*Medical Retina* Frank G. Holz, Richard F. Spaide, 2006-03-30 Although the treatment of retinal diseases remains one of the most challenging fields in ophthalmology the standard of knowledge has improved substantially over the past few years The insight into basic mechanisms of disease has been expanded and novel diagnostic and therapeutic strategies have been developed bridging the gap between laboratory and clinical science Internationally renowned experts present here a comprehensive review of the newest developments including Applications of optical coherence tomography Scanning laser ophthalmoscopy for fundus autofluorescence imaging Current and updated recommendations for photodynamic therapy in neovascular AMD Novel approaches including intravitreal injections of antiangiogenic substances This highly practical and clinically relevant volume will be of great value for all those involved with the treatment of retinal diseases such as age related macular degeneration diabetic retinopathy and chronic central serous chorioretinopathy *High Resolution Imaging in Microscopy and Ophthalmology* Josef F. Bille, 2019-08-13 This open access book provides a comprehensive overview of the application of the newest laser and microscope ophthalmoscope technology in the field of high resolution imaging in microscopy and ophthalmology Starting by describing High Resolution 3D Light Microscopy with STED and RESOLFT the book goes on to cover retinal and anterior segment imaging and image guided treatment and also discusses the development of adaptive optics in vision science and ophthalmology Using an interdisciplinary approach the reader will learn about the latest developments and most up to date technology in the field and how these translate to a medical setting High Resolution Imaging in Microscopy and Ophthalmology New Frontiers in Biomedical Optics has been written by leading experts in the field and offers insights on engineering biology and medicine thus being a valuable addition for scientists engineers and clinicians with technical and medical interest who would like to understand the equipment the applications and the medical biological background Lastly this book is dedicated to the memory of Dr Gerhard Zinser co founder of Heidelberg
