Growing Up with a Single Parent Sara McLanahan, Gary D. Sandefur, 2009-07-01 Nonwhite and white rich and poor born to an unwed mother or weathering divorce over half of all children in the current generation will live in a single parent family and these children simply will not fare as well as their peers who live with both parents This is the clear and urgent message of this powerful book Based on four national surveys and drawing on more than a decade of research *Growing Up with a Single Parent* sharply demonstrates the connection between family structure and a child's prospects for success What are the chances that the child of a single parent will graduate from high school go on to college find and keep a job Will she become a teenage mother Will he be out of school and out of work These are the questions the authors pursue across the spectrum of race gender and class Children whose parents live apart the authors find are twice as likely to drop out of high school as those in two parent families one and a half times as likely to be idle in young adulthood twice as likely to become single parents themselves This study shows how divorce particularly an attendant drop in income parental involvement and access to community resources diminishes children's chances for well being The authors provide answers to other practical questions that many single parents may ask Does the gender of the child or the custodial parent affect these outcomes Does having a stepparent a grandmother or a nonmarital partner in the household help or hurt Do children who stay in the same community after divorce fare better Their data reveal that some of the advantages often associated with being white are really a function of family structure and that some of the advantages associated with having educated parents evaporate when those parents separate In a concluding chapter McLanahan and Sandefur offer clear recommendations for rethinking our current policies Single parents are here to stay and their worsening situation is tearing at the fabric of our society It is imperative the authors show that we shift more of the costs of raising children from mothers to fathers and from parents to society at large Likewise we must develop universal assistance programs that benefit low income two parent families as well as single mothers Startling in its findings and trenchant in its analysis *Growing Up with a Single Parent* will serve to inform both the personal decisions and governmental policies that affect our children's and our nation's future **In Defense of**

Single-Parent Families Nancy E Dowd, 1999-05-01 An expert in family law and policy presents a thought provoking examination of the stereotypes realities and possibilities of single parent families Single parent families succeed Within these families children thrive develop and grow just as they do in a variety of family structures Tragically they must do so in the face of powerful legal and social stigma that works to undermine them As Nancy E Dowd argues here this stigma is founded largely on myths which result in harshly punitive social policies Dowd details the primary justifications for stigmatizing single parent families marshalling an impressive array of resources that portray a very different picture of them She describes them in all their forms with particular attention to the differential treatment given to never married and divorced single parents and to the impact of gender race and class Illustrating the harmful impact of current laws concerning divorce welfare and

employment Dowd makes a powerful case for centering policy around the welfare and equality of all children
