Resource And Environmental Management In Canada Addressing Conflict And Uncertainty:

Resource and Environmental Management in Canada Bruce Mitchell, 2010 Bringing together contributions from over two dozen specialists in the field this new fourth edition explains how the management process works the variety of strategies used the various technical and non technical considerations that influence decisions and the tradeoffs that must be made to accommodate a broad range of legitimate societal interests As with previous editions the text is structured in three parts Emerging Concerns Enduring Concerns and Responses With updated coverage and seven new chapters on topics such as sustainability assessment governance for the environment and globalization *Resource and Environmental Management* fourth edition offers a fresh in depth approach to resource management reflective of today's environmental concerns *Canadian Natural Resource and Environmental Policy, 2nd ed.* Melody Hessing, Michael Howlett, Tracy Summerville, 2011-11-01 In this new and updated edition the authors once again examine policy making in one of the most significant areas of activity in the Canadian economy natural resources and the environment and discuss the evolution of resource policies from the early era of exploitation to the present era of resource and environmental management Using an integrated political economy and policy perspective the book provides an analytic framework from which the foundation of ideological perspectives administrative structures and substantive issues are explored Departing from traditional approaches that emphasize a single discipline or perspective it offers an interdisciplinary framework with which to think through ecological political economic and social issues It also provides a multi stage analysis of policy making from agenda setting through the evaluation process The integration of social science perspectives and the combination of theoretical and empirical work make this innovative book one of the most comprehensive analyses of Canadian natural resource and environmental policy to date Its illumination of the key elements of government policy making in this critical sector and its new outline of the evolution of the Kyoto Protocol makes it a useful textbook and resource for students of environmental and public policy policy makers and environmental organizations **Canadian Natural Resource and Environmental Policy, 2nd edition**, 2005 This expanded and updated edition of *Canadian Natural Resource and Environmental Policy* examines policy making in one of the most significant areas of activity in the Canadian economy natural resources and the environment It discusses the evolution of resource policies from the early era of exploitation to the present era of resource and environmental management including the Kyoto Protocol Using an integrated political economy and policy perspective the book provides an analytic framework through which ideological perspectives administrative structures and substantive issues are explored R sum de l diteur **Resource & Environmental Management** Bruce Mitchell, 2013-12-16 This book does an exceptional job in giving an understanding of change complexity uncertainty and conflict as well as their linkages including awareness of strategies methods and techniques to handle them relative to resource and environmental management The text enhances the reader's capacity to conduct practice and conduct research in resource and environmental management [Resource and Environmental](#)

Management Bruce Mitchell, 2019 In order to optimally manage the environment and natural resources it is vitally important to recognize that there is much more to consider than just the environment itself and the natural resources it provides A key consideration is also the interrelationship between natural ecosystems and human involvement and behavior This interaction is where the field of environmental resource management comes into play the complex ecological and sociological systems of the natural world intertwined The purpose of this book is to consider such matters and to help readers develop their own capacities as environmental managers and stewards Bruce Mitchell's textbook *Resource and Environmental Management* served as the gold standard for many environmental science courses when the first edition published in 1997 Now twenty years later an updated third edition allows for the inclusion of recent developments The book covers the basic theories and concepts of environmental resource management and guides students to be able to apply those concepts to practical situations By covering basic theories and concepts and by using case studies to show how these have been applied Bruce Mitchell's new edition seeks to ensure that students have competence in both aspects The text enhances the reader's capacity to conduct practice and research in resource and environmental management *Resource and Environmental Management in Canada* Bruce Mitchell, 1995 Resource and environmental management often seem to center upon the resolution of conflict generated by differing regional sectoral substantive or ideological perspectives Uncertainty about present or future conditions is also a basic feature Nevertheless analysts and managers must make well informed decisions that may have long lasting effects This is the twin focus at the core of *Resource and Environmental Management in Canada* The second edition features revisions of the twelve chapters from the first edition with five additional chapters that deal with First Nations gender relationships free trade fisheries management on the East Coast and tensions between the hinterland and heartland areas This updated book written by leading experts across Canada will be welcomed by students and researchers in geography and environmental studies *The Canadian Environment in Political Context, Second Edition* Andrea Olive, 2019-08-20 *The Canadian Environment in Political Context* uses a non technical approach to introduce environmental politics to undergraduate readers The second edition features expanded chapters on wildlife water pollution land and energy Beginning with a brief synopsis of environmental quality across Canada the text moves on to examine political institutions and policymaking the history of environmentalism in Canada and other crucial issues including Indigenous peoples and the environment as well as Canada's North Enhanced with case studies key words and a comprehensive glossary Olive's book addresses the major environmental concerns and challenges that Canada faces in the twenty first century *Geographical Perspectives on Sustainable Rural Change*, 2010 This book focuses on three multifaceted aspects of rural sustainability farms and farming the remaking of rural communities and rural spaces and policy and action in rural development The research is focused on three global regions North America the United Kingdom and Ireland and Australia back cover *Caring for Eeyou Istchee* Monica E. Mulrennan, Colin H. Scott, Katherine Scott, 2019-11-15 How

