Restorative Justice And Responsive Regulation:

Restorative Justice & Responsive Regulation John Braithwaite, 2001-11-15 Braithwaite's argument against punitive justice systems and for restorative justice systems establishes that there are good theoretical and empirical grounds for anticipating that well designed restorative justice processes will restore victims offenders and communities better than existing criminal justice practices. Counterintuitively he also shows that a restorative justice system may deter incapacitate and rehabilitate more effectively than a punitive system. This is particularly true when the restorative justice system is embedded in a responsive regulatory framework that opts for deterrence only after restoration repeatedly fails and incapacitation only after escalated deterrence fails. Braithwaite's empirical research demonstrates that active deterrence under the dynamic regulatory pyramid that is a hallmark of the restorative justice system he supports is far more effective than the passive deterrence that is notable in the stricter sentencing grid of current criminal justice systems. Restorative Justice and Responsive Regulation John Braithwaite, 2002 Restorative justice has become an important new way of thinking about crime responsive regulation an influential way of thinking about business regulation. In this volume John Braithwaite brings together his important work on restorative justice with his work on business regulation to form a sweepingly novel picture of the way society regulates itself. Braithwaite internationally renowned for his work on restorative justice has argued that restoring victims offenders and communities is more effective than punitive practices for deterring incapacitating and rehabilitating offenders. In this fascinating book he reconceives responsive regulation as an approach to regulating any phenomenon. Offering an original and incisive argument he establishes the relevance of the business regulation literature on responsive regulation to the problem of crime and the relevance of the restorative justice literature on crime not only to business regulation but also to many of our biggest social and economic problems. These include the problems of war and peace education poverty and sustainable development. Braithwaite's theories offer radically different ways of thinking about policies to confront these problems. They also propose a complete transformation of the legal system from tort to tax in accordance with the principles of restorative justice and responsive regulation. Braithwaite summarises a great deal of research evidence from criminal justice in the case of restorative practices from business in the case of responsive regulation on how and why restorative justice and responsive regulation works in healing our biggest social problems. This book offers compelling arguments for a problem solving approach to social ills and challenges us to develop a legal system that works more efficiently and fairly with a morally decent approach to social problems of all stripes. **Restorative and Responsive Human Services** Gale Burford, John Braithwaite, Valerie Braithwaite, 2019-03-04 In Restorative and Responsive Human Services Gale Burford John Braithwaite and Valerie Braithwaite bring together a distinguished collection providing rich lessons on how regulation in human services can proceed in empowering ways that heal and are respectful of human relationships and legal obligations. The human services are in trouble combining restorative justice with responsive

regulation might redeem them renewing their well intended principles Families provide glue that connects complex systems What are the challenges in scaling up relational practices that put families and primary groups at the core of health education and other social services This collection has a distinctive focus on the relational complexity of restorative practices How do they enable more responsive ways of grappling with complexity than hierarchical and prescriptive human services Lessons from responsive business regulation inform a re imagining of the human services to advance wellbeing and reduce domination Readers are challenged to re examine the perverse incentives and contradictions buried in policies and practices How do they undermine the capacities of families and communities to solve problems on their own terms This book will interest those who harbor concerns about the creep of domination into the lives of vulnerable citizens It will help policymakers and researchers to re focus human services to fundamental outcomes at the foundation of sustainable democracies This book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

section of the school community including parents guardians social workers and others who have been affected This tertiary level of intervention is normally only used for serious incidents within the school Morrison explains the thinking behind the suggested responses and shows how they can be implemented by practices such as a responsible citizen program and restorative justice circles and conferences
