Restoration Of Aquatic And Terrestrial Systems:

Restoration of Aquatic and Terrestrial Systems R.W. Brocksen, Joe Wisniewski, 2012-12-06 The proceedings of a special technical session dealing with the addition of Ca based materials to waters and soils for the purpose of restoring or enhancing fisheries in acidified waters are contained in this volume The session was part of the North American Fisheries Society's annual meeting sponsored by the Water Quality Section of the Society While the concept of liming is not new the extent of the recent research demonstrations and applications reported at the conference is enlightening Six countries are represented by government state and private sector participants The scope of activities reported in the following 23 papers range from the simple to the very complex addition of liming materials to ponds lakes streams and watersheds This volume of presentations is broad and impressive as are the methods used in the actual application of the neutralizing materials Those programs that are demonstration application oriented are deploying techniques that are either new or modifications of existing technology

 Functioning and Strategies for Management,2002-09-10 The Clean Water Act CWA requires that wetlands be protected from
 degradation because of their important ecological functions including maintenance of high water quality and provision of fish
 and wildlife habitat However this protection generally does not encompass riparian areas the lands bordering rivers and
 lakes even though they often provide the same functions as wetlands Growing recognition of the similarities in wetland and
 riparian area functioning and the differences in their legal protection led the NRC in 1999 to undertake a study of riparian
 areas which has culminated in Riparian Areas Functioning and Strategies for Management The report is intended to heighten
 awareness of riparian areas commensurate with their ecological and societal values The primary conclusion is that because
 riparian areas perform a disproportionate number of biological and physical functions on a unit area basis restoration of
 riparian functions along America s waterbodies should be a national goal **Interior, Environment, and Related**
