## **Rethinking Security In East Asia Identity Power And Efficiency:**

Rethinking Security in East Asia J. J. Suh, Peter J. Katzenstein, Allen Carlson, 2004 Is East Asia heading towards war This text makes a case for a new theoretical approach called analytical eclecticism by the authors to the study of Asian security

ASEAN and the Institutionalization of East Asia Ralf Emmers, 2011-09-28 This book examines the evolving multilateral security arrangements in East Asia with a focus on the role of the Association of Southeast Asian Nations ASEAN It explores the function and relevance of ASEAN in East Asia's emerging institutional security landscape These issues have direct implications for the future of the ASEAN Security Community the relevance of the ASEAN cooperative model to wider regional arrangements and finally for the further institutionalization of great power relations within these multilateral structures The book highlights ASEAN's successes and shortcomings It also considers ASEAN led institutions in the wider region and goes on to analyse alternative approaches to regionalism including the China Japan South Korea Trilateral Summit Overall it assesses how the various initiatives are likely to develop concluding that ASEAN despite its shortcomings is likely to continue to play a key role

Security Politics in the Asia-Pacific William T. Tow, 2009-10-15 In this book leading experts present research on the evolution of key issues in Asian security

**Changing Security Dynamics in East Asia** Elena Atanassova-Cornelis, Frans-Paul van der Putten, 2016-04-30 This original and detailed collection explores how regional actors deal with uncertainties that are inherent to the current geopolitical situation in East Asia The contributors collectively demonstrate that strategic uncertainty has become a major factor in the shaping of the security order in East Asia

**Globalisation and Economic Security in East Asia** Helen E. Nesadurai, 2012-09-11 What is the relationship between globalization and economic security Globalisation and Economic Security in East Asia is an incisive new engagement with this important question that uses detailed conceptual exploration and fresh empirical analysis Viewing traditional neorealist conceptions of economic security as overly narrow this new study suggests that any conception of economic security in the contemporary era needs to also pay close attention to the nature of global capitalism and the insecurities it generates for societies and individuals This uniquely open ended approach to conceptualizing economic security is supported by the East Asian experience The country case studies included here reveal that while economic security has largely been posed as one of ensuring sustainable economic growth and equitable social development particularly following the 1997 to 1998 Asian financial crisis other more realist conceptions of economic security have not become irrelevant This is also an exploration of whether and how national regional and multilateral institutions as well as non state regional mechanisms help policy makers meet the task of governing in the interests of economic security This book will be of great interest to all students and scholars of international relations international political economy of East Asia globalization and security studies

**Asia's New Institutional Architecture** Vinod K. Aggarwal, Min Gyo Koo, 2008-02-04 Can regional and interregional mechanisms better institutionalize the creasing complexity of economic and security ties among states in Nor east Southeast and South

Asia As the international state system undergoes dramatic changes in both security and trade relations in the wake of the Cold War's end, the Asian financial crisis and the attacks of September 11, 2001, this question is now of critical importance to both academics and policymakers. Still, little research has been done to integrate the analysis of both regional security and economic dynamics within a broader context that will give us theoretically informed policy insights. Indeed, when we began our background research on the origin and evolution of Asia's institutional architecture in trade and security, we found that many scholars had focused on individual subregions, whether Northeast, Southeast, or South Asia. In some cases, scholars examined links between Northeast and Southeast Asia, and the literature often refers to these two subregions collectively as Asia, artificially bracketing South Asia. Of course, we are aware that, as products of culture, economics, history, and politics, the boundaries of geographic regions change over time. Yet the rapid rise of India and its increasing links to East Asia, especially those formed in the early 1990s, suggest that it would be fruitful to examine both developments within each subregion as well as links across subregions.

*Peace and Security in the Asia-Pacific* Sorpong Peou, 2010-04-15

Demonstrating that none of the various perspectives under review has emerged as the clear winner in the struggle for theoretical hegemony in security studies, this book shows that eclectic perspectives like democratic realist institutionalism can better explain peace and security in the Asian Pacific. The Asian Pacific has emerged as one of the most important regions in the world, causing scholars to pay increased attention to the various challenges, old and new, to peace and security there. *Peace and Security in the Asia-Pacific: Theory and Practice* is a comprehensive critical review of the established theoretical perspectives relevant to contemporary peace and security studies in the light of recent experiences. Illuminating ongoing debates in the field, the book covers some 20 theoretical perspectives on peace and security in the Asian Pacific, including realist, liberal, socialist, peace, and human security, constructivist, feminist, and nontraditional security studies. The first section of the book discusses perspectives in realist security studies; the second part covers perspectives critical of realism. The author's goal is to assess whether any of the perspectives found in nonrealist security studies are capable of undermining realism. His conclusion is that each theoretical perspective has its strengths and weaknesses, leaving eclecticism as the best way to understand the region's dynamics.

**The United States and Northeast Asia** G. John Ikenberry, Chung-in Moon, 2007-12-24

Since World War II, the United States has played a crucial role in shaping Northeast Asian politics and economics. However, as this authoritative book shows, the Cold War's demise, September 11, and America's major strategic realignments have unleashed seismic changes in the region. China's rise, Japan's quest for a normal state, and the North Korean nuclear quagmire are also potential flashpoints. Collective memories of past aggression, as well as resurgent nationalism, further complicate regional dynamics. But hopeful signs abound: as deepening economic interdependence, expanding social and cultural exchanges, and the proliferation of informal economic, social, and cultural networks have improved the chances for a peaceful evolution to a liberal and stable region.

Traditionally the South China Sea SCS issue was not on the negotiation table between the United States and China However the tensions between the United States and China over the SCS have gradually simmered up to a strategic level Why and how did the SCS become a flashpoint between the United States and China Will the United States and China really go to war over the SCS Why did China adopt an assertive policy towards the South China Sea in the 2000s What will regional actors do in the face of this new normal of competition between China and the United States Will multilateral institutions in the Asia Pacific alleviate the potential conflicts over the SCS disputes How will US Chinese competition in the SCS shape the dynamics of Asian security This edited book addresses these questions systematically and theoretically with contributions from leading scholars in the field of US China relations and Asian security from the United States Australia the United Kingdom and Singapore It elevates the analysis of the SCS disputes from maritime and legal issues to the strategic level between the United States and China

emancipation of individuals and communities Leading Asia Pacific researchers combine to apply these frameworks to the most pressing issues in the region from the Korean peninsula to environmental change Indonesian conflict the war on terror and the plight of refugees The result is a sophisticated and accessible account of often neglected realities of marginalization in the region and a compelling argument for the empowerment and security of the most vulnerable
