fragmented Each province and territory in Canada has developed unique approaches or governance models to guide decision making in that regard Thus this edited volume enables readers from around the world to gain insight on the best practices in Canada for achieving success and addressing barriers to implement IWM Although there remains non consensus about how to best approach river basin management some of the main observations include There is a need to balance a focus on the big picture with scoping the scale and scope of planning activities in order that feasible and effective solutions can be implemented Three types of integration are popular among the agencies included in the book i among environment economy and society ii interactions between people and the environment and iii integration or coordination of administrative activities Much more attention is required to achieving effective engagement from Indigenous communities The chapters were originally published in a special issue of the International Journal of Water Resources Development *Canadian Natural Resource and Environmental Policy, 2nd ed.* Melody Hessing, Michael Howlett, Tracy Summerville, 2011-11-01 In this new and updated edition the authors once again examine policy making in one of the most significant areas of activity in the Canadian economy natural resources and the environment and discuss the evolution of resource policies from the early era of exploitation to the present era of resource and environmental management Using an integrated political economy and policy perspective the book provides an analytic framework from which the foundation of ideological perspectives administrative structures and substantive issues are explored Departing from traditional approaches that emphasize a single discipline or perspective it offers an interdisciplinary framework with which to think through ecological political economic and social issues It also provides a multi stage analysis of policy making from agenda setting through the evaluation process The integration of social science perspectives and the combination of theoretical and empirical work make this innovative book one of the most comprehensive analyses of Canadian natural resource and environmental policy to date Its illumination of the key elements of government policy making in this critical sector and its new outline of the evolution of the Kyoto Protocol makes it a useful textbook and resource for students of environmental and public policy policy makers and environmental organizations *Environmental Law in Canada* Jamie Benidickson, 2023-06-20 Derived from the renowned multi volume International Encyclopaedia of Laws this book provides ready access to legislation and practice concerning the environment in Canada A general introduction covers geographic considerations political social and cultural aspects of environmental study the sources and principles of environmental law environmental legislation and the role of public authorities The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air water waste soil noise and radiation Then a section on nature and conservation management covers protection of natural and cultural resources such as monuments landscapes parks and reserves wildlife agriculture forests fish subsoil and minerals Further treatment includes the application of zoning and land use planning rules on liability and administrative and judicial remedies to environmental issues There is also an analysis of the impact of international and regional legislation and treaties

on environmental regulation Its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable resource for environmental lawyers handling cases affecting Canada Academics and researchers as well as business investors and the various international organizations in the field will welcome this very useful guide and will appreciate its value in the study of comparative environmental law and policy

*Conflict Resolution in Water Resources and Environmental Management* Keith W. Hipel, Liping Fang, Johannes Cullmann, Michele Bristow, 2015-04-13 The latest developments regarding the theory and practice of effectively resolving conflict in water resources and environmental management are presented in this book by respected experts from around the globe Water conflicts are particularly complex and challenging to solve because water and environmental issues span both the societal realm in which people and organizations interact and the physical world which sustains all human activities For instance when large scale water diversions take place across political jurisdictions conflicts may ensue among stakeholders within and across regions while the water transfers may cause severe damage to sensitive ecological systems Therefore to arrive at realistic and fair resolutions one must take into account not only the economics and politics of the situation but also the water quantity and quality changes that may occur within the altered hydrological system as well as the ecosystems contained therein When the effects of climate change and the closely connected activities of energy production and usage are also considered the complexity of the problem becomes even greater and messier Accordingly one must adopt an integrative and adaptive approach to water and environmental governance that specifically recognizes the conflicting value systems of stakeholders including nature and future generations even though they are not present at the bargaining table The 16 chapters in this leading edge book are written by authors who presented their original research at the International Conference on Water Resources and Environment Research ICWRER 2013 which was held in Koblenz Germany from June 3rd to 7th 2013 and subsequently submitted expanded versions of their research for review and publication in this timely book The rich range of contributions are put into perspective in the first chapter and then categorized into four main interconnected parts Part I Management and Evaluation Part II Global Trans boundary and International Dimensions Part III Consensus building Bargaining and Negotiation Part IV Ecological and Socio economic Impacts
