**Rethinking Institutional Analysis and Development** Vincent Ostrom, David Feeny, Hartmut Picht, 1988 *Rethinking Institutional Analysis and Development* Vincent Ostrom, David Feeny, Hartmut Picht, 1989 Challenging Institutional Analysis and Development Paul Dragos Aligica, Peter J. Boettke, 2009-06-02 This important volume presents a systematic analysis of the Bloomington Institutional and Development IAD Research Program that developed a unique and extremely successful combination of interdisciplinary theoretical and empirical approaches for the study of social sciences *Who Owns the Environment?* Peter J. Hill, Roger E. Meiners, 1998-08-20 The past several decades have witnessed a growing recognition that environmental concerns are essentially property rights issues Despite agreement that an absence of well defined and consistently enforced property rights results in the exploitation of air water and other natural resources there is still widespread disagreement about many aspects of America s property rights paradigm The prominent contributors to *Who Owns the Environment* explore numerous theoretical and empirical possibilities for remedying these problems An important book for environmental economists and those interested in environmental policy **Effective Governance and the Political Economy of Coordination** Dan Greenwood, 2023-08-09 This book provides a conceptual and methodological approach for researchers evaluating governance and policy in the face of complexity and demonstrates the application of this approach across different governance and policy contexts It fills a significant gap in the literature on governance and proposes a theoretical focus on coordination to enable the assessment of multi tier cross sector governance institutions and policy It also introduces a range of applications for the proposed approach including two case studies of governance and policy for the built environment and health services The book introduces analyses and draws from a range of perspectives in political economy political science policy analysis and evaluation It also engages with longstanding debates in political economy about states and markets which are largely overlooked by political science analyses of coordination challenges in governance The book will appeal to scholars and students of governance public policy and political science **Evolution and Design of Institutions** Christian Schubert, Georg Von Wangenheim, 2006-09-27 This book comprises nine papers approaching designed institutions and their interplay with spontaneous institutions from various angles While the evolution of spontaneous institutions is quite well understood in economic thinking the development of consciously designed institutions has been examined much less In new institutional economics public choice and law and economics the interaction between changing preferences and spontaneously evolving institutions on the one hand and the evolution of designed institutions as e g legal systems on the other hand has largely been ignored A number of top class international contributors have been assembled to study this phenomenon including Viktor Vanberg Bruno Frey Elinor Ostrom and Francesco Parisi **CONTEMPORARY DEBATES IN PUBLIC ADMINISTRATION** ALKA DHAMEJA, 2003-01-01 Public administration is reeling under complex challenges and pressures in the face of the changing trends in liberalization privatization and

globalization As a pertinent area of social sciences it is in search of a new identity in the form of theoretical bases conceptual clarity and contextual applicability The development of the discipline is characterized by failed semi developed and recycled narratives which are unable to provide any well defined epistemological parameters Whatever one finds in the form of conceptual and applied growth in public administration especially pertaining to the Third World appears to be borrowed imitated and implemented out of context The discipline of public administration must therefore reinvent itself in the wake of new developments in the areas of theory building organizational reforms information technology participatory development corporate ethics humane governance responsive administration non state organizations and administrative capability This book makes an attempt to grapple with some of these contemporary concerns in order to generate a debate on the impact of globalization on public administration A collection of diverse topics that address various facets of public administration the overall thrust is on developing indigenous approaches for meeting the growing demands of the changing scenario The wide range of issues covered in the volume makes for a comprehensive view of the various perceptions within the discipline of public administration The book will be of immense use to students academicians researchers policy makers and practitioners in public administration *The Handbook of Social Capital* Dario Castiglione, Jan W. van Deth, Guglielmo Wolleb, 2008-04-17

