoretical frameworks and the latest empirical research findings on the impacts of regulation policies market facilitation policies and communication models and policies are reviewed with the aim of improving understanding and strategy *Civil Society in the Age of Monitory Democracy* Lars Trägårdh,Nina Witoszek,Bron Taylor,2013-05-01 Since the emergence of the dissident parallel polis in Eastern Europe civil society has become a new superpower influencing democratic transformations human rights and international co operation co designing economic trends security and defense reshaping the information society and generating new ideas on the environment health and the good life This volume seeks to compare and reassess the role of civil society in the rich West the poorer South and the quickly expanding East in the context of the twenty first century s challenges It presents a novel perspective on civic

Erneuerbare Energien-Politik Bernd Hirschl, 2008-05-14 Bernd Hirschl analysiert in einer Multi Level Policy Analyse die deutsche Politik für erneuerbare Energien im Strommarkt. Er identifiziert die relevanten Akteure und Faktoren und erläutert die Bezüge zur Energie und Klimapolitik auf nationaler, europäischer und internationaler Ebene. Newhall Ranch Resource Management and Development Plan and Spineflower Conservation Plan, 2009. **Russland als globaler Wirtschaftsakteur: Handlungsressourcen und Strategien der Öl- und Gaskonzerne** Jonas Grätz, 2013-06-28 Erdöl, Erdgas und Kohle aus Russland sind heute fester Bestandteil der europäischen Energieversorgung. Zugleich polarisiert die Expansion russischer Öl- und Gaskonzerne. Einige Beobachter sehen in den Akteuren kommerzielle Spieler, die vorrangig wirtschaftliche Interessen verfolgen. Andere unterstellen, dass mit wirtschaftlicher Kontrolle und Verflechtung auch geopolitische Ziele verfolgt werden. Der fehlende Konsens ist dabei auch auf Begrifflichkeiten zurückzuführen, die einen Dialog beider Perspektiven erschweren. Die vorliegende Studie entwickelt eine Methodik, mit der sich sowohl die wirtschaftliche als auch die geopolitische Funktion der Konzerne analysieren lässt. Ihre Motivationen und Instrumente werden anhand von 40 Projekten in neun Ländern empirisch analysiert. Das Buch zeigt auf, wie Machtstruktur, Reformfähigkeit und das Investitionsverhalten von Unternehmen zusammenhängen. **Climate Change 2007 - Mitigation of Climate Change** Intergovernmental Panel on Climate Change, 2007-11-12. The Climate Change 2007 volumes of the Fourth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) provide the most comprehensive and balanced assessment of climate change available. This IPCC Working Group III volume provides a comprehensive state of the art and worldwide overview of scientific knowledge related to the mitigation of climate change. It includes a detailed assessment of costs and potentials of mitigation technologies and practices, implementation barriers and policy options for the sectors energy, supply, transport, buildings, industry, agriculture, forestry and waste management. It links sustainable development policies with climate change practices. This volume will again be the standard reference for all those concerned with climate change, including students and researchers, analysts and decision makers in governments and the private sector. A European Market for Electricity? Lars Bergman, Centre for Economic Policy Research (Great Britain), Studieförbundet Näringsliv och samhälle, 1999. The second in CEPR's annual Monitoring European Deregulation (MED) series, this report explores the economic and regulatory aspects of a single European market for electricity and provides a basis for policy choices both at national and EU levels. The report combines analyses of key issues in electricity market integration and liberalization with evaluations of practical experiences in selected European countries: France, Germany, Norway, Spain, Sweden and the UK. Key issues include to what extent competition in national electricity markets is a necessary requirement for the integration of these markets and the design of national electricity markets in which competition in generation and supply is allowed.
