R. Ramanathan, 2009-03 This research study seeks to understand the nature of organisational change with respect to offshore outsourcing of information technology services in a multinational pharmaceutical company and to examine the effectiveness of approaches used to manage this change so that lessons may be drawn from these experiences Despite the abundant literature on effective organisational change management the key factors that need to be managed properly at different stages of the offshore outsourcing process are not well understood The research adopts a processual view to paint a broad picture of the issues involved in these different stages A generic process model of change based on the review of the change literature was first developed to represent how change was intended to occur This model focuses on the following four stages in the change process context diagnosis and planning implementation and institutionalisation The research employs an interpretive case study approach and draws on fieldwork from three independent information systems departments cases of the company where offshore outsourcing programmes were

implemented Qualitative data from semi structured interviews direct observation and document analysis are analysed by applying the generic process model to produce a detailed account of the way in which change was managed in the case organisations The findings reveal that a combination of contextual factors both external and internal to the company influenced the adoption and use of offshore outsourcing in the case organisations Externally the economic forces were found to be the main catalyst for the change while internally the role of the executive leadership and the lack of internal resources further explain the motivations behind the adoption of offshore outsourcing The study illustrates that achieving successful outcomes from offshore outsourcing activities critically depends on the organisation adequately addressing a number of factors such as conveying a sense of urgency developing and communicating the vision identifying the benefits of change and how they will be delivered generating short term wins providing education and training developing a fit between the change and organisational culture etc throughout the change process The findings also highlight the effects of offshore outsourcing on the case organisations including change in job roles and responsibilities and organisational learning activities that enable corrective actions to improve change management efforts An important contribution of this research is the development of a model providing a more comprehensive understanding of the change process associated with the implementation of offshore IT outsourcing Recommendations for policy makers and change managers to improve change management practice based on the research findings as well as recommendations for further research form a significant part of the conclusions

So Much, So Fast, So Little Time Michael St. Clair, 2011-08-09 This book examines the extraordinary changes that technology brings and how these affect all of us and our families at home at school and at our work places with profound consequences for society Twenty first century technology opens up fabulous opportunities but also changes how we relate to each other and warps our sense of time reality duty and privacy Technologies and time saving devices make everything happen faster with the result that we feel busier than ever before

Free time seems in danger of extinction So Much So Fast So Little Time Coming to Terms with Rapid Change and Its Consequences provides fascinating insights about how our changing world is changing our families and our personal relationships how we travel behave as consumers and communicate and how we entertain ourselves and deal with our anxieties Written in a popular accessible style this book describes seven areas of significant societal change providing concrete examples and engaging stories to illustrate how drastically our right now mindset has shifted our perception and experience of the world In the last chapter the author makes some practical suggestions on how to take thoughtful action to respond to the onslaught of inevitable change

Nascent Entrepreneurship and Learning Mine Karataş-Özkan, Elizabeth Chell, 2010-01-01 This work by Karataş-Özkan and Chell provide fresh insights on entrepreneurial learning and the entrepreneurship process Employing a well informed social constructivist perspective it combines theory with a richly grounded empirical analysis at three distinct but inter related levels the micro the meso all set in the macro context of the enterprise culture A strength of the work is the multiple levels of analysis which sheds new light on entrepreneurial learning as part of the entrepreneurial process The result is a processual view that captures conceptualises and explains the transitive process of becoming an entrepreneur Alistair R Anderson The Robert Gordon University UK In this book Karataş-Özkan and Chell show great clarity in dealing with a range of complex issues They articulate these in a manner which makes them interesting and comprehensible and in a fashion which impressively interweaves theory practice and method Sarah L Jack Lancaster University UK This informative book examines the process of nascent entrepreneurship from a learning perspective It offers a multi layered framework of nascent entrepreneurship through an inter disciplinary approach and sound application of Bourdieu's conceptual tools and also by generating practical insights for nascent entrepreneurs enterprise educators and mentors Supported by an empirical investigation of two case studies the authors argue that it is not sufficient to study nascent entrepreneurship and concurrent process of entrepreneurial learning at just the individual entrepreneur or collective team or organisational level and examine the socio behavioural aspects of learning but that entrepreneurial learning should be understood by inter relating personal micro relational meso and macro contextual aspects of nascent entrepreneurship The comprehensive coverage of entrepreneurship theory and research will be of significant value for scholars researchers and students in the field

Philosophy of Complex Systems, 2011-05-23 The domain of nonlinear dynamical systems and its mathematical underpinnings has been developing exponentially for a century the last 35 years seeing an outpouring of new ideas and applications and a concomitant confluence with ideas of complex systems and their applications from irreversible thermodynamics A few examples are in meteorology ecological dynamics and social and economic dynamics These new ideas have profound implications for our understanding and practice in domains involving complexity predictability and determinism equilibrium control planning individuality responsibility and so on Our intention is to draw together in this volume we believe for the first time a comprehensive picture of the manifold philosophically

interesting impacts of recent developments in understanding nonlinear systems and the unique aspects of their complexity The book will focus specifically on the philosophical concepts principles judgments and problems distinctly raised by work in the domain of complex nonlinear dynamical systems especially in recent years Comprehensive coverage of all main theories in the philosophy of Complex Systems Clearly written expositions of fundamental ideas and concepts Definitive discussions by leading researchers in the field Summaries of leading edge research in related fields are also included Gratuity Richard Seltzer, Holona LeAnne Ochs, 2010-06-02 Gratuity is based on interviews with 425 people in more than 50 occupational categories The respondents from across the U S reflect the diversity of the population but have one thing in common they earn tips A tip is a price set almost entirely by a customer less connected to demand than to social code In the U S tipping remains one of our most controversial confusing and highly variable norms In their own words respondents present their perspectives regarding their compensation as well as what they like and dislike about work Understanding what people think about tipping and how tipped employees experience their work provides an understanding of tipping norms that has never been addressed The evidence in this study indicates that tips do not appear to increase in accordance with inequality and tips do not alleviate the discomfort of inequality from the perspective of the tipped employee when they are given to demonstrate status over another Tips may in some cases serve a redistributive function but they are not consistent with regard to social status The evidence in this study also indicates that tips are a weak signal of quality and are not likely to serve as an effective monitoring mechanism People appear to conform to tipping norms for social and emotional rather than strictly rational reasons Furthermore conformity to tipping norms is likewise inconsistent across work contexts One of the principal mechanisms for fostering conformity lies within the organizational hierarchy and management plays a critical role The definitive difference between those who like their job and those who do not is the experience with people particularly management Every person who interacts with the public encounters people who are rude or disrespectful The critical lesson for management is that the emotional costs of these interactions can be mitigated by managers who extend trust and support to employees The absence of trust in the workplace contributes to a work environment that impose
