Resources of the Southern Fields and Forests, Medical, Economical, and Agricultural Francis Peyre Porcher, 2016-08-13. Excerpt from *Resources of the Southern Fields and Forests Medical Economical and Agricultural Being Also a Medical Botany of the Confederate States*. The following paper is prepared by direction of the Surgeon General for which purpose the author was released temporarily from service in the field and hospital. It is intended as a repertory of scientific and popular knowledge as regards the medicinal, economical, and useful properties of the trees, plants, and shrubs found within the limits of the Confederate States, whether employed in the arts for manufacturing purposes or in domestic economy to supply a present as well as a future want. Treating specially of our medicinal plants and of the best substitutes for foreign articles of vegetable origin, my aim has been to spare no exertions compatible with the limits assigned me to make it

applicable as well to the requirements Of the Surgeon as of the Planter and Farmer and I trust that after the war shall have ceased there will still be no diminution in the desire of every one to possess a source from whence his curiosity may be satisfied on matters pertaining to our useful plants The Regimental Surgeon in the field the Physician in his private practice or the Planter on his estate may themselves collect and apply these substances within their reach which are frequently quite as valuable as others obtained from abroad and either impossible to be pro cured or scarce and costly But information scattered through a variety Of sources must needs be first collected to be available in any practical point of view I have therefore inserted whatever I thought would throw light upon the vegetable productions of the Confederate States iv preface About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Excerpt shelves but the labor required to keep the worms properly cleaned renders this plan objectionable. At Economy Penn the rearing of the silk worm is now carried on to a great extent and more successfully than in any other part of the United States or perhaps the world. Their houses are two stories high. The worms are fed on small trays about eighteen or twenty inches wide and about three feet long. They are supported in the same manner as the hurdles above described and are about six inches apart. When the worms are about ready to wind they are transferred to the upper story to permanent shelves about sixteen inches apart where they form their cocoons in bunches of straw placed upright between the shelves. The worms are cleaned at least once after every moulting and after the last every day. For this purpose they have nets woven or knit of cotton twine something larger than the size of the trays with meshes of various sizes suited to the age of the worms. For the last age they are about three quarters of an inch square. They are used without frames. When it is required to remove the worms from their litter the nets are laid lightly over them and then plentifully fed. When the worms have arisen upon the fresh leaves they are removed by two persons taking hold of the four corners of the net and transferring them to clean trays held and carried off by a third person. One hundred thousand are changed in this manner in two hours. Description of the silk worm. It will be necessary for the inexperienced culturist to have some knowledge of the forms, changes, and appearances of the silk worm before he enters upon the duties of his interesting charge.
