Film Review Index: 1950-1985 Patricia King Hanson, Stephen L. Hanson, 1986 **Neorealist Film Culture, 1945-1954** Francesco Pitassio, 2025-10-01 Unique truthful brutal Neorealism is often associated with adjectives stressing its peculiarities in representing the real its lack of antecedents and its legacy in terms of film style While this is useful when confronting auteurs such as De Sica Rossellini or Visconti it becomes problematic when examining a widespread cultural practice that realistic modes deeply affected This cultural production included filmmaking literature visual culture and photography as well as media discourses It was internally contradictory but fruitful inasmuch as its legacy influenced national culture for many decades to come The volume spotlights post war Italian film culture by locating a series of crossroads i e topics barely examined when discussing neorealism nation memory and trauma visual culture stardom and performance The aim is to deconstruct neorealism as a monument and to open up its cultural history *Sociology on Film* Chris Cagle, 2016-12-28 After World War II Hollywood s social problem films tackling topical issues that included racism crime mental illness and drug abuse were hits with critics and general moviegoers alike In an era of film famed for its reliance on pop psychology these movies were a form of popular sociology bringing the academic discipline s concerns to a much broader audience *Sociology on Film* examines how the postwar problem film translated contemporary policy debates and intellectual discussions into cinematic form in order to become one of the preeminent genres of prestige drama Chris Cagle chronicles how these movies were often politically fractious the work of progressive directors and screenwriters who drew scrutiny from the House Un American Activities Committee Yet he also proposes that the genre helped to construct an abstract discourse of society that served to unify a middlebrow American audience As he considers the many forms of print media that served to inspire social problem films including journalism realist novels and sociological texts Cagle also explores their distinctive cinematic aesthetics Through a close analysis of films like *Gentleman s Agreement* *The Lost Weekend* and *Intruder in the Dust* he presents a compelling case that the visual style of these films was intimately connected to their more expressly political and sociological aspirations *Sociology on Film* demonstrates how the social problem picture both shaped and reflected the middle class viewer s national self image making a lasting impact on Hollywood s aesthetic direction

Film, Lacan and the Subject of Religion

Steve Nolan, 2009-07-23. In their study of religion and film, religious film analysts have tended to privilege religion. Uniquely, this study treats the two disciplines as genuine equals by regarding both liturgy and film as representational media. Steve Nolan argues that in each case, subjects identify with a represented other which joins them into a narrative where they become participants in an ideological reality. Finding many current approaches to religious film analysis lacking, *Film, Lacan and the Subject of Religion* explores the film theory other writers ignore, particularly that mix of psychoanalysis, Marxism and semiotics often termed Screen theory that attempts to understand how cinematic representation shapes spectator identity. Using translations and commentary on Lacan not originally available to Screen theorists, Nolan returns to Lacan's contribution to psychoanalytic film theory and offers a sustained application to religious practice, examining several priest films and a real life case study to expose the way liturgical representation shapes religious identity. *Film, Lacan and the Subject of Religion* proposes an interpretive strategy by which religious film analysts can develop the kind of analysis that engages with and critiques both cultural and religious practice.

Reframing the Subject Kelly Ritter, 2016-01-23. Mental hygiene films developed for classroom use touted vigilance, correct behavior, morality and model citizenship. They also became powerful tools for teaching literacy skills and literacy based behaviors to young people following the Second World War. In this study, Kelly Ritter offers an extensive theoretical analysis of the alliance of the value systems inherent in mental hygiene films: class based ideals, democracy, patriotism with writing education, an alliance that continues today by way of the mass digital technologies used in teaching online. She further details the larger material and cultural forces at work in the production of these films, behind the scenes and their effects on education trends. Through her examination of literacy theory, instructional films, policy documents and textbooks of the late 1940s to mid 1950s, Ritter demonstrates a reliance on pedagogies that emphasize institutional ideologies and correctness over epistemic complexity and de-emphasize the role of

the student in his or her own learning process To Ritter these practices are sustained in today s pedagogies and media that create a false promise of social uplift through formalized education instead often resulting in negative material consequences

Donahue,1995 Invisible Cathedrals places Wilhelm Worringer in the foreground of discussions of Expressionism and German Modernism for the first time These essays not only reveal the complexities of his individual works such as Abstraction and Empathy 1908 and Form Problems of the Gothic 1911 they also examine his lesser known books and essays of the post World War I years the 1920s and beyond Invisible Cathedrals offers

both a basic introduction to Worringer's writings and their broad influence and a profound and detailed revisionist analysis of his significance in German and European Modernism. It also provides the most comprehensive bibliography to date of his own work and of the scattered criticism devoted to Worringer in different disciplines. Worringer's works were provocative, widely read, and often reprinted, and were highly influential among artists and writers in Germany. As a result, they both raised suspicion in his own academic discipline of art history and excited discussion in other diverse fields such as literary and social theory, psychology, and film theory. Worringer emerges here not solely as a scholarly commentator on the history of art but also as an activist scholar who engaged his historical criticism of other periods directly in the production of culture in his own time. Contributors are Magdalena Bushart, Neil H. Donahue, Charles W. Haxthausen, Michael W. Jennings, Joseph Masheck, Geoffrey Waite, and Joanna E. Ziegler.
