manslaughter in the shooting deaths of two Idaho game wardens Claude Jr was well liked by many including a sympathetic jury which rejected possible first or second degree murder verdicts Was it a case of self defense or outright murder Olsen who last wrote the popular Son a psychopath and his victims LJ 11 15 83 skillfully presents his viewpoint in a readable tale more reminiscent of Old West traditions than of the 1980s Recommended **Hunter-trader-trapper** ,1914 North Atlantic Maritime Cultures Raoul Andersen,2011-06-15 No detailed description available for North Atlantic Maritime Cultures **Albatrosses, Petrels and Shearwaters of the World** Derek Onley,Paul Scofield,2019-11-14 Famous for their size and elegance in flight albatrosses are familiar to anyone who has travelled through the southern oceans and are a flagship family of conservation concern However albatrosses are just one of several groups of pelagic birds those that visit land only to breed and spend the rest of their lives far from the coast soaring from ocean to ocean in a never ending search for food Mysterious and graceful these birds can present a formidable identification challenge to even the most experienced birder This book provides the answer the first comprehensive guide to pelagic birds the albatrosses petrels shearwaters storm petrels and diving petrels A total of 46 spectacular colour plates highlight key ID criteria of the birds in flight with close ups of diagnostic regions of the plumage The plates are accompanied by accurate distribution maps while the sparkling text brings the world of these amazing birds to life Several extremely rare species such as Beck s Petrel are illustrated for the first time while the New Zealand Storm petrel rediscovered as recently as 2004 is also included Sea watchers all around the world will find this superb field guide indispensable **Albatrosses, Petrels and Shearwaters of the World** Derek J. Atlantic Fisheries Stig S. Gezelius, 2012-12-06 This is a book about fishermen's reasons for obeying fisheries law. The fish harvesting industry has become subject to state interference to an increasing extent over the past twenty years. As natural resources become scarce and subsequent fisheries regulations abound, the question of law abidingness is brought to the public agenda. However, there is still little empirical data as regards the dynamics of compliance in this field, and this book aims to meet a demand for in-depth knowledge. The cases studied can be regarded as instances of economies dependent on the harvesting of natural resources for both household and the market, and the study aims to contribute to the building of more adequate theory on the dynamics of compliance in such economies. However, focusing on a specific type of setting seldom constitutes a safe escape route for getting away from more pervasive sociological questions, and it certainly does not in this case. As any attempt to explain social phenomena, this study is faced with the fundamental sociological question of how the acts of individuals can best be understood. The question concerns the interface between the individual and the collectivity between collective morality and self-interest. It thus deals with classical sociological issues such as the nature and regulatory capacity of group norms and sanctions and the forms and roles of rationality and strategic action. **Wild Cats of the**

World Luke Hunter, 2015-10-22 *Wild Cats of the World* provides detailed accounts for all 38 species of wild cat accompanied by magnificent artwork and stunning photography. From the rabbit-sized Black-footed Cat of southern Africa to bear-killing Amur tigers of the Russian Far East, the 38 members of the Cat Family include some of the world's most fascinating and magnificent species on earth. Supremely adapted for the kill, all cats are obligate carnivores; they survive only by preying upon other animals, and they have become one of evolution's most successful predatory lineages of mammals. *Wild Cats of the World* explores the spectacular Cat Family in unprecedented depth. Drawing on thousands of scientific papers and direct observations in the field, each species is profiled at length, covering all aspects of felid behaviour and ecology. The book is profusely illustrated with colour plates, black and white sketches showing important aspects of cat life, and accurate images of every species' skull. Over 400 spectacular photographs are included, many of them showing extremely rare and little-known cats published here for the first time. Each profile includes an up-to-date range map and explains the most current science on how cats are classified and related to each other, including some very recent surprising discoveries. Despite their great evolutionary success, the challenges facing felids in the modern world are profound. Only one, the ubiquitous domestic cat, does not require dedicated conservation action to ensure survival for the next century. The book also explores the current conservation issues facing wild cats, the increasingly perilous status of many species, and how they can be saved. [Rats and](#)
