*The Relevance of Hegel's Concept of Philosophy* Luca Illetterati,Giovanna Miolli,2021-12-16 In a systematic treatment of Hegel s concept of philosophy and all of the different aspects related to it this collection explores how Hegel and his understanding of his discipline can be put into dialogue with current metaphilosophical inquiries and shed light on the philosophical examination of the nature of philosophy itself Taking into account specific aspects of Hegel s elaboration on philosophy such the scientificity of philosophy as a self grounding rational process and his explanation of the relationship between philosophy and the history of philosophy an international line up of contributors consider Hegel s concept of philosophy in general from skepticism idealism history and difference to time politics and religion The relation of Hegel s concept of philosophy to other philosophical traditions and philosophers including Kant Fichte Schelling and Jacobi Hegel s concept of philosophy with reference to philosophy s relation to other forms of rationality and disciplines The relation of Hegel s concept of philosophy to specific issues in present metaphilosophical debates Reflecting the renewed and widespread interest in Hegel seen in Analytic philosophy and Continental thought this volume advances study of Hegel s conceptual tools and provides new readings of traditional philosophical problems

**Derrida** Madeleine Fagan,2007-04-18 death of Jacques Derrida in 2004 represented a major interruption in contemporary intellectual life This death calls for an engagement with Derrida s work and an attempt to understand his legacy Such a discussion is fraught with tension between remaining faithful after death and putting Derrida s writing to work in new directions posing challenges and exposing limitations In short this legacy is necessarily a negotiation

The aim of this book is to grapple with this specific theme and to explore the implications of Derrida's death for the future of critical thought itself. The authors demonstrate that there is no single way to adopt or inherit Derrida's thought. Rather through their engagement with contemporary themes within Politics and International Studies, Philosophy, Literary Studies and Postcolonial Studies, each chapter illuminates the degree to which on-going reflection, radical critique and above all radical self-critique are demanded by deconstruction. This book provides the key to

**Realism Discourse and Deconstruction** Jonathan Joseph, John Michael Roberts, 2004-05-05. The book addresses such issues as the work of Derrida and deconstruction, discourse theory, Eurocentrism and poststructuralism. Modernizing George Eliot K.M.

Newton, 2011-12-08. George Eliot's work has been subject to a wide range of critical questioning, most of which relates her substantially to a Victorian context and intellectual framework. This book examines the ways in which her work anticipates significant aspects of writing in the twentieth and indeed twenty-first century in regard to both art and philosophy. This new book presents a series of linked essays exploring Eliot's credentials as a radical thinker. Opening with her relationship to the Romantic tradition, Newton goes on to discuss her reading of Darwinism, her radical critique of Victorian values and her affiliation with the modernists. The final essays discuss her work in relation to Derridean themes and to Bernard Williams' concept of moral luck. What emerges is a very different Eliot from the conservative figure portrayed in much critical literature.

**Derrida and the Future of the Liberal Arts** Mary Caputi, Vincent J. Del Casino, Jr., 2013-04-11. Derrida and the Future of the Liberal Arts highlights the Derridean assertion that the university must exist without condition as a bastion of intellectual freedom and oppositional activity whose job it is to question mainstream society. Derrida argued that only if the life of the mind is kept free from excessive corporate influence and political control can we be certain that the basic tenets of democracy are being respected within the very societies that claim to defend democratic principles. This collection contains eleven essays drawn from international scholars working in both the humanities and social sciences and makes a well-grounded and comprehensive case for the importance of Derridean thought within the liberal arts today. Written by specialists in the fields of philosophy, literature, history, sociology, geography, political science, animal studies and gender studies, each essay traces deconstruction's contribution to their discipline, explaining how it helps keep alive the unconditional contrapuntal mission of the university. The book offers a forceful and persuasive corrective to the current assault on the liberal arts.

**Ricoeur and the Hermeneutics of Suspicion** Alison Scott-Baumann, 2011-11-03. Paul Ricoeur (1913-2005) was one of the most prolific and influential French philosophers of the Twentieth Century. In his enormous corpus of work, he engaged with literature, history, historiography, politics, theology and ethics while debating truth and ethical solutions to life in the face of widespread and growing suspicion about whether such a search is either possible or worthwhile. In *Ricoeur and the Hermeneutics of Suspicion*, Alison Scott-Baumann takes a thematic approach that explores Ricoeur's lifelong struggle to be both iconoclastic and yet hopeful and avoid the slippery slope to relativism. Through an examination of

the hermeneutics of suspicion the book reveals strong continuities throughout his work as well as significant discontinuities such as the marked way in which he later distanced himself from the hermeneutics of suspicion and his development of new devices in its place while seeking a hermeneutics of recovery Scott Baumann offers a highly original analysis of the hermeneutics of suspicion that will be useful to the fields of philosophy literature theology and postmodern social theory

Explanation Giora Hon, Sam S. Rakover, 2013-04-17 For some years we have been conducting at the University of Haifa an interdisciplinary seminar on explanation in philosophy and psychology We habitually begin the seminar with some philosophical reflections on explanation an analysis of the concept and its metaphysical underpinnings We discuss the various models and proceed to examine explanation in the setting of psychology Thus from the outset we have focused not only on the concept itself but also on its application The objective that we have set for the seminar attended by students from both departments Philosophy and Psychology has been a critical understanding of the concept of explanation its use and limitations We were keen on deepening our understanding of the concept and on exploring its applications in fields of knowledge other than psychology This was the motivation for convening an international conference on explanation and its application The conference took place in the spring of 1998 under the auspices of the University of Haifa The present book is the fruit of this meeting The reader should note that the second part of the Introduction presents a detailed analytical account of the book We hope that this overview will facilitate efficient use of the book by directing the reader's attention to those issues that might be of interest to him or her

