Bolle,2017-10-23 At the deepest level religious traditions determine what goes on between one human being and another between one community and another and between human beings and whoever holds power over them Kees Bolle s original passionate scholarship veered away from things handed down and standard in our thought about religions In this his final book he explores how religious paradigms have given rise to particular structures of power and how religious myths compel particular human actions the possibility of interpretation the necessity for recognizing religious forms where they appear the relationship of secularization and sacredness And at every turn Bolle examines the notion that Western intellectuals are nonreligious He confronts the responsibility mere scholarship bears for events sometimes terrible events in the real world We move from David and Nathan to Antigone from Brahmanism and Buddhism to the familial struggle between Christianity and Islam The book concludes with Bolle s striking reflections on how modern man has become inherently religious in concurrence with modern manifestations of power Bolle is a fascinating figure He loved the immediacy of lessons found in Hasidic stories and his own thought may be said to approach the wholeness the immediacy of religion **Hearings, Reports and Prints of the Senate Committee on the Judiciary** United States.
