When we view large objects in a room or outdoors, we generally see them as a perspective view.

In a perspective drawing objects are small as they get further away.

One way to represent this on paper is a 2-point perspective drawings. Lines trailing off into the distance converge to a point.

## **Residential Spaces Of The World Vol 3 A Pictorial View:**

**The Nature of Order, Book Three: A Vision of A Living World** Christopher Alexander, 2020-03-30 Christopher Alexander's series of ground breaking books including *A Pattern Language* and *The Timeless Way of Building* have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns. Now in *The Nature of Order* Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities. From a practical point of view *A Vision of a Living World* is the most compelling of the four books. Hundreds of photographs and plans of new buildings that have living structure and the processes which gave them life demonstrate for the first time what the concept of living structure can mean in buildings of our time and of the future. The really good building. The really good space. Places that reach an archetypal level of human experience reaching across centuries across continents across cultures across technology across building materials and climates. They connect us to ourselves. They connect us to our feelings. What is more as we study them we realize that they all share a similar geometry. How are they made. The practical task of making beauty is the principal subject of this volume. Hundreds of examples of buildings and places are shown. New forms for large buildings public spaces communities neighborhoods lead to discussions about equally important small scale of detail and ornament and colour. Many of the examples are built by Alexander and his colleagues other buildings explored take us around the world and through time. With these examples lay people architects builders artists and students are able to make this new framework real for themselves understand how it works and understand its significance. The book is a feast for the eyes and mind and heart. Places created by living process. Book 2 have living structure. Book 1 and they connect us to our essence as people. Book 4. The seven hundred pictures of Alexander's buildings and works of art shown in this book demonstrate in detail what he means. Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart. A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united. *The Nature of Order* constitutes the backbone of *Building Beauty Ecologic Design Construction Process* an initiative aimed at radically reforming architecture education with the emphasis of making as a way to access a transformative vision of the world. The 15 fundamental properties of life guide our work and have given us much more than a set of solutions. *The Nature of Order* has given us the framework in which we can search and build up our own solutions. In order to be authentically sustainable buildings and places have to be cared for and loved over generations. Beautiful buildings and places are more likely to be loved and they become more beautiful and loved through the attention given to them over time. Beauty is therefore not a luxury or an option it includes and transcends technological innovation and is a necessary requirement for a

live in a secular age or so we have been told Nevertheless the Christian church strongly believes that we still experience and in fact are surrounded by acts of transcendence encounters with God that often defy imagination and explanation And yet we do try to explain such phenomena whether theologically experientially biblically historically philosophically literarily or even or especially artistically These two volumes are more than just papers from a major conference on secularism and the pursuit of transcendence held at McMaster Divinity College in Hamilton Ontario They contain genuine attempts by people deeply engaged with their secular surroundings to explain what we mean by transcendence Transcendence has been a longstanding topic among the best thinkers of this and previous ages and the same is true for these volumes which include contributions by Charles Taylor Robert Wuthnow Merold Westphal and Christina Gschwandtner but also by a wide range of others who address the question from divergent vantage points The responses vary as much as the orientations of those involved in the pursuit of defining not only what it means to live in our secular age but to be involved in the pursuit of transcendence or even to perceive the Transcendent s pursuit of us

*Community spaces* Harnack, Maren, Haumann, Sebastian, Berkemann, Karin, Tvrtkovic, Mario, Wolf, Tobias Michael, Herold, Stephanie, 2015-06-19 Large housing estates of the post war era have shaped the face of many cities throughout Europe In the original plans of the 1950s 1980s they were to amend the urban structure and in many cases they were expected to enable a superior form of communality and urbanity The estates were built to ease the housing shortage but were also thought to quite literally become the home for a new society be it under socialist regimes or the democratic welfare state The reformation of society was expected to be supported by the environment of the newly built estates and most crucially their community spaces The different manifestations of these community spaces were the subject of the second conference of the 45plus network which took place in Darmstadt in September 2012 and which is documented in this volume By focusing on community spaces such as community centers schools churches hospitals shopping districts but also parks open spaces and sport grounds the contributions to the conference addressed spaces that were thought to be particularly important points of identification for the new societies these estates were expected to foster Community spaces were planned in order to hold the housing estates together as well designed and attractive built environments as social hubs and especially as symbolic anchors Quite often they boasted prominent design features intended to serve as recognisable markers of the estates and their programmatic subtexts While planners and politicians conceptualized community spaces with their potential to shape identification in view communities tended to appropriate such spaces in different ways and to reinterpret their meanings In short local inhabitants as well as the broader public possibly identified with community spaces their individual features and with the ideas and practices they associated with them in significantly different ways than

originally intended Today the continuing tension between intention and appropriation of community spaces can be understood as an indicator of identification processes and appears to be one of the major challenges in the redevelopment of large housing estates but might also provide unexpected opportunities Gro wohnsiedlungen der Nachkriegszeit haben das Gesicht vieler Städte in ganz Europa geprägt Ursprünglich sollten diese Planungen der 1950er bis 1980er Jahre die Stadtstruktur verbessern und teilweise auch eine neue Form von Gemeinschaftlichkeit und Urbanität schaffen In erster Linie zur Linderung der Wohnungsnot gebaut wurden die Siedlungen auch als buchstäbliche Heimat für eine neue Gesellschaft geplant sei es unter sozialistischen Regimes oder im demokratischen Wohlfahrtsstaat Die Umgestaltung der Gesellschaft sollte durch die Gestaltung der neuen Siedlungen unterstützt werden wobei den gemeinschaftlich genutzten Räumen ein besonderer Stellenwert zukam Die verschiedenen Ausformungen dieser Räume waren Gegenstand der zweiten Konferenz des 45plus Netzwerk die in Darmstadt im September 2012 stattfand und in diesem Band dokumentiert wird Durch die Fokussierung auf gemeinschaftlich genutzte Räume wie Parks Freizeitanlagen und Sportplätze aber auch Gemeindezentren Schulen Kirchen Krankenhäuser Einkaufsstrassen stellen die in den Beiträgen der Konferenz angesprochenen Räume wichtige Identifikationspunkte der neuen Gesellschaften dar Gemeinschaftliche Räume wurden geplant um die neuen Wohnsiedlungen zusammenzuhalten als gut gestaltete und attraktive gebaute Umwelt als soziale Scharniere und vor allem als symbolische Anker Oft setzten sie prominente Gestaltungsmerkmale um so als Symbole der Siedlungen und ihrer programmatischen Subtexte zu dienen Während Planer und Politiker die gemeinschaftlichen Räume mit dem Fokus auf ihr Potenzial als Ort der Identifikation gestalteten wurden diese Räume durch die sie nutzenden Gemeinden in unterschiedlicher Weise angeeignet und auch uminterpretiert Kurz gesagt Bewohner wie auch die breitere Öffentlichkeit verstanden interpretierten und nutzten die gemeinschaftlichen Räume und deren individuellen Eigenschaften möglicherweise auf deutlich andere Art und Weise als ursprünglich geplant Heute können die anhaltenden Spannungen zwischen Absicht und Nutzung der gemeinschaftlichen Räume als Indikator für Identifikationsprozesse verstanden werden und stellen gleichzeitig eine der großen Herausforderungen bei der Sanierung von Großwohnsiedlungen dar offenbaren jedoch vielleicht auch unerwartete Chancen
