Louis I Kahn In The Realm Of Architecture Condensed Edition:

Louis I. Kahn: in the Realm of Architecture David B. Brownlee, 2010-06 A definitive and richly illustrative volume that presents the oeuvre of one of this century's most influential practitioners teachers and thinkers in architecture Here is the detailed account of the architecture and philosophy of Louis Kahn whose buildings have become the very signature of the modernist aesthetic and whose vision changed the direction of American architecture Kahn's career is documented here with attention to all aspects of his work from his biography to the unique philosophy that underlies his buildings to the structures themselves Includes more than 200 illustrations including numerous drawings and floor plans Also a complete list of buildings and projects The preeminent scholarly and illustrative source for Kahn's architecture Louis I. Kahn David Bruce Brownlee, David Gilson De Long, 1991 A comprehensive documentation and analysis of the complete architectural work of Louis I Kahn Conservation of Modern Architecture Susan Macdonald, Kyle C. Normandin, Bob Kindred, 2015-12-08 The importance of protecting significant buildings from decay and destruction would seem to be undeniable Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection there is much indifference and in some cases hostility towards many important post war buildings These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished This book examines many of the philosophical and practical issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time Climate change in particular has forced change in the way in which we think about buildings with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike **Architecture, Power and National Identity** Lawrence Vale, 2014-05-01 The first edition of Architecture Power and National Identity published in 1992 has become a classic winning the prestigious Spiro Kostof award for the best book in architecture and urbanism Lawrence Vale fully has fully updated the book which focuses on the relationship between the design of national capitals across the world and the formation of national identity in modernity Tied to this it explains the role that architecture and planning play in the forceful assertion of state power The book is truly international in scope looking at capital cities in the United States India Brazil Sri Lanka Kuwait Bangladesh and Papua New Guinea **Trajectories in Architecture** Michael Jasper, 2023-04-21 Trajectories in Architecture Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date Trajectories in Architecture adds to scholarship and expands our

understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture's recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture's traditions and design principles and their future expression Trajectories in Architecture includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei *Louis I. Kahn, in the Realm of Architecture* David G. DeLong, David B. Brownlee, 2000 **Louis I. Kahn** Per Olaf Fjeld, Emily Randall Fjeld, 2019-10-04 Louis I Kahn The Nordic Latitudes is a new and personal reading of the architecture teachings and legacy of Louis I Kahn from Per Olaf Fjeld's perspective as a former student The book explores Kahn's life and work offering a unique take on one of the twentieth century's most important architects Kahn's Nordic and European ties are emphasized in this study that also covers his early childhood in Estonia his travels and his relationships with other architects including the Norwegian architect Arne Korsmo The authors have gathered personal reflections archival material and other student work to offer insight into the wisdom that Kahn imparted to his students in his famous masterclass Louis I Kahn The Nordic Latitudes addresses Kahn's legacy both personally and in terms of the profession documents a research trip the University of Pennsylvania's Louis I Kahn Collection and confronts the affiliation of Kahn's work with postmodernism *Encyclopedia of 20th Century Architecture* R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **Louis Kahn** John Lobell, 2020-06-30 For everyone interested in the enduring appeal of Louis Kahn this book demonstrates that a close look at how Kahn put his buildings together will reveal a deeply felt philosophy Louis I Kahn is one of the most influential and poetic architects of the twentieth century a figure whose appeal extends beyond the realm of specialists In this book noted Kahn expert John Lobell explores how Kahn's focus on structure respect for materials clarity of program and reverence for details come together to manifest an overall philosophy Kahn's work clearly conveys a kind of transcendent rootedness a rootedness in the fundamentals of architecture that also asks soaring questions about our experience of light and space and even how we fit into the world In *Louis Kahn Architecture as Philosophy* John Lobell seeks to reveal how Kahn's buildings speak to grand humanistic concerns Through examinations of five of Kahn's great buildings the Richards Medical Research Building in Philadelphia the Salk Institute for Biological Studies in La Jolla the Phillips Exeter Academy Library in New Hampshire the

Kimbell Art Museum in Fort Worth and the Yale Center for British Art in New Haven Lobell presents a clear but detailed look at how the way these buildings are put together presents Kahn's philosophy including how Kahn wishes us to experience them. An architecture book that touches on topics that addresses the universal human interests of consciousness and creativity Louis Kahn Architecture as Philosophy helps us understand our place and the nature of well being in the built environment Louis I. Kahn, 1991

The Embodied Image Juhani Pallasmaa, 2011-05-16 The Embodied Image The Embodied Image Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked mediated and experienced through poeticised images These images are embodied and lived experiences that take place in the flesh of the world becoming part of us at the same time that we unconsciously project aspects of ourselves on to a conceived space object or event Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic Images are usually thought of as retinal pictures but profound poetic images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the many faces of the image the poetic image and finally the architectural image The Embodied Image is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind
