Challenging Perspectives on Organizational Change in Health Care Louise Fitzgerald,Aoife McDermott,2017-04-21 This

volume provides theory and research on organizational change and predominantly features the application of these ideas to the health care domain broadly defined. It addresses enduring issues in advancing to an effective health care system. The aim of this book is to offer an accessible and readable text aimed at provoking thought and questioning and aiding creativity. It proffers arguments and ideas which are firmly based in empirical data and evidence so that the reader may make informed personal evaluations. This book is designed to furnish a comprehensive theoretical basis for understanding organizational change in health care as well as selected core issues of contemporary and future importance to the provision of effective care within sustainable systems. A series of coherent themes are addressed throughout the book from differing perspectives. However, every chapter has been written to stand alone and be read independently. Each offers resources relevant to its focal topic in the form of references, case studies and critique. Setting out a future research agenda, the book will be vital reading for organizational change researchers and practitioners in the healthcare industry.

Organizational Change and Relational Resources Karol Marek Klimczak, Yochanan Shachmurove, 2021-11-18. Transitioning organizations to the new normal following environmental shocks, economic upheavals and technological innovations is a challenge to classic organizational management. The main reason because no single organization knows precisely what the target of change is. Resources created and operated in relationships can support the organization in overcoming its constraints, changing faster and adapting better. This book takes a relational perspective on how organizations adjust and adapt to their turbulent environment. Drawing from a broad literature and empirical studies, this book offers novel insights into how businesses create, grow and manage relationships with partners to support strategic change. It discusses the benefits of cooperating with partners and relying on shared resources while controlling relational risks. It presents key relational processes including organizational intelligence, open culture, knowledge sharing, routines, motivation, co-creation and communication. It discusses focus areas: longevity of family firms, improving health and safety in medical services, crisis management, public administration reforms and relational risk management. This book is a valuable resource for researchers and students in the fields of organizational studies, organizational change, technology and innovation management. Managers and entrepreneurs can find inspiration, motivation and strategies for implementing and managing relationships along the value chain.

Leadership, Organizational Change and Sensemaking Ronald Skea, 2021-06-03. Organizational change literature often focuses on the leader's role in giving sense to others of the need for change and there is a plethora of models and recipes on how to influence employees, thinking about change, organizational design and performance. Notwithstanding this ready supply of advice, research has shown that up to 90% of change programs fail to deliver their expected outcomes. One of the reasons for this which has been neglected in the literature is that successful change in thinking starts with how leaders first make sense of the need for change and the challenges this poses to their own thinking. This book surfaces the elements behind leader sensemaking that add to or detract from their ability to critically question their current thinking. Leaders and interventionists

have lacked practical and pragmatic advice on how to influence the process This book is the culmination of 10 years of research spent working with leaders in organizations as they interpreted the need for change and made choices about engaging or not with transformational change methodologies It reveals nine elements of sensemaking displayed by organizational leaders as they grapple with challenges to their current orthodoxies about how to lead and organize in times of change The book shows the latest state of knowledge on the topic and will be of interest to researchers academics practitioners and students in the fields of leadership change and organisational development

The Nature of Business Transformation Richard Kelly, 2022-03-17 This book is a practical guide for business professionals to develop and improve business intelligence and collective decision making within their organisation It proposes a progressive reconfiguration of the traditional business operating system using a nature inspired framework called swarm facilitation that enables and facilitates collective decision making Organisations have followed the same rigid formula of problem solving and decision making for over 100 years It is dominated by centralised governance and pyramid decision making Such an approach is no longer fit for purpose in an environment of employee disengagement artificial intelligence AI superintelligence and Covid 19 fallout By the end of this book readers will be able to solve organisational problems and challenges collectively using swarm intelligence upgrade and future proof business operating systems to reflect a more collective decision making approach fit for the new connected economy and Industry 4.0 embrace mindset quotients that support people working in a more networked self organising and collective environment The book is important reading for

leaders and managers who are focused on building organisational capital and engagement and gaining value from the emerging technology by evolving their business operating system into a digital ecosystem as part of an ongoing digital transformation strategy. It will also appeal to experts working in the field of organisational change and development both within the organisation and as consultants.

