Increasing Student Success in Developmental Mathematics National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Division of Behavioral and Social Sciences and Education, Board on Mathematical Sciences and Analytics, Board on Science Education, 2019-12-18 The Board on Science Education and the Board on Mathematical Sciences and Analytics of the National Academies of Sciences Engineering and Medicine convened the Workshop on Increasing Student Success in Developmental Mathematics on March 18 19 2019 The Workshop explored how to best support all students in postsecondary mathematics with particular attention to students who are unsuccessful in developmental mathematics and with an eye toward issues of access to promising reforms and equitable learning environments The two day workshop was designed to bring together a variety of stakeholders including experts who have developed and or implemented new initiatives to improve the mathematics education experience for students The overarching goal of the workshop was to take stock of the mathematics education community's progress in this domain Participants examined the data on students who are well served by new reform structures in developmental mathematics and discussed various cohorts of students who are not currently well served those who even with access to reforms do not succeed and those who do not have access to a reform due to differential access constraints Throughout the workshop participants also explored promising approaches to bolstering student outcomes in mathematics focusing especially on research and data that demonstrate the success of these approaches deliberated and discussed barriers and opportunities for

effectively serving all students and outlined some key directions of inquiry intended to address the prevailing research and data needs in the field This publication summarizes the presentations and discussion of the workshop **A Guide to Detracking Math Courses** Angela Torres, Ho Nguyen, Elizabeth Hull Barnes, Laura Wentworth, 2023-05-03 Create a pathway to equity by detracking mathematics The tracked mathematics system has been operating in US schools for decades However research demonstrates negative effects on subgroups of students by keeping them in a single math track thereby denying them access to rigorous coursework needed for college and career readiness The journey to change this involves confronting some long standing beliefs and structures in education When supported with the right structures instructional shifts coalition building and educator training and support the detracking of mathematics courses can be a primary pathway to equity The ultimate goal is to increase more students access to and achievement in higher levels of mathematics learning especially for students who are historically marginalized Based on the stories and lessons learned from the San Francisco Unified School District educators who have talked the talk and walked the walk this book provides a model for all those involved in taking on detracking efforts from policymakers and school administrators to math coaches and teachers By sharing stories of real world examples lessons learned and prompts to provoke discussion about your own context the book walks you through Designing and gaining support for a policy of detracked math courses Implementing the policy through practical shifts in scheduling curriculum professional development and coaching Supporting and improving the policy through continuous research monitoring and maintenance This book offers the big ideas that help you in your own unique journey to advance equity in your school or district s mathematics education and also provides practical information to help students in a detracked system thrive **Preparing Students for College and Careers** Katie Larsen McClarty, Krista D.

Mattern, Matthew N. Gaertner, 2017-08-22 Preparing Students for College and Careers addresses measurement and research issues related to college and career readiness Educational reform efforts across the United States have increasingly taken aim at measuring and improving postsecondary readiness These initiatives include developing new content standards redesigning assessments and performance levels legislating new developmental education policy for colleges and universities and highlighting gaps between graduates skills and employers needs In this comprehensive book scholarship from leading experts on each of these topics is collected for assessment professionals and for education researchers interested in this new area of focus Cross disciplinary chapters cover the current state of research best practices leading interventions and a variety of measurement concepts including construct definitions assessments performance levels score interpretations and test uses **International Handbook of Mathematics Teacher Education: Volume 3** , 2019-12-09 This second edition of the International Handbook of Mathematics Teacher Education builds on and extends the topics ideas in the first edition while maintaining the themes for each of the volumes Collectively the authors looked back beyond and within the last 10 years to establish the state of the art and continuing and new trends in mathematics teacher and mathematics teacher

educator education and looked forward regarding possible avenues for teachers teacher educators researchers and policy makers to consider to enhance and or further investigate mathematics teacher and teacher educator learning and practice in particular The volume editors provide introductions to each volume that highlight the subthemes used to group related chapters which offer meaningful lenses to see important connections within and across chapters Readers can also use these subthemes to make connections across the four volumes which although presented separately include topics that have relevance across them since they are all situated in the common focus regarding mathematics teachers Volume 3 Participants in Mathematics Teacher Education focuses not only on prospective and practicing teachers as learners but also on school colleagues teacher educators researchers and others who work to provide effective learning opportunities for teachers The emphasis is on describing and analysing participants engagement in mathematics teacher education collaborations and contexts from various perspectives Thus as the third volume in the series it further broadens our understanding of the development of mathematics teachers

