When Television was Young Paul Rutherford,1990-01-01 A decade after the first Canadian telecasts in September 1952 TV had conquered the country Why was the little screen so enthusiastically welcomed by Canadians Was television in its early years more innovative less commercial and more Canadian than current offerings In this study of what is often called the golden age of television Paul Rutherford has set out to dispel some cherished myths and to resurrect the memory of a noble experiment in the making of Canadian culture He focuses on three key aspects of the story The first is the development of the national service including the critical acclaim won by Radio Canada the struggles of the CBC s English service to provide mass entertainment that could compete with the Hollywood product and the effective challenge of private television to the whole dream of public broadcasting The second deals with the wealth of made in Canada programming available to please and inform viewers even commercials receive close attention Altogether Rutherford argues Canadian programming reflected as well as enhanced the prevailing values and assumptions of the mainstream The final focus is on McLuhan s Question What happens to society when a new medium of communications enters the picture Rutherford s findings cast doubt upon the common presumptions about the awesome power of television Television in Canada Rutherford concludes amounts to a failed revolution It never realized the ambitions of its masters or the fears of its critics Its course was shaped not only by the will of the government the power of commerce and the empire of Hollywood but also by the desires and habits of the viewers

Why the Jews? Robert Cherry,2021-04-15 At the beginning of the twentieth century Jewish immigrants upended Protestant control of vaudeville and the silent film industry This book rejects the commonly held explanations for this shift Jewish commercial acumen and their desire to assimilate Instead this book argues that the pleasure principle a positive view of bodily pleasures and sexuality that Jewish immigrants held gave rise to the role of Jewish influence on popular culture an influence still felt today After discussing the pivotal ascendancy of Jews in vaudeville and silent films Cherry explores the important role that Jewish performers and middlemen played in the evolution of popular culture throughout the century from stage and the big screen to radio television and the music industry He concludes with a broader discussion of Jewish values that helps explain the continued outsized role that Jews continue to play in American popular culture

A Word from Our Sponsor Cynthia B. Meyers,2013-12-01 During the golden age of radio from roughly the

late 1920s until the late 1940s advertising agencies were arguably the most important sources of radio entertainment. Most nationally broadcast programs on network radio were created, produced, written and/or managed by advertising agencies. For example, J. Walter Thompson produced Kraft Music Hall for Kraft; Benton and Young agency records of BBDO; Benton's contemporaneous trade publications and the voluminous correspondence between NBC and agency executives in the NBC Records at the Wisconsin Historical Society. Mediating between audiences' desire for entertainment and advertisers' desire for sales, admen combined showmanship with salesmanship to produce a uniquely American form of commercial culture. In recounting the history of this form, Meyers enriches and corrects our understanding not only of broadcasting history but also of advertising history, business history and American cultural history from the 1920s to the 1940s.

The Only Constant Is Change Ben Epstein, 2018-04-02. Over the course of American political history, political elites and organizations have often updated their political communications strategies in order to achieve longstanding political communication goals in more efficient or effective ways. But why do successful innovations occur when they do, and what motivates political actors to make choices about how to innovate their communication tactics? Covering over 300 years of political communication innovations, Ben Epstein shows how this process of change happens and why. To do this, Epstein follows an interdisciplinary approach, proposing a new model called the political communication cycle that accounts for the technological, behavioral and political factors that lead to revolutionary political communication changes over time. These changes, at least the successful ones, have been far from gradual, as long periods of relatively stable political communication activities have been disrupted by brief periods of dramatic and permanent transformation. These transformations are driven by political actors and organizations and tend to follow predictable patterns. Epstein moves beyond the technological determinism that characterizes communication history scholarship and the medium-specific focus of much political communication work. The book identifies the political communication revolutions that have in the United States led to four relatively stable political communication orders over history: the elite, mass broadcast and the current information orders. It identifies and tests three phases of each revolutionary cycle, ultimately sketching possible paths for the future. **The Only Constant is Change** offers readers and scholars a model and vocabulary to compare political communication changes across time and between different types of political organizations. This provides greater understanding of where we are currently in the recurring political communication cycle and where we might be headed.

Century of the Leisured Masses David George Surdam, 2015-01-02. American living standards improved rapidly during the twentieth century. The rise of leisure, both in terms of time allotted and in terms of consumption of leisure goods and services, was astounding. When social critic Thorstein Veblen penned *Theory of the Leisured Class*, Americans were just beginning to enjoy more and better leisure. In *Century of the Leisured Masses*, David George Surdam explores the growing role played by leisure in the daily lives of Americans and what factors contributed to this change.

NASA 50th Anniversary Proceedings: NASA's First 50 Years: Historical Perspectives Steven J. Dick,National Aeronautics and Space Administration,2010-07-07 On 29 July 1958 President Dwight D Eisenhower signed the National Aeronautics and Space Act creating the National Aeronautics and Space Administration NASA which became operational on 1 October of that year Over the next 50 years NASA achieved a set of spectacular feats ranging from advancing the well established field of aeronautics to pioneering the new fields of Earth and space science and human spaceflight In the midst of the geopolitical context of the Cold War 12 Americans walked on the Moon arriving in peace for all mankind Humans saw their home planet from a new perspective with unforgettable Apollo images of Earthrise and the Blue Marble as well as the pale blue dot from the edge of the solar system A flotilla of spacecraft has studied Earth while other spacecraft have probed the depths of the solar system and the universe beyond In the 1980s the evolution of aeronautics gave us the first winged human spacecraft the Space Shuttle and the International Space Station stands as a symbol of human cooperation in space as well as a possible way station to the stars With the Apollo fire and two Space Shuttle accidents NASA has also seen the depths of tragedy In this volume a wide array of scholars turn a critical eye toward NASA s first 50 years probing an institution widely seen as the premier agency for exploration in the world carrying on a long tradition of exploration by the United States and the human species in general Fifty years after its founding NASA finds itself at a crossroads that historical perspectives can only help to illuminate

Loss of Innocence Melvin E. Matthews Jr.,2019-05-01 America was certainly the big winner of World War II being the last major country intact Euphoria hubris and a naive self confidence became hallmarks of the people This hubris was dented a bit in the 1950s when scandals erupted around the TV quiz shows that made everyoe feel so smart and the U 2 spy incident of 1960 that revealed Americans were being lied to by the government The book argues that these two events began the credibility gap that engulfed the nation later in the 1960s and continues to haunt us to this day When the War ended the United States still had its economy infrastructure and industry intact Taking up where the British Empire left off the powerful new America expanded its influence around the globe Suddenly light years ahead of any competitor Americans abandoned themselves to a haze of consumerism and entertainment trusting that they were safe and could not be harmed The contestants on the big money quiz shows turned out to be fakes and the respected TV executives were also revealed to be liars and cheats Far worse was yet to come The United States government was caught in a lie regarding the CIA s U 2 reconnaissance planes overflying the Soviet Union On the eve of a crucial summit meeting in 1960 the USSR knocked Gary Powers out of the sky along with plenty of incriminating hardware and data Moscow delayed revealing what it knew and Washington spent ten days denying it was a spy plane then denying that President Eisenhower was aware of it The world was

turning into a very scary place and soon American schoolchildren were being taught to duck under their desks if a bomb should strike Fear began to percolate into the heart of the nation

The Politics of Transnational Television Austin Ogunseyi, 2004-05-29 The central focus of this study is to provide an improved basis for articulating the politics of transnational television and its potentials for improving relations among nations In this context the politics of transnational television means the decision making process that determines the degree of freedom of the press tolerated by individual governments and how that could affect broadcasting mode and attitudes toward other nations The motivation for this research stems from a conviction that the cultural imperialism perspective on the nature and modes of transnational television are erroneous and therefore susceptible to a wide and often misleading theoretical assumption with wide ranged implications In reevaluating the concept of cultural imperialism some fundamental questions are raised to determine to what extent its arguments are true Using the elite theory of power in various societies aided by Johan Galtung s model of a global communication in four worlds we see a pattern of global television that suggests a similar motivation underlying media ownership in all societies We acknowledge with the support of a literature review and other data sources the existence of a global systemic order where technology rich nations dominate technology over poor nations But there is also substantial evidence to prove some of the poorer nations exercise some degree of autonomy This makes it more difficult to explain cultural imperialism simply as a relationship where developed and developing nations are arranged in dominant subordinate or top down order Through a strategy of original intent we are able to show the elite in various societies acquire television mainly to satisfy their political economic or social interest Media attitudes therefore are largely the ideological expression of local elite who determines foreign policy

Rules of the Game, 2006-06-30 From The 64 000 Question and Twenty One to Jeopardy and Who Wants to Be a Millionaire quiz shows have permeated American culture ever since their beginnings in early radio In Rules of the Game Olaf Hoerschelmann critically examines the quiz show genre in American culture drawing on a large body of radio and television programs and on archival materials relating to the broadcast industry program sponsors advertising agencies and individual producers Hoerschelmann relates quiz shows to the larger social and industrial structures from which they originate and examines the connection of quiz shows to the production of knowledge in American society He also provides a rethinking of media genre theory offering a detailed analysis of the text audience relationships on quiz shows and their significance for the practice of broadcasting
