

Restructuring (5):

Challenges for Electricity Restructuring (1)

- Electricity follows the laws of physics above all else
 - Dispatchers cannot control its path if there is more than one circuit or branch at a particular **node**
- Kirchhoff's Laws
 - Dictate how current and power flows
 - Dependent on impedance (resistance)
 - Electricity will follow the path of least resistance
 - Transmission lines have limited capacity
 - Electricity may be forced to follow alternate paths
- No telling who is getting what electricity
 - Like trying to figure out if one drop of water in a swimming pool came out of a particular nozzle when there are multiple points of injection.

Restructuring Trade Agreements Juscelino F. Colares, Mustafa T. Durmuş, 2021-07-27 To avoid trade bargain erosion countries involved in large scale bilateral or regional trade arrangements must reconcile preserving close economic ties and supply chains with the need to dynamically adjust to new opportunities with other partners Using the growing deterioration of the European Union Turkey Customs Union as an illustration to a new model of trade agreement restructuring this well researched and deeply insightful book outlines and demonstrates how this trade arrangement can be successfully renegotiated thus providing expert practical guidance in a crucial area of trade law and policy that rarely receives the attention it deserves The book s novel framework features a clearly articulated legal foundation a transactional deployment strategy and a sequential negotiating approach applicable to bilateral and regional trade arrangements whose original terms no longer reflect the changed capabilities and interests of at least one of its parties The authors respond in detail to questions such as When should a country pursue bargain rebalancing How should trade diplomats pursue renegotiation and or new partnerships legally and transactionally Given that free trade agreements keep each country s trade sovereignty mostly intact under which circumstances should a country ever consider entering a customs union How may free trade agreements help countries address trade imbalances while enhancing supply chain resilience What are the limits to WTO litigation as an effective market barrier opening tool How should trade agreement restructuring be deployed as a path to further trade liberalization In depth attention is paid to identifying and investigating trade arrangements that are ripe for renegotiation and assessing sources of domestic and external support for or against renegotiating such bargains This book s model of international trade agreement restructuring fits well with emerging thinking on greater trade diversification and supply chain resilience The authors provide a clear actionable approach for considering and conducting the renegotiation of trade deals For these reasons this book will be welcomed by trade lawyers supply chain executives economists government officials and academics who are grappling with rising economic frictions in the fault lines of national sovereignty economic interdependence and the limits of current trade arrangements
