a theoretical account of the development of a modern understanding of reality from a theological world view to which it is ostensibly opposed This framework is used to offer a deep interpretation of what is at stake in environmental debate that to accept there are limits to growth means abandoning crucial elements of a faith in a theodicy of progress that makes life meaningful in a secular age Douglas concludes by suggesting that the precondition for political action on the environment is a change of philosophical perspective that provides for a sense of meaning in a world of limits This book should be of interest to academics in the fields of environmental sociology and communications studies as well as activists interested in understanding the motivations of anti environmentalist campaigners and how to counter their influence
