 pollution reviews the available data in relation to contaminants of emerging concern CECs in the marine environment main
 sources transport pathways distribution in seawater and sediments bioaccumulation and biological effects Each chapter
 recaps the most relevant information about the main groups of CECs describing the particularities and specificities of each
 group and focusing on the most relevant individual contaminants CECs are not regulated substances and therefore not
 considered in national and international monitoring programs even though they may have a potential impact on the
 environment due to their continuous input relative persistence and or toxicity CECs are relevant not only in continental and
 coastal areas close to their main sources but also in the open sea because some of them are likely to be transported long
 distances through air deposition or absorbed into particulate material The persistence of many degradable substances in the
 marine environment increases when they are absorbed into particulate material sediments and or when they are subjected to
 anaerobic conditions that slow down the degradation kinetic of many contaminants Bioaccumulation of several CECs has
 been confirmed in different coastal organisms however in general the information available species and trophic levels
 considered is very limited because most studies are mainly focused on specific coastal areas This book offers useful
 information about not regulated contaminants that are not considered in international monitoring programs but have
 potential impacts in coastal and open sea areas Therefore reading the book will allow them to improve their view about the
 real impact of current use contaminants in the marine environment Presents a comprehensive view of the most relevant
 groups of CECs Includes an overview of each group of CECs including uses properties analysis distribution bioaccumulation
 and effects Provides information on all environmental compartments and marine areas coast continental shelf and open sea