do Indigenous communities in Canada balance the development needs of a growing population with cultural commitments and responsibilities as stewards of their lands and waters Caring for Eeyou Istchee recounts the extraordinary experience of the James Bay Cree community of Wemindji Quebec who partnered with a multi disciplinary research team to protect territory of great cultural significance in ways that respect community values and circumstances This volume tackles fundamental questions What is environmental protection What should be protected What factors inform community goals How does the natural and cultural history of an area inform protected area design How can the authority and autonomy of Indigenous institutions of land and sea stewardship and the knowledge integral to them be respected and reinforced In answering these questions Indigenous and non Indigenous contributors present a comprehensive account of one of the world's most dynamic coastal environments More particularly they demonstrate how protected area creation is a powerful process for supporting Indigenous environmental stewardship and cultural heritage

Sustainability in Transition Travis Gliedt, Kelli Larson, 2018-06-25 Sustainability in Transition Principles for Developing Solutions offers the first in depth education focused treatment of how to address sustainability in a comprehensive manner The textbook is structured as a learning centered approach to walk students through the process of linking sustainable behavior and decision making to green innovation systems and triple bottom line economic development practices in order to achieve sustainable change in incremental to transformational ways All chapters combine theory and practice with the help of global case study and research study examples to illustrate barriers and best practices Each chapter begins with learning objectives and ends with a check on learning section that ties the main points back to the core themes of the book Chapters include a section focused on measuring progress and a box comparing international research or case studies to the North American focus of the chapter A list of additional academic sources for students that complement each chapter are included Building sustainability tools techniques and competencies cumulatively with the help of problem and project based learning modules Sustainability in Transition Principles for Developing Solutions is a comprehensive resource for learning sustainability theory and doing sustainability practice It will be essential reading for advanced undergraduate and graduate level students who have already completed introductory sustainability classes

Canadian Public Administration in the 21st Century Charles Conteh, Ian Roberge, 2013-08-13 The demands associated with good governance and good public management are at an all time high Yet the discipline of Canadian public administration is in flux and the time is ripe for an open and frank analysis of its state and possibilities Canadian Public Administration in the 21st Century brings together emerging voices in Canadian public adm

Hazards in a Fickle Environment: Bangladesh C.E. Haque, 2012-12-06 This book evolved from a collaborative research project between the University of Manitoba Canada and Jahangirnagar University Bangladesh which commenced in 1984 to study the problems of river channel migration rural population displacement and land relocation in Bangladesh The study was sponsored by the International Development Research Center IDRC based in Ottawa Canada It was through this project

that I started my journey into disaster research more than thirteen years ago with basically an applied problem of massive magnitude in Bangladesh I spent two and a half years in two stages in Bangladesh s riparian villages to collect the empirical data for this study Then the growing disaster discourse throughout the 1980s especially its conceptual and theoretical areas drew me in further gluing my interest to these issues In the 1990s during my research and teaching at Brandon University Canada I realized that despite the large body of literature on natural disasters there was no work that synthesized the approaches to nature triggered disasters in a comprehensive form with sufficient empirical substantiation In addition despite the great deal of attention given to disasters in Bangladesh I found no detailed reference book on the topic Natural hazards and disasters in my view should be studied under a holistic framework encompassing the natural environment society and individuals Overreaction to the limitations of technocratic scientific approaches the control and prevention of physical events through specialized knowledge and skills has resulted in a call for taking the naturalness out of natural disasters

Community Forestry Ryan C. L. Bullock, Kevin S. Hanna, 2012-06-28 An incisive examination of community forestry in a pan national context highlighting both the possibilities and challenges associated with its implementation CeDEM Asia 2014 Skoric, Marko M., Parycek, Peter, Sachs, Michael, 2015 Sustainability Planning and Collaboration in Rural Canada Lars K. Hallström, Glen T. Hvenegaard, Karsten Mündel, Mary A. Beckie, 2016-03-10 In step with rural development initiatives across Canada today these fourteen case studies examine the shift toward sustainability based planning as a key element of community development Further they explore the growth of partnerships between communities and post secondary institutions which extend beyond research and education into community development practices capacity building and participatory action research Rural development researchers decision makers and elected officials at all levels of government political scientists and policy analysts and community engagement practitioners will benefit from Sustainability Planning and Collaboration in Rural Canada s ideal rational progression which mirrors the policy process itself from problem identification to engagement solutions and evaluation Contributors Donald Alexander Kirstine N Baccar Michael T Barr Mary A Beckie Moira Jean Calder Meredith Carter Yolande E Chan Sean Connelly Jon M Corbett Anthony Davis Jeff A Dixon David J A Douglas Roger Epp Kelly Green Lars K Hallström Greg Halseth Casey Hamilton Karen L F Houle Glen T Hvenegaard Melaine L Irvine Bernie Jones Robert Keenan Rhonda L P Koster Ryan Lane Sean Markey Shelly McMann L Jane McMillan Morgan E Moffitt Karen E Morrison Karsten Mündel Craig Pollett Kerry Prosper Mark Roseland Laura Ryser Claire E Sanders Jennifer Sumner Kelly Vodden Marc von der Gonna Shayne Wright Environmental Policy in North America Robert G. Healy, Debora L. VanNijnatten, Marcela López-Vallejo, 2014-01-20 This comprehensive analysis of key issues in North American environmental policy provides an overview of how the US Mexico and Canada differ in their environmental management approaches and capacity levels and how these differences play into cross border cooperation on environmental problems The book offers insights into transboundary cooperation both before and after NAFTA and presents a framework