**On Truth and Meaning** Christopher Norris, 2006-08-15 Examining key issues in the philosophy of logic mind and language this book proposes grounds for a different era of cooperation and mutual interrogative exchange between the two schools of thought It explores both traditions alongside one another in order to point up certain contrasts or communities of interest

Post-Theory, Culture, Criticism, 2016-09-12 Post Theory Culture Criticism offers a collection of essays that provide provocative re-articulations of theory culture and criticism It contains distinguished and original work by a number of leading and emerging figures within cultural and critical theory and cultural studies who believe that all of the above is in urgent need of theoretical and practical exploration In probing the feasibility and desirability of theory's re-articulation the essays demonstrate that theory can only reinvent itself as worthwhile post theory through its own critical self revaluation Jacket

*Derrida, Badiou and the Formal Imperative* Christopher Norris, 2012-08-02 In this path breaking study Christopher Norris proposes a transformed understanding of the much exaggerated differences between analytic and continental philosophy While keeping the analytic tradition squarely in view his book focuses on the work of Jacques Derrida and Alain Badiou two of the most original and significant figures in the recent history of ideas Norris argues that these thinkers have decisively reconfigured the terrain of contemporary philosophy and between them pointed a way beyond some of those seemingly intractable issues that have polarised debate on both sides of the notional rift between the analytic and continental traditions In particular his book sets out to show against the received

analytic wisdom that continental philosophy has its own analytic resources and is capable of bringing some much needed fresh insight to bear on problems in philosophy of language logic and mathematics Norris provides not only a unique comparative account of Derrida's and Badiou's work but also a remarkably wide ranging assessment of their joint contribution to philosophy's current if widely resisted potential for self transformation Interpretation as Pragmatics J. Lecercle, 1999-05-19 Why is it that all interpretations are possible and none is true That some interpretations are just but some are false Lecercle draws on the resources of pragmatics literary theory and the philosophy of language to propose a new theory of literary but also of face to face dialogue that charts the interaction between the five participants in the fields of dialogue and or interpretation author reader text language and encyclopaedia Interpretation is taken through its four stages from glossing and enigma solving to translation and intervention **Cities, Words and Images** P. Lombardo, 2003-02-21 The city is an essential theme of modernity in literature architecture photography and film This book first focuses on ardent reactions to the metropolitan explosion in the nineteenth century with Baudelaire and Poe as key figures More recent representations of the city are then investigated in Europe and the United States Lombardo reflects on the way in which the changes in human perception created by urbanization are expressed in the various arts in terms of form and content

Deleuze and Language J. Lecercle, 2002-10-07 In the field of philosophy of language is there life beyond Chomsky Deleuze's deep distrust for and fascination with language provide a positive answer nothing less than a brand new philosophy of language where pragmatics replaces structural linguistics and where the literary text and the concept of style have pride of place This should be good news not only for philosophers but for linguistics and literary critics as well *The Language, Discourse, Society Reader* Denise Riley, 2004-08-13 For the last twenty five years Language Discourse Society has been the most intellectually challenging series in English Its titles range across the disciplines from linguistics to biology from literary criticism to law combining vigorous scholarship and theoretical analysis at the service of a broad political engagement This anniversary reader brings together a fascinating group of thinkers from both sides of the Atlantic with an introductory overview from the editors which considers the development of theory and scholarship over the past two decades Some Versions of Empson Matthew Bevis, 2007-11 William Empson was one the most important poet critics of the twentieth century Following on recent scholarly developments and the centenary of his birth in 2006 there has been a resurgence of interest in his work In this book of critical essays on Empson the first in over a decade fourteen scholars consider the full range of his work studying his poetry alongside his criticism in order to reassess the scale of his achievement **Epistemology: Key Concepts in Philosophy** Christopher Norris, 2005-10-20 Christopher Norris attempts to make epistemology the theory of knowledge accessible to students and those with little prior knowledge of the subject through a series of debates which aim to give an balanced overview **Re-Thinking the Cogito** Christopher Norris, 2010-08-12 Re Thinking the Cogito seeks to combine a strongly naturalistic with a distinctively rationalist perspective on some nowadays much discussed issues in

philosophy of mind Against the common view that they involve downright incompatible conceptions of mind knowledge and ethics it seeks to unite a naturalism that draws on recent advances in neurophysiology and cognitive science with an outlook that gives full weight to those normative values at the heart of rationalist thought True to the book's constructive spirit Norris offers various detailed proposals for bringing the two approaches into a mutually enhancing though also mutually provocative relationship He finds that claim strikingly prefigured in Spinoza's working out of a non reductive yet metaphysically uncompromising mind body monism Moreover he suggests how a thoroughly naturalised approach might yet become a locus of productive engagement with the work of an ultra rationalist thinker such as Alain Badiou Thus Norris puts the case that physically embodied human thought has cognitive intellectual and creative powers that cannot and need not be accounted for in terms of conscious let alone self conscious reflection

Film, Form and Phantasy M. O'Pray, 2004-08-05

This book explores the ideas of the neglected English aesthetician and art historian Adrian Stokes Stokes's Kleinian based concepts of carving and modelling are analysed in relation to film arguing that they replace the traditional notions of realism and montage in film theory and provide a set of aesthetics which encompasses mainstream and art cinema This Kleinian psychoanalytic approach is offered to the films of Eisenstein Rossellini Hitchcock and others