The Oxford Handbook of Critical Management Studies Mats Alvesson, Todd Bridgman, Hugh Willmott, 2009-06-19

Critical Management Studies (CMS) has emerged as a movement that questions the authority and relevance of mainstream thinking and practice. Critical of established social practices and institutional arrangements, it challenges prevailing systems of domination and promotes the development of alternatives to them. CMS draws upon diverse critical traditions. Of particular importance for its initial articulation was the thinking of members of the Frankfurt School of Critical Theory. From these foundations, CMS has grown into a pluralistic and inclusive movement incorporating a diverse range of perspectives ranging from labour process theory to radical feminism. In recent times, a set of ideas broadly labelled poststructuralist have been developed to complement and challenge the insights of Critical Theory, giving new impetus for scholars seeking to challenge the status quo and articulate a more inclusive and humane future for management practice. The Oxford Handbook of Critical Management Studies provides an overview of theoretical approaches, key topics, issues, and subject specialisms in management studies, as well as a set of reflections on the progress and prospects of CMS. Contributors are all specialists in the respective fields and share a concern to interrogate and challenge received wisdom about management theory and practice. Given the rapid growth of the CMS movement, its ever-increasing theoretical and geographical diversity, and its outreach into the public sphere, The Oxford Handbook of Critical Management Studies is a timely publication. In addition to UK contributors, where CMS has developed most rapidly, there is strong representation from North American contributors, as well as from areas where CMS has taken hold more recently, such as Australasia.

The Dance on the Feet of Chance Hooman Attar, 2010-12-02

Corporations have problems dealing with the indeterminate aspects of innovation, particularly in the early, fuzzy front end of the process. They have difficulty in reflecting upon and handling uncertainties of innovation, often exhibiting a dynamic conservatism or a set of defensive routines that inhibit inquiry about such contentious issues. They prefer and are better equipped to operate within the language of investment than the language of invention. In the language of investment, corporations select an environmental niche and attempt to program and fabricate its future according to rational, stable assumptions and formulations. This view is closely bound to a utopian image of risk management as a tool able to objectively map, measure, and monitor future uncertainties that govern the behavior of the chosen niche. By seeking a close and clear fit between risk management solutions, means, and the dominant factors that determine future threats and opportunities to the niche environment, ends, corporations attempt to master risks and colonize the future through an orderly process. It is the argument of this book that this approach is only good when targeting and solving well-defined problems of risk management and innovation within an intellectual terrain that has

already been intellectually set. It fails to systematically recognize, reflect upon, and improve the effectiveness of the complex and creative task undertaken in the prior stage of problem setting or risk settling. In contrast to this approach, it is argued that in ill-defined, unique, and uncertain situations, problem setting or risk settlement are the key primary activities, and problem solving or risk management only secondary. This study, as its strategic objective, seeks to juxtapose these contrasting views and develop an integrated conceptual framework capable of supporting a reflective practice amongst practitioners grappling with the interplay between risk settlement and risk management at the fuzzy front end of innovation. This framework, strongly influenced by Donald Schön's scholarly work, takes the form of a set of concepts designed to synthesize, mobilize, and focus a wide range of academic literature on managing risk and handling uncertainty in product innovation. It informs reflections on professional practice through pragmatist, existential explorations of the role of metaphor in basic thinking processes, as well as sociopolitical and psychological insights into the factors influencing how practitioners intuitively transform and translate uncertain, unmanageable realities into packages of manageable problems, converting uncertainty into manageable risks and rewards. In seeking to understand, reflect upon, and improve the way in which such a conversion process within the practice of risk settlement works, it is argued that it is useful to view it as having four dimensions: undertaking spontaneous and reciprocal reflections; coping with anxiety; use of metaphors; and use of frames and framing. The study applies this framework and understanding to an empirical study of risk management and product innovation in the Australian Cooperative Research Centres (CRC) programme. A narrative reconstruction of critical events occurring in a series of R & D projects in the CRCs is used to elucidate, elaborate, and illustrate the conceptual framework that has been developed, as both a contribution to risk management thought and, at least in prototype, as a guide for reflective practice. The framework and its illustration are designed to support practical reflection on the complexities of problem setting, risk settlement, and the non-rational character of generative metaphors and the practice of invention. In the introduction, I point to the increasing rate of uncertain, unique, and complex problems as they affect professionals, organizations involved in innovation, and modern institutions as a whole. This situation

