Redefining Smart Sustainable Cities although has been conceived much earlier and has been continually refined over and over the recent announcement of 100 Smart Cities by the Hon ble Prime Minister of India Mr Narendra Modi and the spate of events thereafter has made the release of the book rather accelerated It unfolds for its readers the thus far little known story about smart cities that have existed since centuries and what the existing cities can learn from them The author has taken interesting habitat traits and important data points right from prehistoric times to the modern day Parallels have been drawn from various parts of the globe cutting across time right from the Stone Age to the modern Digital Age The authors have critically analyzed and shown that since the problems had the same set of root causes the solutions can also lie among some of the thriving and sustainable modern day smart cities of the world In fact through careful extrapolation of habitat aspects the author has shown that many of the sustainable smart cities today have undergone similar deterioration for at least some time before these cities were restored and made truly smart Each chapter weaves into it text and explanations written in a direct and simple manner and is interspersed with interesting pictures drawings infographics and facts and figures directly relevant to the topic under discussion This makes the book a very engaging and interesting read **Reconsidering Trenton** Steven M. Richman, 2014-01-10

Reconsidering Trenton like the state of New Jersey is often maligned these days but there was a time when Trenton was the fiftieth largest city in the United States and boasted worldwide leaders in the iron and steel rubber and pottery industries Like many cities of its comparative size and prowess that came of age in the Industrial Revolution Trenton diminished in the aftermath of World War II and has become for many one of the lost cities a place of lessened population abandoned houses and shuttered factories Featuring a series of meditative explorations on the essence of the American post industrial city through the prism of Trenton this book explores the city s history architecture parks factories and neighborhoods through text and image highlighting the importance of such post industrial cities **Rethinking the French City** Monique Yaari, 2008 This book considers the post 68 French city as a prism through which to understand the contemporary world and France s specificity within it The reader is invited to join in a series of exploratory strolls through texts buildings and neighborhoods and thereby share in a process of discovery Zeroing in on international architectural debates a range of key Parisian exhibitions and major urban design decisions in Paris Montpellier and Lille Yaari unravels an often acerbic French critique of both modern and postmodern positions on culture technology and the city This critique stemming from the competing claims of national identity the ethics of architecture and display and an anthropologically informed revision of prevailing views on the city has sparked in France a passionate search for a third path which the author proposes to term *apres moderne* Breaking new ground in the field of

French Studies through cultural analysis of the contemporary city this study brings new insight to scholars and professionals in architecture and urbanism and will interest all others for whom France and cities in general hold special appeal Monique Yaari is a specialist of twentieth century French literary and cultural studies For the past decade her research has focused on the contemporary city The author of *Ironie paradoxale et ironie poetique sur les traces de Gide dans Paludes Summa* Publications 1988 as well as numerous articles on contemporary French art and architecture Professor Yaari teaches in the Culture and Civilization option of the Department of French and Francophone Studies at The Pennsylvania State University

The Importance of Place Borut Juvanec, Amir Pašić, 2016-04-26 How do we value historic urban landscape in order to intervene within it as designers This is the central question posed in this volume and is tackled by its 16 essays which investigate different facets of value as bases of building and design practices on a range of spatial scales and brought about by a variety of historical circumstances While the modernist metanarrative of universalism propagated functionalism and through it biological and psychological motives of design activity contemporary building practices are based on more complex and diverse patterns of values that range from cultural to market driven Researched reconstructed and critically assessed the different case studies brought together here reveal the many possible shades of the importance of place with which architects urban planners and city officials work today in the Southern European context Marked in recent decades by social and political transition and economic hardship the reality of this region's cities caused repeated revisions of value systems in all spheres of public life making it thus a particularly intriguing context to observe in these terms In this sense these essays will be of interest to university scholars in architecture art history urbanism and planning in addition to practicing designers and public officials who encounter problems of value definitions in their everyday working tasks related to the shaping and management of contemporary urban space

Beware of smart people! Redefining the smart city paradigm towards inclusive urbanism Stollmann, Jörg, Wolf, Konrad, Brück, Andreas, Frank, Sybille, Million, Angela, Misselwitz, Philipp, Schlaack, Johanna, Schröder, Carolin, 2016-11-30 The Smart City paradigm aims at resource efficient urban development by means of ICT implementation Cities where we work and conduct our research are building Smart City strategies and that research institutions increasingly fund research into the development of smart infrastructure and Smart Cities are considered a radical paradigm shift and motors of technological innovation economic growth higher quality of life efficiency and risk control in the face of shrinking resources and impending climate change This smartification is contrasted by increasing calls by civil society and urban social movements for more encompassing inclusion in decision making New urban actors are acquiring agency through situated knowledge local expertise social networking and cooperation and collaboration skills Behind these movements a seemingly parallel discourse to the Smart City paradigm is gaining ground the discourse of the commons Commons are defined as the combination of resources people and practices resources which are defined and managed by a group of people of commoners and a practice of commoning that looks after takes care for and

fosters this resource without exhausting it Commonsing is a practice that seems closer than any other practice to a sustainable way of life Are these two discourses the discourse on the Smart City and the discourse on the urban commons irreconcilable antagonists or do they share a common ground which needs to be uncovered developed and advocated This question is by no means merely theoretical It is also a very practical question which pertains to the management and distribution of the resources we depend on It is a very political question as it demands negotiation and the taking of sides And it is an ethical question in that it relates to how we respect and stand up for each other our fellow human beings and also the non human nature for which we are responsible The essays and transcripts of the symposium Beware of Smart People want to make a first contribution and stimulate future research in the field Das Paradigma der Smart City ist Ausdruck der Ambition Stadtentwicklung durch die Anwendung von IKT effizient und Ressourcen schonend zu gestalten St dte in denen wir arbeiten und ber die wir forschen entwickeln Smart City Strategien und Forschungsf rderung spezialisiert sich zunehmend auf die Entwicklung smarter Infrastrukturen und Steuerungsmechanismen Smart Cities werden als radikaler Paradigmenwechsel gelesen und als Motoren technologischer Entwicklung konomisches Wachstum h here Lebensqualit t Effizienz und Risikokontrolle angesichts abnehmender Ressourcen und drohenden Klimawandels Dieser Smartifizierung stehen die zunehmenden Forderungen zivilgesellschaftlicher Gruppen und sozialer Bewegungen f r mehr und umfassendere Einbindung in Entscheidungsprozesse entgegen Neue urbane Akteure werden zu Agenten indem sie ihre Erfahrungswissen ihre lokalen Kenntnisse ihre sozialen Netzwerke und F higkeiten zur Kooperation und Kollaboration einbringen Hintergrund diese Bewegungen ist ein augenscheinlich paralleler Diskurs zur Smart City welcher sich zunehmend Geh r verschafft der Diskurs ber die Gemeing ter die Commons Commons werden definiert als das Zusammenspiel von Ressourcen Menschen und Praktiken Ressourcen die von einer Gemeinschaft den Commonern definiert und verwaltet werden und eine Praxis des Commonsing welche die Ressource schonend bewirtschaftet ohne sie zu verbrauchen In diesem Sinne scheint Commonsing eine Praxis die einer nachhaltigen Lebensweise am n chsten kommt Sind diese zwei Diskurse der Diskurs ber die Smart City und jener ber die urbanen Gemeing ter unvereinbare Antagonisten oder teilen sie Gemeinsamkeiten welche offen gelegt weiter entwickelt und verfechtet werden sollten Diese Frage ist keineswegs eine rein theoretische Sie ist eine sehr praktische Frage da sie auf das die Verteilung und das Management lebenswichtiger Ressourcen zielt Sie ist eine politische Frage da sie Auseinandersetzung und Parteinahme einfordert Und sie ist eine ethische Frage denn sie fordert gegenseitigen Respekt und Einsatz ein f r unsere Mitmenschen sowie f r die nichtmenschliche Natur f r die wir Verantwortung tragen Die Texte und Aufzeichnungen des Symposiums Beware of Smart People wollen hierzu einen Beitrag leisten und zuk nftige Forschungsvorhaben stimulieren

Rethinking English in Schools Viv Ellis,Carol Fox,Brian Street,2007-11-20 Why should young people study a subject called English This question lies at the heart of this fascinating monograph which brings together the diverse perspectives of many leading thinkers about English and literacy education This meticulously

researched and well written collection takes as its starting point the importance of the history of the subject in the formation of its constitution and its boundaries First and foremost it proposes that questions of aims and values have informed these choices Equally it suggests that returning to these educational questions helps us to understand curriculum and pedagogy in complex ways that a simple focus on content and methods neglects Curriculum and pedagogy bring learners teachers institutions and the wider society into the debate

Engine of modernity Masha Belenky, 2020-02-28 This electronic version has been made available under a Creative Commons BY NC ND open access license Engine of modernity examines the connection between public transportation and popular culture in nineteenth century Paris through a focus on the omnibus a horse drawn vehicle of urban transport The omnibus generated innovations in social practices by compelling passengers of diverse backgrounds to interact within the vehicle's close confines The arrival of the omnibus in the streets of Paris and in the pages of popular literature acted as a motor for a fundamental cultural shift in how people thought about the city its social life and its artistic representations At the intersection of literary criticism and cultural history Engine of modernity argues that the omnibus was a metaphor through which writers and artists explored evolving social dynamics of class and gender meditated on the meaning of progress and change and reflected on one's own literary and artistic practices

Reconsidering Colonial Heritage in West African Cities Krzysztof Górny, 2023-12-12 The material heritage of the colonial era is built into Africa's cities from their urban layouts to their architecture monuments and street names This book discusses the varying responses to colonial heritage in West African cities with a particular focus on the case studies of Praia in Cape Verde Dakar in Senegal and Banjul in The Gambia Europeans tended to focus on cities as centres of administration and they were often both the starting points for settlement and the locations in which power was formally handed over to new African governments Colonialism in Praia Dakar and Banjul was abolished at different times under different colonial powers Portuguese French and British and amongst vastly different conditions of unrest Based on extensive original research this book demonstrates that the contemporary approach to the contentious issue of urban colonial heritage is often

determined by metropolis colony relationship before decolonisation postcolonial diplomatic relations as well as present day political decisions The book uncovers a rich relationship between politics and urban space and between new and old Combining insights from political sciences history critical geography heritage studies and urban planning this book will be of interest to a wide range of researchers
