Physical Disability and Sexuality Xanthe Hunt, Stine Hellum Braathen, Mussa Chiwaula, Mark T. Carew, Poul Rohleder, Leslie Swartz, 2021-02-08 This open access edited volume explores physical disability and sexuality in South Africa drawing on past studies new research conducted by the editors and first person narratives from people with physical disabilities in the country Sexuality has long been a site of oppression and discrimination for people with disabilities based on myths and misconceptions and this book explores how these play out for people with physical disabilities in the South African setting One myth with which the book is centrally concerned is that people with disabilities are unable to have sex or are seen as lacking sexuality by society at large Societal understandings of masculinity femininity bodies and attractiveness often lead people with physical disabilities to be seen as being undesirable romantic or sexual partners The contributions in this volume explore how these prevailing social conditions impact on the access to sexual and reproductive healthcare involvement in romantic relationships childbearing and sexual citizenship as a whole of people with physical disabilities in the Western Cape of the country The authors research and first person contributions by people with physical disabilities themselves suggest that education and public health policy must change if the sexual and reproductive health rights and full inclusion of people with disabilities are to be achieved *Physical Disability and Human Behavior* James W. Physical Disability in British Romantic Literature Essaka Joshua,2020-11-12 The modern concept of disability did not exist in the Romantic period This study addresses the anachronistic use of disability in scholarship of the Romantic era providing a disability studies theorized account that explores the relationship between ideas of function and aesthetics Unpacking the politics of ability the book reveals the centrality of capacity and weakness concepts to the egalitarian politics of the 1790s and the importance of desert theory to debates about sentiment and the charitable relief of impaired soldiers Clarifying the aesthetics of deformity as distinct from discussions of ability Joshua uncovers a controversy over the use of deformity in picturesque aesthetics offers accounts of deformity that anticipate recent disability studies theory and discusses deformity and monstrosity as a blended category in Frankenstein Setting aside the modern concept of disability Joshua cogently argues for the historical and critical value of period specific terms

The Health and Social Needs of Young Adults with Physical Disabilities Andrew Thomas,Martin Bax,Diane Smyth,1989 This book addresses a topic that has received surprisingly little attention to date the health and social needs of young adults with physical disabilities Following an extensive review of the contemporary literature on the subject the authors report an in depth study on a large sample of physically disabled 18 to 25 year olds living in two survey areas one urban and one semirural The study which included pediatric examinations and interviews by a social psychologist found that a large proportion of subjects face social and medical problems for instance They have serious health needs that are not being met by the statutory services they left school with less than adequate skills to enable them to lead an independent adult life they are without a daytime occupation or attend day centers that are described as unstimulating places they do not receive all the financial benefits to which they are entitled they are isolated from their peers and lack the social skills to interact with others in a positive and successful way Parents and guardians were also found to receive little physical or emotional support These findings underline the need for a better system of providing and coordinating services for this client group and the authors call for the formation within each local health authority area of an Adult Disability Service that would have a clinical and planning role in terms of health care and that would act as a linchpin in the coordination of health educational social and voluntary services Although this work relates specifically to service provision in the United Kingdom it is felt that the conclusions and recommendations are also broadly applicable to the situation in other countries

Physical Disability and Rehabilitation Sourcebook, 1st Ed. James Chambers,2019-10-01 Provides an overview of the types of disability that limit an individual s physical functioning mobility dexterity and stamina either as a structural or functional impairment The characteristics of specific physical disability are outlined and examples of the ways in which physical disability affects individuals are explained along with information on how to find government and local disability programs and resources

Psychological Aspects of Physical Disability James F. Garrett,1952 As workers in the field of rehabilitation we are realizing more and more that we do not

rehabilitate people Rather we must be able to reach the heart and mind of the individual with whom we are dealing so he will want to avail himself of the services our program can provide for him His drive to accomplish his own rehabilitation must come from within himself and we must be sensitive too in the factors that can help or hinder establishing this indispensable primary base for rehabilitation Increasingly we are learning that human motivation is influenced by many things Especially important are the psychological and social factors of an individual s life These factors are important to consider early in our planning for the whole program of rehabilitation for the individual and in the evaluation of each step of its development This bulletin was written primarily for vocational rehabilitation counselors It is expected that it will assist them in planning better rehabilitation programs The need for awareness of the psychological adjustment mechanisms of the physically disabled is not confined to the counselor however and it is hoped that physicians social workers psychologists and placement specialists may profit from the contents of this publication The cooperation and coordination of the various specialties is the most important element today in providing rehabilitation services for the disabled whereby they may take their rightful place as contributing members of society The interest and cooperation of the authors and the organizations many of them represent is a practical demonstration of the vital nature of the material presented herein We are aware of the fact that successful rehabilitation programs depend on integrated community activity and in a sense this bulletin epitomizes that approach Foreword

The Effective Teacher's Guide to Sensory and Physical Impairments Michael Farrell, 2010-11-26 This fully revised essential guide clarifies the definitions of sensory and physical impairments and gives suggestions for SEN provision always with practical classroom situations in mind
