Sustainable Development in World Investment Law Marie-Claire Cordonier Segger, Markus W. Gehring, Andrew Paul Newcombe, 2011-01-01 Sustainable development as defined by the World Commission on Environment and Development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs. More specifically sustainable development is a process of change that seeks to improve the collective quality of life by focusing on economically, socially and environmentally sound projects that are viable in the long term. Sustainable development requires structural economic change and the foundation of that change is investment. In developing nations with low levels of domestic savings investment predictably comes from abroad in the form of foreign direct investment. A large and ever expanding number of international investment agreements are in place to govern these transactions. While these accords seek to foster development while mitigating the risk involved in these types of investments many questions remain unresolved. This highly insightful book reflects the contributions of a variety of world renowned experts each of which is designed to provide the reader with valuable perspective on recent developments in investment law negotiations and jurisprudence from a sustainable development law perspective. It offers answers to pertinent questions concerning advancements in investment law including the negotiation of numerous regional and bilateral agreements as well as the increasing number of disputes resolved in the World Bank's International Centre for the Settlement of Investment Disputes (ICSID) from different developed and developing country perspectives. It lays out future directions for new treaty negotiations and dispute settlement proceedings as well as ongoing investment promotion efforts against a background of rapidly evolving international relationships between economic environment and development law. It focuses on key issues in investment laws which have emerged as priorities in the negotiation of bilateral and regional investment agreements and have been clarified through

recent decisions of the ICSID and other arbitral panel awards

Farthest North (The Complete Two-Volume Edition)
Fridtjof Nansen, 2022-11-13 In *Farthest North The Complete Two Volume Edition* Fridtjof Nansen invites readers on a breathtaking expedition through the uncharted Arctic wilderness. The work is not merely a travel narrative; it is a profound meditation on the human spirit's resilience amidst the relentless forces of nature. Nansen's vivid descriptions and meticulous observations bring the icy landscape to life while his literary style oscillates between scientific rigor and poetic introspection, reflecting the duality of exploration both as a physical journey and an existential quest. This detailed account of his 1893-1896 voyage aboard the *Fram* contributes significantly to Arctic exploration literature and offers insights into the early 20th-century scientific endeavors amidst a backdrop of political and environmental concerns. Fridtjof Nansen was a Norwegian explorer, scientist, and humanitarian whose diverse experiences profoundly influenced this masterpiece. With a background in zoology and deep-seated explorative instincts, his desire to push human limits led him to traverse regions previously deemed inhospitable. His achievements laid the groundwork for subsequent Arctic research, fueling interest in the poles and efforts towards advancing our understanding of the natural world. *Farthest North* is an essential read for anyone fascinated by adventure, exploration, or the intricate relationship between humanity and the environment. Nansen's articulate prose and rich narrative compel readers to reflect on the determination required to venture into the unknown, making this a timeless classic that resonates with adventurers and scholars alike.

Farthest North Fridtjof Nansen, 2022-01-04 The memoirs by Fridtjof Nansen tell about the epoch-making attempt to reach the North Pole, which ended in the farthest northern journey in the history of his time. Fridtjof Nansen had an extraordinary idea of how to get to the North Pole by ship. After discovering that the remains of the boat wrecked near Russian Siberia were found in the Northern Atlantic, he presumed that there should be some drift through the North Pole. So he developed a specifically customized ship that was frozen into an ice cube and crossed the Polar waters in this shape. The vessel did freeze successfully. Yet the journey was too long, and Nansen left the ship to reach the Pole on skis. He and his companion Hjalmar Johansen left for the pole but didn't manage to get it. However, they were the first people to achieve the farthest north latitude of 86° 13' 6" N. The story tells about this challenging journey through snow and waters, making a unique record of one of the most incredible northern expeditions.
