Industrial Approaches to Media Matthew Freeman, 2016-10-19. This guidebook aimed at those interested in studying media industries provides direction in ways best suited to collaborative dialogue between media scholars and media professionals. While the study of media industries is a focal point at many universities around the world, promising as it might, rich dialogues between academia and industry understandings of the actual methodologies for researching the media industries remain vague. What are the best methods for analysing the workings of media industries and how does one navigate those methods in light of complex deterrents like copyright and policy, not to mention the difficulty of gaining access to the media industries? Responding to these questions, *Industrial Approaches to Media* offers practical, theoretical, and ethical principles for the field of media industry studies, providing its first full methodological exploration. It features key scholars such as Henry Jenkins, Michele Hilmes, Paul McDonald, and Alisa Perren.

The book critically engages with and reassesses issues and debates in teaching and learning in the field of media studies in light of wide-scale shifts incurred by digital media and asks if media studies is still relevant as a subject in its current form. This book will be of interest to undergraduate and postgraduate students of media studies, media education, cultural studies, and popular culture.