Social capital is a relatively new concept in the social sciences In the last twenty or so years it has come to indicate that networks of social relationships represent a resource for both the individual and society since they provide support for the individual and facilitate collective action Although this is not an entirely new idea the more systematic way in which social capital captures such an intuition has created a new theoretical paradigm and helped to develop a series of innovative research programmes in politics economics and the study of human well being The concept has gained currency beyond academia extending its influence to political and policy making circles at local national and international levels It has also affected the way in which social surveys are conceived and public policies assessed As the idea of social capital has spread the literature about it has increased exponentially After twenty years of rapid expansion it is time for a more considered and critical assessment of how the original concept has been adapted and refined and how successful its application has been The Handbook of Social Capital intends to do precisely that It offers a state of the art view of discussions about the concept of social capital and the way in which it has been applied in empirical research The organization of the Handbook reflects this intention by focusing on conceptual development and analysis in the first part by identifying two main areas of research in which social capital has favoured the development of new and influential research programmes political participation in democratic societies and economic development and by exploring the more normative and policy oriented consequences of social capital All chapters comprising the volume were specifically written for the Handbook by some of the main experts in the fields The book provides authoritative and innovative introduction to the study of social capital **Collaboration for Sustainability and Innovation: A Role For Sustainability Driven by the Global South?** Diego A. Vazquez-Brust, Joseph

Sarkis, James J. Cordeiro, 2013-11-20 A number of arguments are made by an international group of authors in this thought provoking book about an understudied and socially important context A future in which financial wealth transfers across the North South divide from richer to poorer countries is far from sufficient for the relief of poverty and the pursuit of sustainability Caution must be taken when growth is achieved through the liquidation of the natural wealth of poorer nations in order to maintain a global economic status quo Neither poverty reduction nor sustainability will ultimately be achieved The financial collapse and social upheaval that might result will make the most recent economic downturn look trivial by comparison What is more urgently needed instead as argued in this book is collaboration for sustainability and innovation in the global South especially building on models originally developed in the South that are transferable to the North In pursuit of a sustainable and more equitable future the book examines such topics as Cross Border Innovation in South North Fair Trade Supply Chains Potential Pollution Prevention Programs in Bangladesh Digital Literacy and Social Inclusion in the South through Collective Storytelling and Eco innovation at the Bottom of the Pyramid Many of these stories and have not been told and need greater visibility The book contributes in a meaningful way to the discussion of how innovation and sustainability science can benefit both sides in South North innovation collaborations It provides useful introduction to the topics as well as valuable critiques and best practices This back and forth flow of ideas and innovation is itself new and promising in the modern pursuit of a fair and sustainable future for all regions of our planet Institutions in Transition

Peter Ho, 2005-07-21 China's urban sprawl has led to serious social cleavages Unclear land and property rights have resulted in an uneasy alliance between real estate companies and local authorities with most willing to strike illegal deals over land The results have been devastating Farmers live in fear that the land they till today will be gone tomorrow while urban citizens are regularly evicted from their homes to make way for new skyscrapers and highways These shocking incidents underscore the urgency of the land question in China The recent conviction of the Chinese Minister for Land Resources and the forced evictions that have led to the injury and death of ordinary Chinese citizens highlight the case for land reform Against this backdrop many scholars criticize China's lack of privatization and titling of property This monograph however demonstrates that these critically depend on timing and place Land titling is imperative for the wealthier regions yet may prove detrimental in areas with high poverty The book argues that China's land reform can only succeed if the clarification of property rights is done with caution and ample regard for regional variations **The Ideas of Ronald H. **Landscape, Process and Power** Serena Heckler, 2012 In recent years the field of study variously called local indigenous or traditional environmental knowledge TEK has experienced a crisis brought about by the questioning of some of its basic assumptions This has included reassessing notions that scientific methods can

accurately elicit and describe TEK or that incorporating it into development projects will improve the physical social or economic well being of marginalized peoples The contributors to this volume argue that to accurately and appropriately describe TEK the historical and political forces that have shaped it as well as people s day to day engagement with the landscape around them must be taken into account TEK thus emerges not as an easily translatable tool for development experts but as a rich and complex element of contemporary lives that should be defined and managed by indigenous and local peoples themselves
