*Toward Equity in Quality in Mathematics Education* Murad Jurdak, 2009-07-30 Educational equity and quality are not only research issues which cut across different disciplines but are major determinants of socio economic and human development in both industrial and developing countries The status and role of mathematics a subject which has long enjoyed a privileged status in school curricula worldwide due to its perceived role in science and technology render equity and quality in mathematics education at the heart of human development This is reflected by governments relatively large investments in improving the quality of mathematics education and extending it to marginalized and underprivileged groups The purpose of *Toward Equity in Quality in Mathematics Education* is four fold First the book examines the constructs of equity and quality and their interdependence from different perspectives Second it develops a conceptual framework for studying and analyzing the two constructs Third it examines consolidates and re structures the literature on equity and quality in mathematics education Finally using data from TIMSS 2003 the book investigates the within and across country impact of the different equity related factors on mathematics achievement in a sample of countries representative of worldwide geographical and cultural regions *Towards Equity in Quality in Mathematics Education* uses a multi dimensional conceptual framework to study and analyze issues in equity and quality The framework consists of five perspectives hypothesized as determinants of equity in quality in mathematics education Mathematical societal educational ideological and genetic The framework can be thought of as a pyramid with mathematics as its base and the societal educational ideological and genetic perspectives as its faces Thus each point within this pyramid represents a unique equity in quality situation i e with different coordinates with respect to mathematical societal educational ideological and genetic perspectives *Towards Equity in Quality in Mathematics Education* is useful for teachers and researchers in mathematics education

*Motivating Reluctant Learners* Roger Norgate, 2023-01-06 The materials in this book are the product of work undertaken by Hampshire Psychology Service in collaboration with 22 primary and secondary schools to address the needs of children whose academic motivation was proving particularly problematic The five year project involved feedback and review sessions which helped refine the programme There are four sections Information on attribution theory

and its application in the classroom Practical issues on implementing the programme Support for staff including a PowerPoint training session The 12 session pupil programme including facilitator notes The programme is designed to give pupils experience of success at the same time as encouraging them to attribute the success to their own effort skills and strategies It helps them to understand ability is not fixed learning is difficult for everyone and requires effort the significance of using strategies including help seeking and self talk the important of taking responsibility and setting SMART goals Participating staff reported changes in pupils the course effected a significant change and they moved into Year 10 options far more positive and motivated And also in themselves I thought the theory was one of the best things it was as if a light bulb had been turned on I have really gained in confidence as a consequence This pack contains a CD ROM with copiable activities DVD clips of pupil intervies and using the programme an example of a pupil booklet and the PowerPoint presentation