for making environmental interaction more effective in the future The book is organized into two parts The first more general section compares the national contexts for environmental management in each country including economic conditions sociocultural dynamics and political decision making frameworks and shows how these have led to variations in policy approaches and levels of capacity The authors argue that effective environmental governance in North America depends on the ability of transboundary institutions to address and mediate these differences The book's second section illustrates this argument using four case studies of environmental management in North America biodiversity and protected areas air pollution smog greenhouse gas reduction and genetically modified crops

Water Governance, Policy and Knowledge Transfer Cheryl De Boer, Joanne Vinke-de Kruijf, Gül Özerol, Hans Th. A. Bressers, 2013-05-29 In an increasingly global community of researchers and practitioners new technologies and communication means have made the transfer of policies from one country or region to another progressively more prevalent There has been a lot of attention in the field of public administration paid to policy transfer and institutional transplantation This book aims to create a better understanding of such transfers in the water management sector These include the adoption of modern water management concepts such as integrated water resources management and forms of water governance which are strongly promoted and sometimes also imposed by various international organizations Transfers also occur within the scope of development aid or for the purpose of creating business opportunities In addition many research organisations consultancies and governmental agencies are involved in cross border work The purpose of this book is therefore to present practical examples of the transfer of modern water management from one locality to another and to critically discuss the transferability of policy and governance concepts by analysing the contextual needs and factors Case studies are included from North America Europe the Middle East and Asia It is argued that in many cases context matters in water management and that there is no panacea or universal concept that can be applied to all countries or regions with different political economic cultural and technological contexts Yet it is also shown that some countries are facing pressing and similar water management issues that cut across national borders and hence the transfer of knowledge may be beneficial

Transforming Parks and Protected Areas Kevin S. Hanna, Douglas A. Clark, D. Scott Slocumbe, 2007-10-18 This title was originally published in 2007 The version published in 2012 is a PB reprint of the original HB The protection of natural resources and biodiversity through protected areas is increasingly based on ecological principles Simultaneously the concept of ecosystem based management has become broadly accepted and implemented over the last two decades However this period has also seen unprecedented rapid global social and ecological change which has weakened many protection efforts These changes have created an awareness of opportunities for innovative approaches to managing protected areas and of the need to integrate social and economic concerns with ecological elements in protected areas and parks management A rare collection of articles that fuses academic theory critique of practice and practical knowledge *Transforming Parks and Protected Areas* analyzes and critiques these

theories practices and philosophies looking in detail at the emerging issues in the design and operation of parks and protected areas Addressing critical dynamics and current practices in parks and protected areas management the excellent volume goes well beyond simple managerial solutions and descriptions of standard practice With contributions from leading academics and practitioners this book will be of value to all those working within ecology natural resources conservation and parks management as well as students and academics across the environmental sciences and land use management

Handbook of Sustainability Assessment Angus Morrison-Saunders,Jenny Pope,Alan Bond,2015-09-25 The Handbook of Sustainability Assessment introduces the theory and practice of sustainability assessment and showcases the state of the art research The aim is to provide inspiration and guidance to students academics and practitioners alike and to contribute to the enhancement of sustainability assessment practice worldwide It emphasises how traditional impact assessment practices can be enhanced to contribute to sustainable outcomes Featuring original contributions from leading sustainability assessment researchers and practitioners it forms part of the Research Handbooks on Impact Assessment series Tourism and Sustainable Development Goals Jarkko Saarinen,2020-06-29 This comprehensive volume comprises some of the best scholarship on sustainable tourism in recent years demonstrating the rich body of past research that provides a fertile and critical ground for studies on the Sustainable Development Goals SDGs by tourism geographers and other social scientists in the future Since the turn of the 1990s many international development and policy making organisations have perceived the tourism industry with its local and regional connections as a high potential tool for putting sustainable development into practice The capacity of tourism to work for sustainable development was highlighted in relation to the United Nations SDGs which were adopted in 2015 The SDGs define the agenda for global development to 2030 by addressing pertinent challenges such as poverty inequality climate change environmental degradation and peace and justice Tourism geographers and allied disciplines have held strong and long term interest in sustainability issues and their chapters in this collection contribute significantly to this emerging and highly policy relevant research field This book was originally published as an online special issue of the journal Tourism Geographies
