Restoring The Earth How Americans Are Working To Renew Our Damaged Environment:

Restoring the Earth John J. Berger, 1979 Here are some success stories of dynamic individuals and groups who are taking environmentalism a great step beyond conversation

Environmental Restoration John Berger, 2012-06-22
Environmental Restoration is the product of a ground breaking conference on ecological restoration held in January 1988 at the University of California Berkeley It offers an overview from the nation's leading experts of the most current techniques of restoration including examples of the complex and subtle biological interactions we must understand to ensure success Chapters cover restoration of agricultural lands barrens coastal ecosystems prairies and range lands Additional sections address temperate forests and watersheds mined lands soil bioengineering urban issues including waste treatment and solid toxic and radioactive waste management The book also covers restoration of aquatic systems includes chapters on strategic planning and land acquisition and provides examples of successful projects

Ecological Restoration Francisco A. Comín, 2010-02-11 This book combines theory and practice plus ideas and case studies on ecological restoration from local to global scales Includes why and how to restore coastal zones forests and wetlands and their economic and social interests Practitioners professionals researchers and students will find useful ideas and tools for their everyday work in this book

Solving the Climate Crisis John J. Berger, 2023-10-24 Groundbreaking solutions to the climate crisis from scientists engineers civic leaders entrepreneurs and activists offering hope to all readers concerned about our planet's future Offers practical actions that reflect technological and economic advances with an introduction by former United States senator Russ Feingold Solving the Climate Crisis is a hopeful and critical resource that makes a convincing and detailed case that there is a path forward to save our environment Illustrating the power of committed individuals and the necessity for collaborative government and private sector climate action the book focuses on three essential areas The technological dimension move to 100% clean renewable energy as fast as we possibly can through innovations like clean steel green cement and carbon reuse companies The ecological dimension enhance and protect natural ecosystems forests and agricultural lands to safely store greenhouse gases and restore soils transforming how we grow process and consume food The social dimension update and create new laws policies and economic measures to recenter human values and reduce environmental and social injustice Based on more than 6 years of research Berger traveled the nation and abroad to interview governors mayors ranchers scientists engineers business leaders energy experts and financiers as well as carbon farmers solar and wind innovators forest protectors non profit leaders and activists With real world examples an explanation of cutting edge technologies in solar and wind and political organizing tactics Solving the Climate Crisis provides a practical road map for how we effectively combat climate change Replacing the fossil fuel system with a newly invigorated modernized clean energy economy will produce tens of millions of new jobs and save trillions of dollars Protecting the climate is thus potentially the greatest economic opportunity of our time

Nature by Design Eric Higgs, 2003-04-25 Ecological restoration is the process of

repairing human damage to ecosystems It involves reintroducing missing plants and animals rebuilding soils eliminating hazardous substances ripping up roads and returning natural processes such as fire and flooding to places that thrive on their regular occurrence Thousands of restoration projects take place in North America every year In *Nature by Design* Eric Higgs argues that profound philosophical and cultural shifts accompany these projects He explores the ethical and philosophical bases of restoration and the question of what constitutes good ecological restoration Higgs explains how and why the restoration movement came about where it fits into the array of approaches to human relationships with the land and how it might be used to secure a sustainable future Some environmental philosophers and activists worry that restoration will dilute preservation and conservation efforts and lead to an even deeper technological attitude toward nature They ask whether even well conceived restoration projects are in fact just expressions of human will Higgs prefaces his responses to such concerns by distinguishing among several types of ecological restoration He also describes a growing gulf between professionals and amateurs Higgs finds much merit in criticism about technological restoration projects which can cause more damage than they undo These projects often ignore the fact that changing one thing in a complex system can change the whole system For restoration projects to be successful Higgs argues people at the community level must be engaged These focal restorations bring communities together helping volunteers develop a dedication to place and encouraging democracy

American Environmentalism Riley E. Dunlap, Angela G. Mertig, 2014-04-04 First published in 1992 Hailed as required reading for environmental sociologist and social movements this book is written as a scholarly work and from a social science perspective and is an ideal textbook for environmental courses

In Service of The Wild Stephanie Mills, 1996-10-31 *In Service of the Wild* begins and ends on the author's home ground thirty five acres of farmed out land now planted in Scotch pine monoculture Mills imagines her northern Michigan landscape from its barren glaciated past to its climax as maplebeech hardwood forest to the ways in which logging slash fires and agriculture transformed the Northwoods ecology With her trademark humor and humility Mills invites the reader along as she learns to dig up plant anew and generally to assist the regenerative processes of time and nature

The Genius of Earth Day Adam Rome, 2013-04-16 The first Earth Day is the most famous little known event in modern American history Because we still pay ritual homage to the planet every April 22 everyone knows something about Earth Day Some people may also know that Earth Day 1970 made the environmental movement a major force in American political life But no one has told the whole story before The story of the first Earth Day is inspiring it had a power a freshness and a seriousness of purpose that are difficult to imagine today Earth Day 1970 created an entire green generation Thousands of Earth Day organizers and participants decided to devote their lives to the environmental cause Earth Day 1970 helped to build a lasting eco infrastructure lobbying organizations environmental beats at newspapers environmental studies programs ecology sections

in bookstores community ecology centers In *The Genius of Earth Day* the prizewinning historian Adam Rome offers a compelling account of the rise of the environmental movement Drawing on his experience as a journalist as well as his expertise as a scholar he explains why the first Earth Day was so powerful bringing one of the greatest political events of the twentieth century to life