Higher Education Leadership Rozana Carducci, Jordan Harper, Adrianna Kezar, 2024-02-06. Sharing the new and evolving approaches to higher education leadership that foster liberatory systemic change. Higher Education Leadership offers a groundbreaking exploration of leadership in higher education. Rozana Carducci, Jordan Harper, and Adrianna Kezar challenge traditional paradigms and ideologies that hinder progress, advocating instead for liberatory systemic change. The authors highlight new and evolving interdisciplinary leadership approaches for resisting and dismantling oppressive systems, including neoliberalism and white supremacy, within and beyond higher education organizations. This comprehensive textbook synthesizes decades of leadership scholarship and dissects the limitations of hierarchical and individual-centered models prevalent in higher education. Through critical analysis, the authors unveil process-centered, shared power, and equity-oriented approaches that prioritize liberation. By translating

classic and revolutionary theories they empower current and aspiring higher education leaders to reimagine their roles to create more meaningful impact The authors bring theory to life by exploring the specific context of higher education and providing practical applications Their survey also identifies gaps in knowledge and methodologies and provides ideas for future leadership research They invite readers to view leadership as both a problem to be interrogated and dismantled as well as a pathway to a more liberatory future By recognizing these dual possibilities of leadership the authors open the door to powerful insights while also offering a cautionary tale With enriching case studies vignettes and discussion questions Higher Education Leadership serves as an essential resource for graduate classrooms and professionals seeking to critique existing leadership practices and forge new pathways that foster equity and systemic transformation This thought provoking textbook offers a new vision for higher education scholars and leaders committed to fostering inclusive anti racist and equitable universities

Nascent Entrepreneurship and Learning Mine Karataş-Özkan, Elizabeth Chell, 2010-01-01 This work by Karataş and Chell provide fresh insights on entrepreneurial learning and the entrepreneurship process Employing a well informed social constructivist perspective it combines theory with a richly grounded empirical analysis at three distinct but inter related levels the micro the meso all set in the macro context of the enterprise culture A strength of the work is the multiple levels of analysis which sheds new light on entrepreneurial learning as part of the entrepreneurial process The result is a processual view that captures conceptualises and explains the transitive process of becoming an entrepreneur Alistair R Anderson The Robert Gordon University UK In this book Karataş and Chell show great clarity in dealing with a range of complex issues They articulate these in a manner which makes them interesting and comprehensible and in a fashion which impressively interweaves theory practice and method Sarah L Jack Lancaster University UK This informative book examines the process of nascent entrepreneurship from a learning perspective It offers a multi layered framework of nascent entrepreneurship through an inter disciplinary approach and sound application of Bourdieu's conceptual tools and also by generating practical insights for nascent entrepreneurs enterprise educators and mentors Supported by an empirical investigation of two case studies the authors argue that it is not sufficient to study nascent entrepreneurship and concurrent process of entrepreneurial learning at just the individual entrepreneur or collective team or organisational level and examine the socio behavioural aspects of learning but that entrepreneurial learning should be understood by inter relating personal micro relational meso and macro contextual aspects of nascent entrepreneurship The comprehensive coverage of entrepreneurship theory and research will be of significant value for scholars researchers and students in the field

Perspectives on Change Bernard Burnes, Julian Randall, 2015-11-19 Despite the plethora of books on change there appears to be a notable gap in the field rarely is the authentic and candid voice of change practitioners heard Seldom are those most closely involved in the management of change given or seek the opportunity to write about their personal experiences and reflexivity Nor is this just a case of practicing managers not being given a voice or feeling that

they cannot be frank and open about what they do How often do academics candidly state what they actually do when they are faced with managing change in their own institutions or when they are called on in a consultancy capacity Similarly it is rare for full time consultants to be candid about what it is they actually do instead they tend to have a well honed sales pitch which lays out a logical change process directed at helping the client to achieve success Yet when academics consultants and practicing managers are prepared to speak candidly about what they really do a richer messier but more illuminating picture of change emerges The aim of Perspectives on Change is to move beyond the do as I say approach of most change books and to encourage academics consultants and managers to say candidly what it is they really do and what they really think about change and how it should be managed The Editors of this book Burnes and Randall have over 60 years of experience between them of studying and teaching change management acting as consultants and actually managing change projects They are therefore well aware of the differences and contradictions between what academics consultants and managers say about change in public and what they say in private and do in practice Perspectives on Change will offer students and practitioners of change a unique opportunity to understand change in practice In addition it will also contribute to the Rigour Relevance debate by giving a different and perhaps more realistic perspective on the nature of the gap between theory and practice
