

Single Camera Production Techniques

With the introduction of more television channels, some specifically dedicated to drama, the single camera drama production has become very popular with broadcasters and audiences. This means that there should be more opportunities for people with skills in single camera techniques to gain employment in this sector. This might be in terms of technical skills in production or creative skills in developing ideas into production.

Learners will develop the organisational skills required for the planning and implementation of a single camera drama production. They will identify key production roles and take on one or more of these roles during their own production. Consideration of mise-en-scene, cinematography, lighting, use of sound and editing techniques will all be part of the skills learners develop through following this unit.

- P1** describe the features of single camera production with some appropriate use of subject terminology
- M1** explain the features of single camera production with reference to detailed illustrative examples and with generally correct use of subject terminology
- D1** **comprehensively explain** the features of single camera production with reference to **elucidated examples** and consistently using subject terminology correctly
