Foster,Brian Wharf,2011-11-01 People Politics and Child Welfare in British Columbia traces the evolution of policies and programs intended to protect children in BC from neglect and abuse Analyzing this evolution reveals that child protection policy and practice has reflected the priorities of politicians and public servants in power With few exceptions efforts to establish effective programs have focused on structural arrangements staffing responsibilities and rules to regulate the practice of child welfare workers Contributors to this book conclude that these attempts have been unsuccessful thus far because they have failed to address the impact of poverty on clients The need to respect the cultural traditions and values of First Nations clients has also been ignored Effective services require recognizing and remedying poverty s impact establishing community control over services and developing a radically different approach to the day to day practice of child welfare workers People Politics and Child Welfare in British Columbia provides a crucial assessment of the state of child welfare in the province Practitioners scholars and students in social work child and youth care education and other human service professions will find this book particularly important

practice Practice innovations span the range of child welfare services including prevention protection and out of family care The contributors describe the child welfare context in each of their particular jurisdictions producing an addition to the literature comparing child welfare in different countries Moreover existing books on the subject are primarily descriptive and examine overall child welfare legislation and policy The work adopts an analytical approach proposing policies and focusing on the largely unexamined topic of excellence in child welfare practice

Manufacturing 'Bad Mothers' Karen Swift, 1995-04-27 Child neglect has been characterized over the past century as a problem of deficient care of children by mothers A complex and punitive child welfare system has emerged based on a view that the children of these mothers require legally sanctioned rescue by those better suited to care for them Karen Swift challenges both the accepted view of child neglect and the present official response to it Beginning from a critical theoretical perspective she argues that our usual perceptions of neglect hide and distort important social realities This distorted perception only serves to reproduce the conditions of poverty marginalization and violence in which these families live The current child welfare system far from rescuing neglected children helps instead to ensure the continuation of their problems and the outcome is especially dramatic and damaging in Aboriginal communities Swift explores the historical organizational and professional dimensions within which child neglect becomes a visible social reality Also examined are relations of class race and gender embedded in our usual understanding of child neglect The discussion shows how these relations are continually reproduced through ordinary everyday work practices of social workers and others who deal with mothers accused of child neglect The good parent model through which help and authority are apparently merged continually indicates that the mothers are unworthy of help Their own experience disappears as they are faced with procedures designed to examine their present suitability for the job of parenting The same procedures produce children as actually being helped through the exertion of state authority over their parents but most of the help provided children is theoretical and some of it is quite damaging Swift also looks at both current and alternative notions of helping families Finally she argues that each of us can help to transform oppressive social realities
