Resource Conserving Techniques in Crop Production A.R. Sharma, U.K. Behera, 2011-03-01 Recent researches on resource conserving techniques have provided exciting opportunities for improving

input use efficiency productivity and sustainability These techniques include zero tillage minimum tillage rotary tillage bed planting surface seeding laser land leveling pressurized irrigation systems system of rice intensification aerobic rice soil solarization residue management site specific nutrient management crop diversification precision farming employing use of modern tools and procedures etc Adoption of these techniques is the need of the hour as a method of low input agriculture to reduce costs and achieve sustainability in Indian agriculture This book provides the most updated and comprehensive information on resource conserving techniques for improving crop productivity The text is divided into 9 sections i Concept and approaches ii Cropping systems and diversification iii Soil use and management iv Improving nutrient use efficiency v Water saving techniques vi Weed dynamics and herbicide use vii Energy conservation and farm machinery viii Modern tools and approaches ix On farm testing and evaluation In each section there are chapters on specific topics contributed by eminent scientists who made notable research contributions in their field of specialization The chapters have been thoroughly edited and presented in an easily understandable manner

Resource Management for Sustainable Agriculture Vikas Abrol, Peeyush Sharma, 2012-10-24 In this book papers pertaining to resource management for sustainable agricultural development are presented in four parts divided into ten chapters Part I discusses the usage of water and waste management for sustainable agricultural development including aspects like irrigation management to prevent soil and ground water salinization production of solid fuel from oil palm waste sustainable ecomaterials and biorefinery from agroindustrial waste nonpoint pollution from agriculture and livestock activities on surface water Part II discusses sustainable management of dryland resources especially carbon sequestration under changing climate scenario Part III deals with efficient nutrient management for sustainable crop productivity in different agro climatic conditions soil quality and productivity improvement under rainfed conditions Part IV throws light upon effect of conservation tillage on soil properties and impact of agricultural traffic and tillage on soil properties

Advances in Agronomy Donald L. Sparks, 2011-05-04 Advances in Agronomy continues to be recognized as a leading reference and a first rate source for the latest research in agronomy As always the subjects covered are varied and exemplary of the myriad of subject matter dealt with by this long running serial Maintains the highest impact factor among serial publications in agriculture Presents timely reviews on important agronomy issues Enjoys a long standing reputation for excellence in the field

Aquaculture Policy Options for Integrated Resource Management in SubSaharan Africa Randall E. Brummett, 1994

Indigenous Knowledge Paul Sillitoe, 2017-11-07 Indigenous Knowledge IK reviews cutting edge research and links theory with practice to further our understanding of this important approach s contribution to natural resource management It addresses IK s potential in solving issues such as coping with change ensuring global food supply for a growing population reversing environmental degradation and promoting sustainable practices It is increasingly recognised that IK which has featured centrally in resource management for millennia should play a significant part in today s programmes that seek to increase land

productivity and food security while ensuring environmental conservation An invaluable resource for researchers and postgraduate students in environmental science and natural resources management this book is also an informative read for development practitioners and undergraduates in agriculture forestry geography anthropology and environmental studies

The Molecular and Physiological Basis of Nutrient Use Efficiency in Crops Malcolm J. Hawkesford, Peter Barraclough, 2011-09-21 Efforts to increase efficient nutrient use by crops are of growing importance as the global demand for food fibre and fuel increases and competition for resources intensifies The Molecular and Physiological Basis of Nutrient Use Efficiency in Crops provides both a timely summary of the latest advances in the field as well as anticipating directions for future research The Molecular and Physiological Basis of Nutrient Use Efficiency in Crops bridges the gap between agronomic practice and molecular biology by linking underpinning molecular mechanisms to the physiological and agronomic aspects of crop yield These chapters provide an understanding of molecular and physiological mechanisms that will allow researchers to continue to target and improve complex traits for crop improvement Written by leading international researchers The Molecular and Physiological Basis of Nutrient Use Efficiency in Crops will be an essential resource for the crop science community for years to come Special Features coalesces current knowledge in the areas of efficient acquisition and utilization of nutrients by crop plants with emphasis on modern developments addresses future directions in crop nutrition in the light of changing climate patterns including temperature

and water availability bridges the gap between traditional agronomy and molecular biology with focus on underpinning molecular mechanisms and their effects on crop yield includes contributions from a leading team of global experts in both research and practical settings

Ecological Intensification of Natural Resources for Sustainable Agriculture Manoj Kumar Jhariya, Ram Swaroop Meena, Arnab Banerjee, 2021-03-07

Ecological intensification involves using natural resources such as land water soil nutrients and other biotic and abiotic variables in a sustainable way to achieve high performance and efficiency in agricultural yield with minimal damage to the agroecosystems With increasing food demand there is high pressure on agricultural systems The concept of ecological intensification presents the mechanisms of ensuring high agricultural productivity by restoration the soil health and landscape ecosystem services The approach involves the replacement of anthropogenic inputs with eco friendly and sustainable alternates Effective ecological intensification requires an understanding of ecosystems services ecosystem s components and flow of resources in the agroecosystems Also awareness of land use patterns socio economic factors and needs of the farmer community plays a crucial role It is therefore essential to understand the interaction of ecosystem constituents within the extensive agricultural landscape The editors critically examined the status of ecological stress in agroecosystems and address the issue of ecological intensification for natural resources management Drawing upon research and examples from around the world the book is offering an up to date account and insight into the approaches that can be put in practice for poly cropping systems and landscape scale management to increase the stability of agricultural production systems to achieve Ecological resilience It further discusses the role of farmer communities and the importance of their awareness about the issues This book will be of interest to teachers researchers climate change scientists capacity builders and policymakers Also the book serves as additional reading material for undergraduate and graduate students of agriculture forestry ecology agronomy soil science and environmental sciences National and international agricultural scientists policymakers will also find this to be a useful read for green future