Are Transforming the Community College World Terry U. O'Banion, 2019-03-15 America's community colleges are experiencing the most creative and substantive period of transformation in their 118 year history There has never been so much research so much support from foundations and so much commitment from national leaders to reimagine community colleges for today and for the future 13 Ideas that Are Transforming the Community College World edited by Terry U O Banion is the seminal work that captures the major ideas faced by community college leaders in this period of transformation The book includes 23 authors representing 12 national organizations perhaps the most significant and substantive list of individuals ever to participate in an edited book on the community college Each author is a nationally recognized authority on his or her chapter and all have played major roles as leaders of national organizations

Adult Literacy, Numeracy And Language: Policy, Practice And Research Tett, Lyn, Hamilton, Mary, Hillier, Yvonne, 2006-06-01 This book explores the social practice of literacy numeracy and language and its implications for teaching and learning adult basic skills Leading international experts argue that literacy numeracy and language are more than just a set of skills or techniques but are shaped by the social and cultural context within which they are taking place the meanings they have for users and the purposes they serve This shifts the focus from a narrow functional and externally imposed definition of literacy numeracy and language learning to more open and numerous definitions that focus on what people do with their knowledge understanding and skills in a range of contexts Adult Literacy Numeracy and Languages shows how the social practice approach to learning and teaching can be used to develop more inclusive views of adult literacy numeracy and language Bringing together the views of researchers policy makers and practitioners it helps readers to develop an understanding of contemporary policy developments and encourages them to examine their own practice as adult basic education teachers in order to respond more effectively to the needs of their students This book is a valuable resource for practitioners researchers and students on courses in adult and continuing education particularly basic skills postgraduate students and researchers in the field of post compulsory education

International Reflections on the Netherlands Didactics of Mathematics Marja van den Heuvel-Panhuizen, 2019-08-13 This open access book inspired by the ICME 13 Thematic Afternoon on European Didactic Traditions takes readers on a journey with mathematics education researchers developers and educators in eighteen countries who reflect on their experiences with Realistic Mathematics Education RME the domain specific instruction theory for mathematics education developed in the Netherlands since the late 1960s Authors from outside the Netherlands discuss what aspects of RME appeal to them their criticisms of RME and their past and current RME based projects It is clear that a particular approach to mathematics education cannot simply be transplanted to another country As such in eighteen chapters the authors describe how they have adapted RME to their individual circumstances and view on mathematics education and tell their personal stories about how RME has influenced their thinking on mathematics education

Debates in Mathematics Education Gwen Ineson, Hilary Povey, 2020-06-15 This new and updated second edition of Debates in

Mathematics Education explores the major issues that mathematics teachers encounter in their daily lives. By engaging with established and contemporary debates, this volume promotes and supports critical reflection and aims to stimulate both novice and experienced teachers to reach informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Divided into five accessible sections, this book investigates and offers fresh insight into topics of central importance in mathematics education, with this second edition including new discussions and chapters on Classic and contemporary issues of pedagogy, politics, philosophy, and sociology of mathematics education. International comparisons of achievement, Digital technologies for teaching, Mastery in mathematics, Pop culture and mathematics, Whether mathematics can be harmful. Designed to stimulate discussion and support you in your own research, writing, and practice through suggested questions and activities throughout. **Debates in Mathematics Education** will be a valuable resource for any student or practising teacher and those engaged in initial teacher education, continuing professional development, or Master's level study. This book also has much to offer to those leading mathematics departments in schools and initial teacher education programmes and to beginning doctoral students looking for a survey of the field of mathematics education research.

The Agile College Nathan D. Grawe, 2021-01-12. Following Grawe's seminal first book, this volume answers the question: How can a college or university prepare for forecasted demographic disruptions? Demographic changes promise to reshape the market for higher education in the next 15 years. Colleges are already grappling with the consequences of declining family size due to low birth rates brought on by the Great Recession, as well as the continuing shift toward minority student populations. Each institution faces a distinct market context with unique organizational strengths; no one-size-fits-all answer could suffice. In this essential follow-up to *Demographics and the Demand for Higher Education*, Nathan D. Grawe explores how proactive institutions are preparing for the resulting challenges that lie ahead. While it isn't possible to reverse the demographic tide, most institutions, he argues persuasively, can mitigate the effects. Drawing on interviews with higher education leaders, Grawe explores successful avenues of response, including recruitment initiatives, retention programs, revisions to the academic and cocurricular program, institutional growth plans, retrenchment efforts, collaborative action. Throughout, Grawe presents readers with examples taken from a range of institutions, small and large, public and private, two-year and four-year, selective and open access. While an effective response to demographic change must reflect the individual campus context, the cases Grawe analyzes will prompt conversations about the best paths forward. **The Agile College** also extends projections for higher education demand. Using data from the High School Longitudinal Study, the book updates prior work by incorporating new information on college going after the Great Recession and pushes forecasts into the mid 2030s. What's more, the analysis expands to examine additional aspects of the higher education market, such as dual enrollment, transfer students, and the role of immigration in college demand.
