

Need & Significance of Mathematics Laboratory

Recently, Laboratory works in Mathematics is receiving increasing attention. The underlying idea of a Mathematical Lab is that people will develop new concepts and understanding particularly well through experimental activities dealing with concrete situations. They can be learned better through observation of the concrete situations and experiments and manipulation

of concrete objects. Activities such as measuring and drawing, counting, weighing, averaging & estimating, taking the readings from instruments, recording, comparing, analyzing, classifying and checking data, collecting data, working with data and so on will involve the use of physical instruments and can be labeled as laboratory work. Some of this work can be done in the classroom that is suitably arranged and equipped (Mathematics Laboratory) and some can take the form of elementary field work. Most students find such work highly interesting and through such activities they can develop many Mathematical Concepts and insight with an interest and a clarity often not attained through a strictly intellectual approach.
