A. Mangan, Fan Hong, 2013-10-18 In 2008 as few in the world are unaware China was host to the world via the Beijing Olympics The world watched the metamorphosis of Beijing from insecure capital to confident metropolis but aware of it or not the world was also watching the symbolic assertion via the Games of a rising superpower The Pacific Rim will be the stage on which China initially displays its new hegemonic intentions aspirations and ambitions Thus in Post Beijing 2008 the political economic and cultural impact of Beijing 2008 on the geopolitical future of the Pacific Rim will be discussed This perspective analysed by some of the most distinguished academic commentators from some of the world's leading universities who are closely associated with the Pacific Rim East and West is original in focus and the analysis is pregnant with political possibilities This book was previously published as a special issue of the International Journal of the History of Sport **The Historical Sociology of Japanese Martial Arts** Raul Sanchez Garcia, 2018-10-03 Winner of the Norbert Elias Book Prize 2020 This is the first long term analysis of the development of Japanese martial arts connecting ancient martial traditions with the martial arts practised today The Historical Sociology of Japanese Martial Arts captures the complexity of the emergence and development of martial traditions within the broader Japanese Civilising Process The book traces the structured process in which warriors

practices became systematised and expanded to the Japanese population and the world Using the theoretical framework of Norbert Elias's process sociology and drawing on rich empirical data the book also compares the development of combat practices in Japan England France and Germany making a new contribution to our understanding of the socio cultural dynamics of state formation Throughout this analysis light is shed onto a gender blind spot taking into account the neglected role of women in martial arts The Historical Sociology of Japanese Martial Arts is important reading for students of Socio Cultural Perspectives in Sport Sociology of Physical Activity Historical Development of Sport in Society Asian Studies Sociology and Philosophy of Sport and Sports History and Culture It is also a fascinating resource for scholars researchers and practitioners interested in the historical and socio cultural aspects of combat sport and martial arts Game Day and God Eric Bain-Selbo, 2009 Game Day and God Football Faith and Politics in the American South takes seriously the often stated assertion that college football in the South is a religion To this end Eric Bain Selbo draws upon a wide range of theoretical approaches in religious studies and cultural criticism He also relies upon field research on several campuses in the Southeastern Conference where he interviewed fans and experienced game day Consequently the author is able to make the case that college football does function religiously for many people in the South In addition the author introduces key concepts and theories of religion and culture to a general audience Game Day and God also recounts the role that college football has played in Southern history and culture Going back as far as the Civil War the work explains the cultural meaning of college football in the South delivering a much needed critical perspective to the subject Scholars of religion will find the work a compelling extension of key concepts and theories to an otherwise secular activity Scholars of American culture and sports will find the work to be an interesting case study one that unlike much work in the area focuses our attention on the religious dimension of the phenomenon of sport in American culture And general readers will find that college football or any sport can be much more than they imagined as well as discover important theories with which to make sense of the complexity of our daily lives Book jacket The Hermeneutical Spirit Amos Yong, 2017-11-06 In the contemporary biblical studies climate proposals regarding the theological interpretation of Scripture are contested particularly but not only because they privilege encourage and foster ecclesial or other forms of normative commitments as part and parcel of the hermeneutical horizon through which scriptural texts are read and understood Within this context confessional approaches have been emerging including some from within the nascent pentecostal theological tradition This volume builds on the author's previous work in theological method to suggest a pentecostal perspective on theological interpretation that is rooted in the conviction that all Christian reading of sacred Scripture is post Pentecost meaning after the Day of Pentecost outpouring of the Spirit on all flesh in anticipation of the coming reign of God In that respect such a pentecostal interpretative perspective is not parochially for those within the modern day movement bearing that name but is arguably apostolic in following after the scriptural imagination of the earliest disciples of Jesus the messiah and therefore has

ecumenical and missional purchase across space and time The Hermeneutical Spirit thus provides close readings of various texts across the scriptural canon as a model for Christian theological interpretation of Scripture suitable for the twenty first century global context
