highlight case studies such as that of the New Jersey Public School Labor Management Collaborative as leading examples of how better student performance more intra district learning and innovation and reduced teacher turnover can be traced to greater educator collaboration Citing examples not only from the K 12 educational sector but also from successful union management partnerships in the automobile steel and telecommunications industries they then identify proven strategies to foster collaborative partnerships at district state and national levels They discuss techniques for forging new partnerships sustaining collaborative efforts and expanding the collaborative partnership model to larger scales This work expertly demonstrates how employment relations practices are antecedents to whole system reform in schools **Shared**

Governance Perry R. Rettig, 2019-12-10 Shared Governance begins with the premise that today's higher education governance practices have lost their focus and vitality By re-examining the original suppositions of shared governance along with an infusion of seminal democratic values and principles a contemporary model is envisioned From historical perspectives on shared governance the book then takes a view of current governance models through the lens of Critical Theory and Open Systems Thinking Political corporate and school system models are briefly reviewed before moving on to application to colleges and universities Each chapter concludes with a continuous story of a young and maturing college vice president as she grapples with a static and worn governance system at her institution She strives to reinvigorate the notion of shared governance and to bring staff and students into the process The final three chapters of the book each include an essay written by individuals who have served on the ground level of shared governance at their institution These people include an administrative assistant who helped to create a Staff Council a Student Government Association president who took a nascent SGA and gave students a new voice and an associate dean who mentored students in this developmental process **The Power of Many** P. A. Duignan, Helen Cannon, 2011 Among the many challenges faced by educational

systems in the 21st century leadership succession is universally recognised as being a major concern Rather than retain the current paradigm of a single figure at the top of the school hierarchy leading researchers Patrick Duignan and Helen Cannon argue the case for a more inclusive collaborative and distributed leadership within schools In this book they offer a series of alternative models and gather views from existing school principals to demonstrate what might be possible and what might work better than the model followed today The Power of Many emphasises how a new paradigm must work to retain those who are already in the job but must also act to encourage potential candidates to apply for the job The book offers specific recommendations and advice to system policy makers human resource personnel and to practitioners in schools especially school principals and deputy principals on new models and paradigms Practical guidelines are proposed that offer sustainable leadership solutions and promote educational systems and schools as communities of learning Ultimately The Power of Many shows how a shortage of principals can and must be substantially reduced and the collective capacity of leadership in schools enhanced and sustained **Battles in the Trenches** Perry R. Rettig, 2022-07-18 Educational leaders
