Reference in Empirical Science Jody Azzouni, 2000 Knowledge and Reference in Empirical Science is a fascinating study of the bounds between science and language in what sense and of what does science provide knowledge Is science an instrument only distantly related to what's real Can the language of science be used to adequately describe the truth In this book Jodi Azzouni investigates the technology of science the actual forging and exploiting of causal links between ourselves and what we endeavor to know and understand **Nuclear Energy** David Bodansky, 2007-06-25 This second edition

represents an extensive revision of the first edition though the motivation for the book and the intended audiences as described in the previous preface remain the same The overall length has been increased substantially with revised or expanded discussions of a number of topics including Yucca Mountain repository plans new reactor designs health effects of radiation costs of electricity and dangers from terrorism and weapons proliferation The overall status of nuclear power has changed rather little over the past eight years Nuclear reactor construction remains at a very low ebb in much of the world with the exception of Asia while nuclear power's share of the electricity supply continues to be about 75% in France and 20% in the United States However there is a sign of a heightened interest in considering possible nuclear growth In the late 1990s the U S Department of Energy began new programs to stimulate research and planning for future reactors and many candidate designs are now contending at least on paper to be the next generation leaders Outside the United States the commercial development of the Pebble Bed Modular Reactor is being pursued in South Africa a French German consortium has won an order from Finland for the long planned EPR European Pressurized Water Reactor and new reactors have been built or planned in

Asia In an unanticipated positive development for nuclear energy the capacity factor of U S reactors has increased dramatically in recent years and most operating reactors now appear headed for 20 year license renewals **Because Without Cause** Marc Lange,2017 Not all scientific explanations work by describing causal connections between events or the world s overall causal structure In addition mathematicians regard some proofs as explaining why the theorems being proved do in fact hold This book proposes new philosophical accounts of many kinds of non causal explanations in science and mathematics *The British National Bibliography* Arthur James Wells,2002 **Verzeichnis lieferbarer Bücher** ,2002