Making Nature Whole William R. Jordan, George M. Lubick, 2011-07-26 *Making Nature Whole* is a seminal volume that presents an in depth history of the field of ecological restoration as it has developed in the United States over the last three decades The authors draw from both published and unpublished sources including archival materials and oral histories from early practitioners to explore the development of the field and its importance to environmental management as well as to the larger environmental movement and our understanding of the world Considering antecedents as varied as monastic gardens the Scientific Revolution and the emerging nature awareness of nineteenth century Romantics and Transcendentalists Jordan and Lubick offer unique insight into the field's philosophical and theoretical underpinnings They examine specifically the more recent history including the story of those who first attempted to recreate natural ecosystems early in the 20th century as well as those who over the past few decades have realized the value of this approach not only as a critical element in conservation but also as a context for negotiating the ever changing relationship between humans and the natural environment *Making Nature Whole* is a landmark contribution providing context and history regarding a distinctive form of land management and giving readers a fascinating overview of the development of the field It is essential reading for anyone interested in understanding where ecological restoration came from or where it might be going

A History of Environmental Politics Since 1945 Samuel P. Hays, 2000-10-15 Long before public life in America was enlivened with such dramatic sound bites as acid rain global warming rain forests and the ozone layer Samuel P Hays was well launched on his career of tracking this new phenomenon of environmental affairs His first foray a book on the early twentieth century conservation movement published in 1958 helped to launch environmental history as a field and his continued writings after coming to the University of Pittsburgh in 1960 helped to bring the field to full flower Now he has produced another volley which promises to continue to energize this growing and dynamic field of study *A History of Environmental Politics since 1945* Hays provides an overview of environmental politics during the last half century both its formative and its maturing years that will be useful to those who are actively engaged in environmental affairs and those who wish to watch and assess it from the sidelines His themes are both simple and diverse His overall focus is on the emergence of an environmental culture which has engaged millions of Americans in varied ways of thought and action on the one hand and the intense opposition to that drive on the other Hays explores a wide range of issues such as the role of nature in an urban society pollution and its causes and effects the impact of an ever increasing population and its voracious appetite to consume At the same time he follows these threads through science technology economics management the structure of politics and the results of policy *A History of Environmental Politics since 1945* provides an introduction to

the subject for both the specialist and the lay audience the general public and the student It provides a high level of insight that will inform both those who are environmental experts and those who wish to take a first step at grasping the meaning of environmental affairs It constitutes a formative guide for a subject that promises to engage the nation ever more fully in the years to come **Learning Peace** Betty A. Reardon, Eva Nordland, 1994-04-12 *Teaching Kids To Love The Earth* Marina

Lachecki, 2002-07-29 *Teaching Kids to Love the Earth* is a collection of 186 earth caring activities designed for use with children of all ages to help them experience and appreciate the earth This book leads you through the authors Sense of Wonder Circle curiosity exploration discovery sharing and passion Each chapter contains a story instructions for a main activity suggestions for related activities and a list of additional resources *Teaching Kids to Love the Earth* will enable you and the children you work with to experience a sense of wonder about the world we share **Valuation and Treatment of**

Depletable Resources in the National Accounts Mr. Jonathan Levin, 1991-08-01 To assess the feasibility of the national accounts treating as assets depletable resources extracted for sale the paper examines three issues 1 whether treating natural resources as assets when they are used requires symmetrical accounting when they enter economic reserves 2 at what stage between existence in nature and extraction entry to reserves could be counted and 3 how the value of the in ground natural resource component could be determined It suggests treating natural resources entering reserves as imports from the environmental account added to the capital account registering additions to reserves at a stage involved in economic activities and valuing reserves by procedures related to market price **Environmental Science** Daniel D. Chiras, 2006 Completely updated the seventh edition of *Environmental Science* enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we as a global community can create a sustainable future

Restoring Our Earth Laurence Pringle, 1987 Discusses the ecological restoration of prairies marshes forests rivers and other damaged environments of North America **Nature's Web** Peter Marshall, 2015-02-12 This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement from ancient religions and philosophies to modern science and ethics and synthesizes them into a new philosophy of nature in which to ground our moral values and social action It traces the origins and evolution of the dominant worldview that has built our industrial technocratic man centered civilization and brought us to the current ecological crisis At the same time it uncovers an alternative cultural tradition in the world's different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the inter relatedness of all living things Finally this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an organic and sustainable society in harmony with nature As ecological disasters continue to threaten our planet becoming worse with every passing moment of indifference it has become clear that we must take action We must change our relationship with

nature and return to the days when our lives were intimately connected to and dependent upon the natural world Nature's Web lays the foundations for that change by explaining where our complex ideas about nature come from why they are wrong and what we can do to change them [Ethics, Economics and International Relations](#) Peter G. Brown,2007-12-14 No detailed description available for Ethics Economics and International Relations [Forest Communities, Community Forests](#) Jonathan Kusel,Elisa Adler,2003 A collection of stories about thirteen communities in the United States in their efforts to protect and restore community forests It explores the struggles and opportunities faced by people as they work to invest in natural capital reverse decades of poor forest practices tackle policy gridlock and address community as well as ecological health Visit our website for sample chapters *Environmental Science* Eldon D.
