Mathematics Education in a Neocolonial Country: The Case of Papua New Guinea Patricia Paraide, Kay Owens, Charly Muke, Philip Clarkson, Christopher Owens, 2023-01-10 Most education research is undertaken in western developed countries While some research from developing countries does make it into research journals from time to time but these articles only emphasize the rarity of research in developing countries. The proposed book is unique in that it will cover education in Papua New Guinea over the millennia Papua New Guinea s multicultural society with relatively recent contact with Europe and the Middle East provides a cameo of the development of education in a country with both a colonial history and a coup less transition to independence Discussion will focus on specific areas of mathematics education that have been impacted by policies research circumstances and other influences with particular emphasis on pressures on education in the last one and half centuries This volume will be one of the few records of this kind in the education research literature as an in depth record and critique of how school mathematics has been grown in Papua New Guinea from the late 1800s and should be a useful addition to graduate programs mathematics education courses history of mathematics as well as the interdisciplinary fields of cross cultural studies scholarship focusing on globalization and post decolonialism linguistics educational administration and policy technology education teacher education and gender studies Money Counts Mario Schmidt, Sandy Ross, 2020-01-16 Traditionally viewed as an abstraction the quantitative nature of money is essential in evaluating the relationship between monetary systems and society Money Counts moves beyond abstraction exploring the conceptual diversity and everyday enactment of money's quantity Drawing from case studies including British jewelers blood money payments in Germanic law codes and the quotidian use of money in cosmopolitical Moscow a Western Kenyan village and socialist Havana the chapters in this volume offer new theoretical and empirical interpretations of money s quantitative nature as it relates to abstraction sociality materiality freedom and morality Teaching Mathematics Through

Cross-Curricular Projects Elizabeth A. Donovan, Lucas A. Hoots, Lesley W. Wiglesworth, 2024-07-22 This book offers engaging cross curricular modules to supplement a variety of pure mathematics courses Developed and tested by college instructors each activity or project can be integrated into an instructor's existing class to illuminate the relationship between pure mathematics and other subjects Every chapter was carefully designed to promote active learning strategies The editors have diligently curated a volume of twenty six independent modules that cover topics from fields as diverse as cultural studies the arts civic engagement STEM topics and sports and games An easy to use reference table makes it straightforward to find the right project for your class Each module contains a detailed description of a cross curricular activity as well as a list of the recommended prerequisites for the participating students The reader will also find suggestions for extensions to the provided activities as well as advice and reflections from instructors who field tested the modules Teaching Mathematics Through Cross Curricular Projects is aimed at anyone wishing to demonstrate the utility of pure mathematics across a wide selection of real world scenarios and academic disciplines Even the most experienced instructor will find something new and surprising to enhance their pure mathematics courses The Oxford Handbook of Linguistic Fieldwork Nick Thieberger, 2012 This book offers a state of the art guide to linguistic fieldwork reflecting its collaborative nature across the subfields of linguistics and disciplines such as astronomy anthropology biology musicology and ethnography Experienced scholars and fieldworkers explain the methods and approaches needed to understand a language in its full cultural context and to document it accessibly and enduringly They consider the application of new technological approaches to recording and documentation but never lose sight of the crucial relationship between subject and researcher The book is timely an increased awareness of dying languages and vanishing dialects has stimulated the impetus for recording them as well as the funds required to do so The handbook is an indispensible source guide and reference for everyone involved in linguistic and cultural fieldwork The Oxford Handbook of Linguistic Fieldwork Nicholas Thieberger, 2011-11-24 This book offers a state of the art quide to linquistic fieldwork reflecting its collaborative nature across the subfields of linquistics and disciplines such as astronomy anthropology biology musicology and ethnography Experienced scholars and fieldworkers explain the methods and approaches needed to understand a language in its full cultural context and to document it accessibly and enduringly They consider the application of new technological approaches to recording and documentation but never lose sight of the crucial relationship between subject and researcher The book is timely an increased awareness of dying languages and vanishing dialects has stimulated the impetus for recording them as well as the funds required to do so The handbook is an indispensible source guide and reference for everyone involved in linguistic and cultural work Lines That Connect Graeme Were, 2010-08-31 Building on historical and contemporary literature in anthropology and art theory Lines That Connect treats pattern as a material form of thought that provokes connections between disparate things through processes of resemblance memory and transformation Pattern is constantly in a state of motion as it traverses spatial and

temporal divides and acts as an endless source for innovation through its inherent transformability Graeme Were argues that it is the ideas carried by pattern's relational capacity that allows Pacific islanders to express their links to land genealogy and resources in the most economic ways In doing so his book is a timely and unique contribution to the analysis of pattern and decorative art in the Pacific amid growing debates in anthropology and art history This striking and original study brings together objects and photographs historical literature and contemporary ethnographic case studies to explore pattern in its logical workings It presents the first ever analysis of the well known patterned shell valuable called kapkap as revealed in New Ireland mortuary feasts Innovative research in the study of Christianity and the Baha i faithful in the region shows how pattern has been appropriated in new religious communities Were argues that pattern is used in various guises in performances church architecture and funerary images to contrasting effect He explores the conditions under which pattern facilitates a connecting of old and new ideas and how missionary processes are implicated in this flow He then considers the mechanisms under which pattern is internalized paying particular attention to its embeddedness in spatial and numerical thinking Finally he examines how pattern carries new materials and technologies which in turn provide new resources for sustaining old beliefs Drawing on a multitude of fields anthropology art history Pacific museum and religious studies education ethnomathematics Lines That Connect raises key questions about the capacity of pattern across the Pacific to bind and sustain ideas about place body and genealogy in the most logical of ways **Including the Other: Acknowledging** Difference in Education, Language and History Milton A.
