and the Zone of Proximal Development Louise Bøttcher, Ditte Winther-Lindqvist, Mariane Hedegaard, Marilyn Fleer, 2025-09-26 This book addresses the central issue of children's social situation of development in relation to sustainability care and imagination. The concept of sustainability is topical in current societal discussions but much in need of further elaboration which is provided by this book as an integrated aspect of childcare and child development. It provides an exploration of whether and how sustainability can contribute relevantly to conceptual development within the cultural historical framework with relation to child development more broadly and care and imagination more specifically. A central question in the book is how the concept of sustainability is related to Vygotsky's writings on the zone of proximal development and the social situation of development. It takes on the current need to understand the problem of creating more sustainable societies and practices as interconnected practices for supporting the development of children as present and future sustainability responsible citizens. This book provides a much needed theoretical elaboration of child care as a scientific concept, the practice context of care and a wholistic conceptual approach to care.

The Game Animals of India, Burma, Malaya, and Tibet Richard Lydekker, 1907

Aesop's Fables Aesop, 2016-08-01 Aesop embodies an epigram not uncommon in human history; his fame is all the more deserved because he never deserved it. The firm foundations of common sense, the shrewd shots at uncommon sense that characterise all the Fables belong not to him but to humanity. In the earliest human history whatever is authentic is universal and whatever is universal is anonymous. In such cases there is always some central man who had first the trouble of collecting them and afterwards the fame of creating them. He had the fame and on the whole he earned the fame. There must have been something great and human, something of the human future and the human past in such a man even if he only used it to rob the past or deceive the future. The story of Arthur may have been really connected with the most fighting Christianity of falling Rome or with the most heathen traditions hidden in the hills of Wales. But the word *Mappe* or *Malory* will always mean King Arthur even though we find older and better origins than the *Mabinogian* or write later and worse versions than the *Idylls of the King*. The nursery fairy tales may have come out of Asia with the Indo-European race now fortunately extinct; they may have been invented by some fine French lady or gentleman like Perrault; they may possibly even be what they profess to be. But we shall always call the best selection of such tales *Grimm's Tales* simply because it is the best collection.
