Conference,2005 *The Venetian Discovery of America* Elizabeth Horodowich,2018-09-06 Few Renaissance Venetians saw the New World with their own eyes As the print capital of early modern Europe however Venice developed a unique relationship to the Americas Venetian editors mapmakers translators writers and cosmographers represented the New World at times as a place that the city s mariners had discovered before the Spanish a world linked to Marco Polo s China or another version of Venice especially in the case of Tenochtitlan Elizabeth Horodowich explores these various and distinctive modes of imagining the New World including Venetian rhetorics of firstness similitude othering comparison and simultaneity generated through forms of textual and visual pastiche that linked the wider world to the Venetian lagoon These wide ranging stances allowed Venetians to argue for their different but equivalent participation in the Age of Encounters Whereas historians have traditionally focused on the Spanish conquest and colonization of the New World and the Dutch and English mapping of it they have ignored the wide circulation of Venetian Americana Horodowich demonstrates how with their printed texts and maps Venetian newsmongers embraced a fertile

tension between the distant and the close In doing so they played a crucial yet heretofore unrecognized role in the invention of America Subject Guide to Books in Print, 1997 **Numbered Lives** Jacqueline Wernimont, 2019-01-01 A feminist media history of quantification uncovering the stories behind the tools and technologies we use to count measure and weigh our lives and realities Anglo American culture has used media to measure and quantify lives for centuries Historical journal entries map the details of everyday life while death registers put numbers to life's endings Today we count our daily steps with fitness trackers and quantify births and deaths with digitized data How are these present day methods for measuring ourselves similar to those used in the past In this book Jacqueline Wernimont presents a new media history of western quantification uncovering the stories behind the tools and technologies we use to count measure and weigh our lives and realities **Numbered Lives** is the first book of its kind a feminist media history that maps connections not only between past and present day quantum media but between media tracking and long standing systemic inequalities Wernimont explores the history of the pedometer mortality statistics and the census in England and the United States to illuminate the entanglement of Anglo American quantification with religious imperial and patriarchal paradigms In Anglo American culture Wernimont argues counting life and counting death are sides of the same coin one that has always been used to render statistics of life and death more valuable to corporate and state organizations **Numbered Lives** enumerates our shared media history helping us understand our digital culture and inheritance **ONCOLOGY INTO SYMSAPIENS 1530** Augustin Ostace, 2025-04-04 For the understanding and analysis in depth biology of this dramatic disease in Human Sapiens it is necessary to be prepared not only in two or three or four generations of searchers and researchers but to the entire existence and essence of the Species Sapiens as a wholeness of its Anatomy and Embryology of its Physiology of its Pathology and subsequently of its evolutionary and revolutionary of its Anatomy in Thinking in Rethinking and in Creativity as Anatomology and of its Anatom Ontology Logos of Human Sapiens Anatomy and Ontology of the same Human Sapiens Anatomy have made out this uniqueness of Genesis and Evolution GENEVO of Biology of Planetary Earth by adding to GENEVO also the powerful of Selection Multi polar Selection i.e. the Selection acting and reacting at all levels of the organization of matter naming here Elementary Particles Atoms Biomolecules Cell Tissue Organs Organism Therefore one must say that the concept of GENEVO Genesis Evolution must be completed anytime and in any circumstances of searching and researching by the basic concept of Nature Biology of the SELECTION actually the MULTIPOLARE SELECTION i.e. repeating the one acting and reacting at all level of a living integrated system of Elementary Particles of Atom of Molecule of Cell of Tissue of Organs and final of Organism therefore GENEVO is becoming a GENEVOSEL Through the triadic conceptologic of GENEVOSEL it is possible to explain at least theoretically the Fine Tuning concept acting and reacting at all level of Matter of Form and of Energy We assume that the Pathology of Oncology in Human Sapiens into which any individuality or any Human Being is totally subdued to its Species therefore Human Being is also Human Sapiens Being This dramatic Tumor pathology has been the battlefield of

Medieval Marvels and Fictions in the Latin West and Islamic World Michelle Karnes, 2022-07-12 A cross cultural study of magical phenomena in the Middle Ages Marvels like enchanted rings and sorcerers stones were topics of fascination in the Middle Ages not only in romance and travel literature but also in the period s philosophical writing Rather than constructions of belief accepted only by simple minded people Michelle Karnes shows that these spectacular wonders were near impossibilities that demanded scrutiny and investigation This is the first book to analyze a diverse set of writings on such wonders comparing texts from the Latin West including those written in English French Italian and Castilian Spanish with those written in Arabic as it works toward a unifying theory of marvels across different disciplines and cultures Karnes tells a story about the parallels between Arabic and Latin thought reminding us that experiences of the strange and the unfamiliar travel across a range of genres spanning geographical and conceptual space and offering an ideal vantage point from which to understand intercultural exchange Karnes traverses this diverse archive showing how imagination imbues marvels with their character and power making them at once enigmatic creative and resonant Skirting the distinction between the real

and unreal these marvels challenge readers to discover the highest capabilities of both nature and the human intellect
Karnes offers a rare comparative perspective and a new methodology to study a topic long recognized as central to medieval culture

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts.

The Secret History is a brilliant and thrilling novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
